Akkadian epics represent some of the earliest and most influential literary works in human history. Written in the Akkadian language, these epics originated in ancient Mesopotamia, present-day Iraq, during the third and second millennia BCE. akkadian epics ebook: God's Word Omitted Juha Pakkala, 2013-11-20 The book investigates omissions in the textual transmission of the Hebrew scriptures. Literary criticism (Literarkritik) commonly assumes that later editors only expanded the older text; omissions would not have taken place. This axiom is implied in analyses and introductions to the methodology. The book investigates the validity of the axiom. After a review of literature, books of methodology, and past research, texts from different parts of the Hebrew Bible are discussed with this aim in view. The investigated texts consist of examples which preserve documented evidence about editorial changes. Passages with variant editions are compared in order to understand omissions as an editorial technique. The comparison of variant witnesses includes, for example, passages where the Greek and Hebrew versions differ and cases where parallel passages differ (e.g., Chronicles in relation to Kings, the Temple Scroll in relation the Pentateuch). Example texts have been taken from the Pentateuch, Samuel, Kings, Ezra-Nehemiah, Esther, Jubilees, etc. The investigation shows that omissions took place in part of the transmission of the Hebrew scriptures. Although omissions were clearly less common than additions, the conclusion challenges the axiom of literary criticism. Rejecting the conventional implementation of the methodology, the book provides a new model for understanding the transmission of the Hebrew scriptures that integrates omissions as a possible editorial technique.

akkadian epics ebook: Städte in Ovids Metamorphosen Torben Behm, 2022-07-11 In Ovids Metamorphosen verwandeln sich nicht nur Figuren, sondern auch die menschliche Umwelt, darunter auch Städte. Diese Studie nimmt das Phänomen der ›Urbanität‹ in dem Epos erstmals umfassend in den Blick: Mithilfe einer raumnarratologischen Methodik untersucht sie die Darstellung und Funktion der einzelnen Städte im Verlauf des Werkes, wobei das besondere Augenmerk Theben, Athen, Troja und Rom gilt. Dabei wird deutlich, dass eine primär historisch-politische Deutung von Ovids Stadtdarstellungen verfehlt wäre; vielmehr zeigt das Buch, dass die Städte in erster Linie als literarische Landschaften zu sehen sind.

akkadian epics ebook: The Epic World Pamela Lothspeich, 2024-01-30 Reconceptualizing the epic genre and opening it up to a world of storytelling, The Epic World makes a timely and bold intervention toward understanding the human propensity to aestheticize and normalize mass

deployments of power and violence. The collection broadly considers three kinds of epic literature: conventional celebratory tales of conquest that glorify heroism, especially male heroism; anti-epics or stories of conquest from the perspectives of the dispossessed, the oppressed, the despised, and the murdered; and heroic stories utilized for imperialist or nationalist purposes. The *Epic World* illustrates global patterns of epic storytelling, such as the durability of stories tied to religious traditions and/or to peoples who have largely stayed put; the tendency to reimagine and retell stories in new ways over centuries; and the imbrication of epic storytelling and forms of colonialism and imperialism, especially those perpetuated and glorified by Euro-Americans over the past 500 years, resulting in unspeakable and immeasurable harms to humans, other living beings, and the planet Earth. The *Epic World* is a go-to volume for anyone interested in epic literature in a global framework. Engaging with powerful stories and ways of knowing beyond those of the predominantly white Global North, this field-shifting volume exposes the false premises of Western civilization and Classics, and brings new questions and perspectives to epic studies.

akkadian epics ebook: *Divine Assemblies in Early Greek and Babylonian Epic* Bernardo Ballesteros, 2024-11-05 In early Greek and Near Eastern myth and religion, the gods govern the cosmos. In narrative poetry, they are frequently portrayed through scenes of divine assembly. Did Homer and early Greek poets inherit this feature from their more ancient neighbours? And what can comparison tell us besides? This book is the first to chart divine assembly scenes in ancient Babylonian and early Greek epic. It asks why similarities between the two corpora exist, and exploits those similarities to enhance understanding of Mesopotamian and early Greek literature and religion. The book discusses Sumerian narrative poems, the Akkadian works *Atra-ḫašis*, *Anzû*, *Enûma eliš*, *Erra and Išum* and the Epic of Gilgameš; Homer's *Iliad*, the *Odyssey*, Hesiod's *Theogony* and some Homeric Hymns. It studies poetic technique and probes further comparisons with Sanskrit, Old Norse, Polynesian, and Aztec mythology. It argues that Greek speakers are unlikely to have inherited the divine assembly from the Near East. Still, one can posit a long-term process of oral contact and communication fostered by common poetic structures and religious affinities. In a second part pursuing a mythological and religious comparison, the book concentrates on ideas about the cosmos and humankind, and on power dynamics within the pantheon as well as between gods and mortals. A focus on the head of the pantheon and on concepts of divine prerogatives illuminates culture-specific differences which can be related to historical socio-political discourses. The book develops a systematic approach to questions of cross-cultural literary comparison in the ancient world.

