advanced ovo strategies: Great Power Diplomacy A. Wess Mitchell, 2025-10-14 A captivating history of diplomacy—and an urgent reminder of why we need to revive its lost arts to survive in a dangerous era of great power competition From the beginning of time, human societies have found themselves confronted by enemies too numerous or ferocious to defeat solely by force of arms. In these dramatic moments, wise leaders have turned to diplomacy to rearrange the gameboard in their favor and stymie seemingly unstoppable foes. In *Great Power Diplomacy*, American historian and diplomat A. Wess Mitchell recounts the forgotten story of how history's most legendary empires have used diplomacy as a tool of grand strategy to outwit, outmaneuver, and outlast militarily superior opponents. Through fifteen centuries of history, *Great Power Diplomacy* recreates the perilous junctures, colorful personalities, and intricate statecraft that led to some of history's most stunning diplomatic achievements—and greatest disasters. The protagonists include giants like Richelieu, Metternich, Bismarck, and Kissinger, but also a lesser-known cast of scoundrels, eunuchs, drunkards, and fools. At every turn, fortune favored those great powers with the foresight and dexterity to build winning alliances, splinter enemy coalitions, and, when necessary, make peace with their bitterest foes. Diplomacy of this kind has become a lost art in recent years as Western elites embraced the illusion that globalization and the spread of democracy would create a borderless world where nations would live in harmony and war would be abolished from the human story. But, as *Great Power Diplomacy* reveals, we will need to rediscover the secrets of skillful statecraft as the world enters an unstable new era in which continent-sized great powers compete for territory, resources, and prestige. By recalling diplomacy's rich past, we can equip ourselves for a more dangerous future.

Vinaya Kumar, Dr. Shruti Mehrotra, Dr. Reshmi Naskar, Sumedha Halder, 2024-05-25 Millions of people are exposed to thousands of brands daily through different means, and we may categorise some as advertisements. William M. O'Barr calls it "conditioning of the consumers." Advertisements can be analysed from different perspectives. For instance, Philip Nelson, in his study "Advertising as Information," analyses advertisements based on the capacity of advertisements to direct the information toward the consumers, helping them separate one brand from another. Demetrios Vakratsas and Tim Ambler, in their study "How Advertising Works: What Do We Really Know?" discussed factors like "consumer's belief and attitudes" and "behavioral effects" leading to purchasing behavior and brand choice. Research and advertising are intertwined, and it helps to explore the horizon of advertising that helps to improve the advertising industry. The book "Advertising: Methods, Research and Practices" offers a collection of concepts and perspectives like brand identity, buying habits, online advertising, digital gaming, political advertising, contemporary Indian advertising, new age advertising, the impact of advertising on food habits and consumption preferences, AI intervention in advertising, unethical advertising practices, chocolate advertising, marketing of toys, Digital marketing and advertising. The chapters also include metaphorical language in advertising, advertising appeals, e-sport marketing, sustainable advertising, celebrity and advertising, subliminal advertising, MSME and advertising, women in advertising, public service advertising, advertisement for positive behavior change, advertisements on menstrual health and hygiene and many more. Collectively, the chapters would help in understanding the different perspectives of advertising as practice as well as the dimensions of research requirements.
