9th edition ethnic studies pdf: Riding the Academic Freedom Train Jeanett Castellanos, Joseph L. White, Veronica Franco, 2023-07-03 Mentoring demonstrably increases the retention of undergraduate and graduate students and is moreover invaluable in shaping and nurturing academic careers. With the increasing diversification of the student body and of faculty ranks, there's a clear need for culturally responsive mentoring across these dimensions. Recognizing the low priority that academia has generally given to extending the practice of mentoring – let alone providing mentoring for Black, indigenous, and people of color (BIPOC) and first generation students – this book offers a proven and holistic model of mentoring practice, developed in the field of psychology, that not only helps mentees navigate their studies and the academy but provides them with an understanding of the systemic and racist barriers they will encounter, validates their cultural roots and contributions, and attends to their personal development. Further recognizing the demands that mentoring places on already busy faculty, the model addresses ways of distributing the work, inviting White and BIPOC faculty to participate, developing mentees' capacities to mentor those that follow them, building a network of mentoring across generations, and adopting group mentoring. Intentionally planned and implemented, the model becomes self-perpetuating, building an intergenerational cadre of mentors who can meet the growing and continuing needs of the BIPOC community. Opening with a review of the salient research on effective mentoring, and chapters that offer minority students' views on what has worked for them, as well as reflections by faculty mentors, the core of the book describes the Freedom Train model developed by the godfather of Black psychology, Dr. Joseph White, setting out the principles and processes that inform the Multiracial / Multiethnic / Multicultural (M3) Mentoring Model that evolved from it, and offers an example of group mentoring. While addressed principally to faculty interested in undertaking mentoring, and supporting minoritized students and faculty, the book also addresses Deans and Chairs and how they can create Freedom Train communities and networks by changing the cultural climate of their institutions, providing support, and modifying faculty evaluations and rewards that will in turn contribute to student retention as well as creative and productive scholarship and research. This is a timely and inspiring book for anyone in the academy concerned with the success of BIPOC students and invigorating their department's or school's scholarship.

9th edition ethnic studies pdf: Unsettling Settler-colonial Education Cornel Pewewardy, Anna Lees, Robin Zape-tah-hol-ah Minthorn, James A. Banks, 2022 This book presents the Transformational Indigenous Praxis Model (TIPM), an innovative framework for promoting critical consciousness toward decolonization efforts among educators. The TIPM challenges readers to examine how even the most well-intentioned educators are complicit in reproducing ethnic stereotypes, racist actions, deficit-based ideology, and recolonization. Drawing from decades of collaboration with teachers and school leaders serving Indigenous children and communities, this volume will help educators better support the development of their students' critical thinking skills. Representing a holistic balance, the text is organized in four sections: Birth-Grade 12 and Community Education, Teacher Education, Higher Education, and Educational Leadership. *Unsettling Settler-Colonial Education* centers the needs of teachers, children, families, and communities that are currently engaged in public education and who deserve an improved experience today, while also committing to more positive Indigenous futurities. **Book Features:** Introduces the TIPM as a structure that supports educators in decolonizing and indigenizing their practices. 9th edition ethnic studies pdf: Critical Issues in Education Jack L. Nelson, Stuart B. Palonsky, Mary Rose McCarthy, 2020-08-12 *Critical Issues in Education* examines three questions that are at the core of the education debate in the United States: What interests should schools serve? What knowledge should schools teach? How do we develop the human environment of schools? When answering these queries the authors advocate the use of critical thinking, which includes dialogue and dialectic reasoning. Dynamic and interactive, dialogue requires listening and assessment, while dialectic stimulates the development of a creative response that encompasses both sides of an issue. When applied, these approaches engender an informative and stimulating discussion. In order to explore the depth of current educational issues, the Ninth Edition considers 15 topics, providing supporting evidence and reasoning for two divergent views. These issues include violence in schools, the role of technology, gender equity, multiculturalism, inclusion and disability, and school choice. Both civic and professional discussions regarding improvements will have consequences for students, teachers, and society. As a result, educational views and the social landscape in which they reside deserve critical study.

9th edition ethnic studies pdf: African Traditional And Oral Literature As Pedagogical Tools In Content Area Classrooms Lewis Asimeng-Boahene, Michael Baffoe, 2013-12-01 For a long time, many American educators and educational stakeholders have drawn their ideas for educational reforms from ideas generated in Europe and Asia for the changing demographics of America's diverse classrooms. This book is therefore motivated by a bold attempt at advocating for the revision of existing pedagogic fora and the creation and addition of new fora that would provide for the inclusion of thoughts, perspectives and practices of African traditional oral literature in the pedagogical tools of content area classrooms especially in North America. The articles that are presented in this book provide theoretical frameworks for using African traditional oral literature and its various tenets as teaching tools. They bring together new voices of how African literature could be used as helpful tool in classrooms. Rationale for agitating for its use as ideal for pedagogic tool is the recurrent theme throughout the various articles presented. The book explores how educators, literacy educators, learners, activists, policy makers, and curriculum developers can utilize the powerful, yet untapped gem of African oral literature as pedagogical tools in content area classrooms to help expand educators repertoire of understanding beyond the 'conventional wisdom' of their pedagogic creed. It is a comprehensive work of experienced and diverse scholars, academicians, and educators who have expertise in multicultural education, traditional oral literature, urban education, children's literature and culturally responsive pedagogy that have become the focus of U.S. discourses in public education and teacher preparation. This anthology serves as part of the quest for multiple views about our 'global village', emphasizing the importance of linking the idea of diverse knowledge with realities of global trends and development. Consequently, the goal and the basic thrust of this anthology is to negotiate for space for non-mainstream epistemology to share the pedagogical floor with the mainstream template, to foster alternative vision of reality for other knowledge production in the academic domain. The uniqueness of this collection is the idea of bringing the content and the pedagogy of most of the genres of African oral arts under one umbrella and thereby offering a practical acquaintance and appreciation with different African cultures. It therefore introduces the world of African mind and thoughts to the readers. In summary, this anthology presents an academic area which is now gaining its long overdue recognition in the academia.