akkadian epics ebook: *Broken Timelines - Book 2: Mesopotamia* Jack Stornoway, 2019-04-16 The current conventional Mesopotamian timeline of dynastic Mesopotamia is impossible. Believing in it means endorsing the idea the Egyptians lagged thousand years behind the Sumerians technologically during the Middle Kingdom. This timeline forces the bronze age Harappan civilization to have existed as recently as 1200 BC, even as an iron age civilization had existed on the Ganges since at least 1800 BC. It is also not what the ancient Sumerians actually recorded, so believing it means believing that modern Assyriologists know more about ancient Sumer than the ancient Sumerians themselves. Given that the ancient Sumerians lived through it, and all Assyriologists have to go on is random bits of clay-tablets and mostly ruined city-mounds, this seems like an incredible stretch of the imagination. The fact is Assyriologists can't and don't need to explain the anachronisms, because the Mesopotamian timeline is synchronized with the Egyptian timeline, which Egyptologists insist on keeping as short as possible. The idea that the ancient Sumerians built their earliest cities in the marshlands of Southern Iraq using stone imported from other countries is entirely illogical, they would have simply built them using mud-bricks as they did

in the later periods. As the stone had to have been locally quarried, the region could not have been a marshland when the earliest cities built, meaning that the oldest levels of Uruk and Eridu must date back to before the region began turning into a marshland circa 9,000 years ago. The fact that they switched to using mud-bricks simply proves that the water-levels rose during the course of Sumerian history, flooding their farmlands, and ultimately forcing the Mesopotamian cultures to migrate northward to Akkadia, Babylonia, and Assyria. The fact that Assyriologists ignore the ancient Sumerian records of the antediluvian era is probably for the best, as they cannot even accept that the 1st Kish Dynasty went back to 25,000 BC, even though it has been proven that grains were being farmed in the region at that time. Unfortunately, the timeline of Egypt and Sumer are the two pillars that ancient history is built around. As the early Sumerians were trading with the early Egyptians, Assyriologists have been forced to synchronize the Mesopotamian timeline with the preposterous timeline used by Egyptologists. While this means that most of Sumerian history has to be ignored, it also affects the timelines of all other Eurasian cultures in contact with the Mesopotamian. The Harappan civilization of ancient India was trading with the Sumerians throughout its history and went into decline around the end of the Sumero-Akkadian dynastic period, which means the entire Harappan civilization is forced to correlate with the short Conventional Mesopotamian Timeline. This forced the entire Harappan timeline into a period of 2000 years, even though some of the archaeological sites in Pakistan and India have been carbon-dated back to over 8000 BC. These broken timelines then fan out further pulling the Minoans and Greeks, Iranians, and Chinese into this confusing mess.

akkadian epics ebook: [Linked Data for Digital Humanities](#) Terhi Nurmikko-Fuller, 2023-08-18
Linked Data for Digital Humanities provides insights into how digital technologies can enrich and diversify humanities scholarship and make it pioneering in the digital age. Written in non-specialist language, the book illustrates how information is captured, published, represented, accessed, and interpreted using computational systems and, in doing so, shows how technologies actively shape the way we understand what we encounter. Focusing as it does on underlying Web architecture and projects accessible online, the book has an inherently international focus. The interdisciplinary case study examples include bibliographic data from works published in England between 1470 and 1700; literature from ancient Iraq; jazz performances, predominantly from the USA in the 1930s; and even reach as far as an alien, fictional future. Whilst these case study examples span vast spatio-temporal distances, they all share a common thread in the use of the Linked Data information publication paradigm. Using existing computer science methods, as well as processes such as ontology development and database design, the book also includes reflections on practical considerations and offers advice about how to take institutional policies, socio-cultural sensitivities, and economic models into consideration when implementing Linked Data projects. Linked Data for Digital Humanities discusses technological issues in the context of Humanities scholarship, bridging disciplines and enabling informed conversations across disciplinary boundaries. It will be of interest to humanities scholars, computer and data scientists, and library and information scientists.

akkadian epics ebook: *Jakob, der ambivalente Ahnherr Israels* Kristin Tröndle, 2023-03-06 Jakob ist als Namensträger Israel der Eponym schlechthin. Gleichzeitig hat ihm sein trickreiches Vorgehen, mit dem er sich nach der Darstellung von Gen 25–33* zum Patriarchen emporschwingt, das Bild eines ambivalenten Charakters eingetragen. Wie verhalten sich diese beiden Pole auf der Ebene der Wachstumsgeschichte der Jakoberzählung zueinander? Bei der Ergründung dieser Fragen geraten gängig gewordene Annahmen zur Wachstumsgeschichte der Jakoberzählung ins Wanken. In ihrer diachronen Analyse von Gen 25–33* zeigt Kristin Tröndle zum einen, dass sich die entstehungsgeschichtliche Zergliederung der Jakoberzählung in sog. Erzählkränze nicht mehr halten lässt. Zum anderen begegnet sie den Problemen, die eine vornehmlich völkergeschichtliche Interpretation der Jakoberzählung verursacht, mit einem neuen Vorschlag: Jakob ist in der Jakoberzählung seit jeher der Eponym für Israel, während Esau und Laban erst durch sekundäre Texteingriffe zu Volksvertretern avancierten.

akkadian epics ebook: The Shape of Stories Gina Konstantopoulos, Sophus Helle, 2023-03-27 How were narratives composed in the ancient Near East? What patterns and principles, constraints and considerations guided the shaping of cuneiform stories? The study of narrative structures has emerged as a promising approach to the textual heritage of the cuneiform world. Engaging with practically any ancient text—whether literary, historical, or religious—requires some understanding of the narrative forms that shaped their content. This volume gives researchers the tools to better understand those form, illustrating each approach to narrative analysis with a case study from the cultures of the ancient Near East: Sumerian, Babylonian, Assyrian, and Hittite.

The Vedic references to several places in the Middle East and the origin of Zoroastrian religion of Iran are well researched by a number of scholars. Vedic Sanskrit names and words found in the Sumerian civilization and Persian civilization raised many questions.
