38 letters rockefeller free pdf: Drugs as Weapons Against Us John L. Potash, 2015-05-25
Drugs as Weapons Against Us meticulously details how a group of opium-trafficking families came to form an American oligarchy and eventually achieved global dominance. This oligarchy helped fund the Nazi regime and then saved thousands of Nazis to work with the Central Intelligence Agency. CIA operations such as MK-Ultra pushed LSD and other drugs on leftist leaders and left-leaning populations at home and abroad. Evidence supports that this oligarchy further led the United States into its longest-running wars in the ideal areas for opium crops, while also massively funding wars in areas of coca plant abundance for cocaine production under the guise of a &“war on drugs&” that is actually the use of drugs as a war on us. Drugs as Weapons Against Us tells how scores of undercover U.S. Intelligence agents used drugs in the targeting of leftist leaders from SDS to the Black Panthers, Young Lords, Latin Kings, and the Occupy Movement. It also tells how they particularly targeted leftist musicians, including John Lennon, Jimi Hendrix, Kurt Cobain, and Tupac Shakur to promote drugs while later murdering them when they started sobering up and taking on more leftist activism. The book further uncovers the evidence that Intelligence agents dosed Paul Robeson with LSD, gave Mick Jagger his first hit of acid, hooked Janis Joplin on amphetamines, as well as manipulating Elvis Presley, Eminem, the Wu Tang Clan, and others.

38 letters rockefeller free pdf: In the Shadow of the Greatest Generation Melinda L. Pash, 2014-05-22
Largely overshadowed by World War II’s “greatest generation” and the more vocal veterans of the Vietnam era, Korean War veterans remain relatively invisible in the narratives of both war and its aftermath. Yet, just as the beaches of Normandy and the jungles of Vietnam worked profound changes on conflict participants, the Korean Peninsula chipped away at the beliefs, physical and mental well-being, and fortitude of Americans completing wartime tours of duty there. Upon returning home, Korean War veterans struggled with home front attitudes toward the war, faced employment and family dilemmas, and wrestled with readjustment. Not unlike other wars, Korea proved a formative and defining influence on the men and women stationed in theater, on their loved ones, and in some measure on American culture. In the Shadow of the Greatest Generation not only gives voice to those Americans who served in the “forgotten war” but chronicles the larger personal and collective consequences of waging war the American way.

38 letters rockefeller free pdf: Burroughs Unbound S. E. Gontarski, 2021-11-18
In addition to contributing significantly to the growing field of Burroughs scholarship, Burroughs Unbound also directly engages with the growing fields of textual studies, archival research, and genetic criticism, asking crucial questions thereby about the nature of archives and their relationship to a writer's work. These questions about the archive concern not only the literary medium. In the 1960s and

1970s Burroughs collaborated with filmmakers, sound technicians, and musicians, who helped re-contextualized his writings in other media. Burroughs Unbound examines these collaborations and explores how such multiple authorship complicates the authority of the archive as a final or complete repository of an author's work. It takes Burroughs seriously as a radical theorist and practitioner who critiqued drug laws, sexual practice, censorship, and what we today call a society of control. More broadly, his work continues to challenge our common assumptions about language, authorship, textual stability, and the archive in its broadest definition.

38 letters rockefeller free pdf: The Economists' Hour Binyamin Appelbaum, 2019-09-05 'A well-reported and researched history of the ways in which plucky economists helped rewrite policy in America and Europe and across emerging markets.' The Economist 'A highly readable, exhilaratingly detailed biographical account.' Sunday Telegraph As the post-World War II economic boom began to falter in the late 1960s, a new breed of economists gained influence and power. Over time, their ideas reshaped the modern world, curbing governments, unleashing corporations and hastening globalization. Their fundamental belief? That governments should stop trying to manage the economy. Their guiding principle? That markets would deliver steady growth and broad prosperity. But the economists' hour failed to deliver on its premise. The single-minded embrace of markets has come at the expense of economic equality, the health of liberal democracy and of future generations. Across the world, from both right and left, the assumptions of the once-dominant school of free-market economic thought are being challenged, as we count the costs as well as the gains of its influence. In *The Economists' Hour*, acclaimed New York Times writer Binyamin Appelbaum provides both a reckoning with the past and a call for a different future. 'A reminder of the power of ideas to shape the course of history.' New Yorker

