ancient societies ebook free: The Other Ancient Civilizations Raven Todd DaSilva, 2024-10-29 "A captivating journey" through 15,000 years of fascinating yet often-forgotten ancient civilizations and cultures—includes maps and illustrations (Natasha Billson, host, The Great British Dig). From the world's first peace treaty to daring expeditions across the Pacific, this book explores twenty ancient and historic cultures that have had monumental impacts on our modern world—but that few people know about. Archaeologist Raven Todd DaSilva, creator of the popular platform Dig It With Raven, looks beyond the familiar names and places and delves into astounding finds unearthed at archaeological sites around the globe. Discover the archaeology that sheds light on the secret stories of the Nubians, Olmec, Xiongnu, Minoans, Akkadians, and many more. Rather than focusing only on great rulers and monumental buildings, the book highlights the everyday lives of peoples of the past, who they interacted with, and what we can learn from them. Packed with summaries of current archaeological evidence, detailed maps, and striking images of artefacts and sites, *The Other Ancient Civilizations* reveals how archaeologists decode ancient cultures from what they left behind—and is an indispensable collection of fascinating stories and facts that illustrate both the differences and similarities between us and our long-distant ancestors. "A succinct journey through some of the world's less well-known complex societies ... excellent, thoroughly researched, and admirably illustrated." —Brian Fagan, author of *People of the Earth*

ancient societies ebook free: The Disinformation Guide to Ancient Aliens, Lost Civilizations, Astonishing Archaeology & Hidden History The Disinformation Guide, 2013-04-01 This compendium of ancient mysteries and controversial knowledge is "an excellent briefing on the

genre and its complexities" (Fortean Times). Where did "modern" civilization begin? What lies beneath the waves? Do myths describe interstellar impact? How'd they lift that stone? Was the Ark of the Covenant a mechanical device? Were there survivors of an Atlantean catastrophe? Who really discovered the "New" World? "Hidden history" continues to fascinate an ever wider audience. In this massive compendium, editor Preston Peet brings together an all-star cast of contributors to question established wisdom about the history of the world and its civilizations. Peet and anthology contributors guide us through exciting archeological adventures and treasure hunts, ancient mysteries, lost or rediscovered technologies, and assorted "Fortean," using serious scientific studies and reports, scholarly research, and some plain old fringe material, as what is considered "fringe" today is often hard science tomorrow. Contributors include: Graham Hancock (Fingerprints of the Gods and Underworld), David Hatcher Childress (Lost Cities and Civilizations series), Colin Wilson (From Atlantis to the Sphinx), Michael Cremo (Forbidden Archeology), William Corliss (Ancient Infrastructures), Robert Schoch (Voyages of the Pyramid Builders), John Anthony West (Serpent in the Sky), Michael Arbuthnot (Team Atlantis), Erich Von Daniken (Chariots of the Gods), and many more.

ancient societies ebook free: Warlike and Peaceful Societies Agner Fog, 2017-10-13 Are humans violent or peaceful by nature? We are both. In this ambitious and wide-ranging book, Agner Fog presents a ground-breaking new argument that explains the existence of differently organised societies using evolutionary theory. It combines natural sciences and social sciences in a way that is rarely seen. According to a concept called regality theory, people show a preference for authoritarianism and strong leadership in times of war or collective danger, but desire egalitarian political systems in times of peace and safety. These individual impulses shape the way societies develop and organise themselves, and in this book Agner argues that there is an evolutionary mechanism behind this flexible psychology. Incorporating a wide range of ideas including evolutionary theory, game theory, and ecological theory, Agner analyses the conditions that make us either strident or docile. He tests this theory on data from contemporary and ancient societies, and provides a detailed explanation of the applications of regality theory to issues of war and peace, the rise and fall of empires, the mass media, economic instability, ecological crisis, and much more. *Warlike and Peaceful Societies: The Interaction of Genes and Culture* draws on many different fields of both the social sciences and the natural sciences. It will be of interest to academics and students

in these fields, including anthropology, political science, history, conflict and peace research, social psychology, and more, as well as the natural sciences, including human biology, human evolution, and ecology.

ancient societies ebook free: DIGITAL TRANSFORMATION IN UKRAINE: AI, METAVERSE, AND SOCIETY 5.0 , 2024-12-15 This monograph examines the intricate dynamics of Ukraine's digital transformation, focusing on the intersections of artificial intelligence, the metaverse, and Society 5.0. It offers a comprehensive analysis of how emerging technologies are redefining societal structures, governance frameworks, and human identity in the context of global digitalization. By addressing the multifaceted nature of technological advancements, the research delves into philosophical, legal, and ethical considerations tied to digital identity and the evolving concept of electronic jurisdiction, particularly in the regulation of virtual environments and cyberspace. Key themes include the implications of immersive technologies for human interaction, the ethical dilemmas surrounding digital avatars, and the role of simulacra in hybrid warfare strategies. Additionally, the study explores the transformative potential of Industry 5.0 in Ukraine's economic and industrial revitalization, emphasizing the integration of digital ecosystems into post-quantum civilization. It underscores the need for interdisciplinary collaboration to tackle challenges associated with technological disruptions while fostering a sustainable balance between innovation and societal well-being. This work contributes to ongoing discourse on the role of digital technologies in shaping future societies, offering a unique perspective on their application and governance in Ukraine's journey toward a digitally empowered society.

ancient societies ebook free: A Socio-Legal Theory of Money for the Digital Commercial Society Israel Cedillo Lazcano, 2024-02-22 This book poses the question: do we need a new body of regulations and the constitution of new regulatory agents to face the evolution of money in the Fourth Industrial Revolution? After the Global Financial Crisis and the subsequent introduction of Distributed Ledger Technologies in monetary matters, multiple opinions claim that we are in the middle of a financial revolution that will eliminate the need for central banks and other financial institutions to form bonds of trust on our behalf. In contrast to these arguments, this book argues that we are not witnessing a revolutionary expression, but an evolutionary one that we can trace back to the very origin of money. Accordingly, the book provides academics, regulators and policy makers with a multidisciplinary analysis that includes elements such as the relevance of intellectual property rights, which are disregarded in the legal analysis of money. Furthermore, the book proposes the idea that traditional analyses on the exercise of the *lex monetae* ignore the role of inside monies and technological infrastructures developed and supported by the private sector, as exemplified in the evolution of the cryptoassets market and in cases such as *Banco de Portugal v Waterlow & Sons*. The book puts forward a proposal for the design and regulation of new payment systems and invites the reader to look beyond the dissemination of individual Distributed Ledger Technologies such as Bitcoin.

ancient societies ebook free: Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today's critics of big online platforms tend to consider privacy breaches, monopolistic practices, and the deployment of surveillance technologies as the main problems. Internet reformers suggest the answers to these issues reside in more--and better--regulations. While the questions of privacy, data, and size are indeed important, they are secondary however to a deeper set of concerns about platform ownership and control, and who benefits from the current status quo. This book examines these issues and offers an historical overview and in-depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance, behavior modification, and the delegation of managerial functions to algorithmic and automated systems in platform economies.

The approach taken extends to the wider array of data-driven, internet-connected and automated systems that involve digital devices and technologies centered on three smart spaces: the smart self, the smart home, and the smart city. Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed. The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications. This is followed by a critical look at proposals for more far-reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism. The book concludes with a diagnosis of the global situation among the competing digital empires (the United States, the European Union, and China), and considers whether or not, under the present conditions, any form of democratic platform socialism could materialize on a wider scale in the near future.
