advanced placement world textbook: The Classical Debt Johanna Hanink, 2017-05-22 "Greek debt" means one thing to the country's creditors. advanced placement world textbook: *Human Geography* Erin H. Fouberg, Alexander B. Murphy, Harm J. de Blij, 2009-01-27 Taking us from our hominid ancestors to the megacities of today, 'Human Geography' brings a new emphasis to the political and economic issues of human geography.

advanced placement world textbook: **The Trouble with Textbooks** Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that there is no record of any important Jewish contribution to the sciences? (World Civilizations, Thomson Wadsworth). Or that Christianity was started by a young Palestinian named Jesus? (The World, Scott Foresman/Pearson). Supplemental materials and other classroom influences are even worse. The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel. The problems uncovered in this ground-breaking analysis are instructive, and illustrate the need for reform in the way textbooks are developed, written, marketed, and distributed. Substitute another area-how we teach American history, Western

civilization, or comparative religion-and we have another, equally intriguing case study. The Trouble with Textbooks shows what can go terribly wrong in discussing religion, geography, culture, or history-and in this case-all of them. The Trouble with Textbooks tells a cautionary tale for all readers, whatever their background, of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life, instead disparage some groups and teach historical distortions. With millions of young people using these textbooks each year, the denigration of some should be a concern for all.

advanced placement world textbook: Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28 Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.