38 letters rockefeller free pdf: FED - Die Bank Amerikas Roger Lowenstein, 2016-09-12 Amerikas Geschichte als Weltfinanzmacht begann einen Tag vor Weihnachten. Am 23. Dezember 1913 unterzeichnete Präsident Woodrow Wilson den Federal Reserve Act. Es ist die Geburtsstunde der Federal Reserve, der amerikanischen Zentralbank, der Fed. Was 1910 mit acht Männern als getarnte Entenjagd im Ferienhaus des Senators Nelson W. Aldrich auf der entlegenen Jekyll Island begann, ist heute eine der mächtigsten Institutionen der Welt. Die Gründung der ersten amerikanischen Zentralbank ist bis heute eine packende Geschichte voller Intrigen, politischem Machtkalkül und Verschwörungstheorien. Gut 100 Jahre danach hat die Fed das Finanzsystem so massiv zugunsten ihrer Eigentümer verändert wie keine andere Zentralbank: In den letzten 30 Jahren sind mehr als 10 000 US-Banken verschwunden und fast 70 Prozent aller bilanziellen Vermögenswerte liegen in den Händen von jenen zwölf Großbanken, die »zufällig« auch die größten Anteilseigner der Fed sind. Bis heute sind die Gründer und frühen Fed-Chefs wie Paul Volcker, Carter Glass oder Paul M. Warburg Legenden. Roger Lowenstein erzählt erstmals die packenden Hintergründe um die Gründung der Federal Reserve.

38 letters rockefeller free pdf: Sea Power and the American Interest John F Morton, 2024-04-15 From the Civil War to the Great War, the transatlantic commercial trading system that dated from the nation's colonial times continued in America. By 1900, the sustainability of this Atlantic System was in the material interest of an industrial America on which its aggregate national prosperity depended. The principal beneficiary of this political-economic reality was the American moneyed interest centered in the Northeast, with New York City at the heart. Author John F Morton explains how this country came to put a value on commercial opportunities overseas in support of America's steel industry. Europeans and Americans alike pursued informal empires for resource acquisition and markets for surplus capital and output. Morton looks at how U.S. policy found consensus around the idea of empire, taking stock of the opening of Latin American and Chinese markets to American commerce as a means for averting socially destabilizing economic depressions. Republican administrations reflected Wall Street finance and America's other three Madisonian interests—commercial, manufacturing, and agrarian—with the Open Door and Dollar Diplomacy policies to establish fiscal protectorates in Central America and the Caribbean. Undergirding Dollar Diplomacy was their commitment to "a great navy" that would be the

“insurance” for an ongoing American interest that Dollar Diplomacy represented. With the strategic arrival of the petroleum sinew and the Wall Street reassessment of the Open Door in China, the Wilson administration tilted toward protecting American investments in the hemisphere—notably in Mexico—with a “Big Navy.” With Wilson, a progressive foreign policy establishment arrived while continuing to reflect the transatlantic internationalism of the Northeast moneyed interest. As a twentieth century progressive institution, the Navy would thus sustain an American expansion that was now progressive. The Navy story from the Civil War to the Great War reveals a truth. The foundational and dynamic sectors of a great nation’s economic base—its sinews—give rise to policy consensus networks that drive national interest, long-term strategy, and the characteristics of its elements of national power. It follows that the attributes of sea power must be material expressions of those sinews, allowing a navy better to serve as a sustainable and actionable tool for a great nation’s interest.
