american born chinese pdf: Drawing New Color Lines Monica Chiu, 2014-11-01 The global circulation of comics, manga, and other such visual mediums between North America and Asia produces transnational meanings no longer rooted in a separation between Asian and American. *Drawing New Color Lines* explores the culture, production, and history of contemporary graphic narratives that depict Asian Americans and Asians. It examines how Japanese manga and Asian popular culture have influenced Asian American comics; how these comics and Asian American graphic narratives depict the look of race; and how these various representations are interpreted in nations not of their production. By focusing on what graphic narratives mean for audiences in North America and those in Asia, the collection discusses how Western theories about the ways in which graphic narratives might successfully overturn derogatory caricatures are themselves based on contested assumptions; and illustrates that the so-called odorless images featured in Japanese manga might nevertheless elicit interpretations about race in transnational contexts. With contributions from experts based in North America and Asia, *Drawing New Color Lines* will be of interest to scholars in a variety of disciplines, including Asian American studies, cultural and literary studies, comics and visual studies. *Drawing New Color Lines* makes an exciting contribution to the rapidly expanding inquiry at the crossroads of Asian American literary studies, graphic narrative studies, and transnational studies. Foregrounding the shifting meanings of race within, across, and between various national contexts, the fifteen essays in Chiu's collection explore the visual dimensions of Asian American transnational literary culture with originality and offer particular insight into the complexities of production, interpretation, and reception for graphic narrative. — Pamela Thoma, author of *Asian American Women's Popular Literature: Feminizing Genres and Neoliberal Belonging* An informative, smart, and necessary collection. *Drawing New Color Lines* investigates a growing and important field—transnational Asian American comics—with sophistication and breadth. — Hillary Chute, author of *Graphic Women: Life Narrative and Contemporary Comics* and *Outside the Box: Interviews with Contemporary Cartoonists*

american born chinese pdf: *Imagining Black America* Michael Wayne, 2014-02-25 DIVScientific research has now established that race should be understood as a social construct, not a true biological division of humanity. In *Imagining Black America*, Michael Wayne explores the construction and reconstruction of black America from the arrival of the first Africans in Jamestown in 1619 to Barack Obama's reelection. Races have to be imagined into existence and constantly reimagined as circumstances change, Wayne argues, and as a consequence the boundaries of black America have historically been contested terrain. He discusses the emergence in the nineteenth century—and the erosion, during the past two decades—of the notorious “one-drop rule.” He shows how significant periods of social transformation—emancipation, the Great Migration, the rise of the urban ghetto, and the Civil Rights Movement—raised major questions for black Americans about the defining characteristics of their racial community. And he explores how factors such as class, age, and gender have influenced perceptions of what it means to be black. Wayne also considers how slavery and its legacy have defined freedom in the United States. Black Americans, he argues, because of their deep commitment to the promise of freedom and the ideals articulated by the Founding Fathers, became and remain quintessential Americans—the “incarnation of America,” in the words of the civil rights leader A. Philip Randolph./div

american born chinese pdf: *Teaching About Dialect Variations and Language in Secondary English Classrooms* Michelle D. Devereaux, 2014-10-17 Standardized tests demand Standard English, but secondary students (grades 6-12) come to school speaking a variety of dialects and languages, thus creating a conflict between students' language of nurture and the expectations of school. The purpose of this text is twofold: to explain and illustrate how language varieties function in the classroom and in students' lives and to detail linguistically informed instructional strategies. Through anecdotes from the classroom, lesson plans, and accessible narrative, it introduces theory and clearly builds the bridge to daily classroom practices that respect students' language varieties and use those varieties as strengths upon which secondary English teachers can build. The book explains how to teach about language variations and ideologies in the classroom; uses typically taught texts as models for exploring how power, society, and identity interact with language, literature, and students' lives; connects the Common Core State Standards to the concepts presented; and offers strategies to teach the sense and structure of Standard English and other language variations, so that all students may add Standard English to their linguistic toolboxes.

american born chinese pdf: *Cyborg Saints* Carissa Smith, 2019-09-02 Saints are currently undergoing a resurrection in middle grade and young adult fiction, as recent prominent novels by Socorro Aciole, Julie Berry, Adam Gidwitz, Rachel Hartman, Merrie Haskell, Gene Luen Yang, and others demonstrate. *Cyborg Saints: Religion and Posthumanism in Middle Grade and Young Adult Fiction* makes the radical claim that these holy medieval figures are actually the new cyborgs in that they dethrone the autonomous subject of humanist modernity. While young people navigate political and personal forces, as well as technologies, that threaten to fragment and thingify them, saints show that agency is still possible outside of the humanist construct of subjectivity. The saints of these neomedievalist novels, through living a life vulnerable to the other, attain a distributed agency that accomplishes miracles through bodies and places and things (relics, icons, pilgrimage sites, and ultimately the hagiographic text and its reader) spread across time. *Cyborg Saints* analyzes MG and YA fiction through the triple lens of posthumanism, neomedievalism, and postsecularism. *Cyborg Saints* charts new ground in joining religion and posthumanism to represent the creativity and diversity of young people's fiction.

The transnational networks between the Chinese in diaspora and China have become even more significant as China has emerged as an economic world power.

american born chinese pdf: Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States—by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include: Comprehensive Coverage—Fifty-seven chapters cover all aspects of special education in the United States including cultural and international comparisons. Issues & Trends—In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking. Categorical Chapters—In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues. Expertise—Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field. This book is an appropriate reference volume for anyone (researchers, scholars, graduate students, practitioners, policy makers, and parents) interested in the state of special education today: its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate level courses in special education.

american born chinese pdf: Engaging the Past Elizabeth George, 2024-02-14 Engaging the Past: Action and Interaction in the History Classroom provides practical steps toward using engaging strategies in the classroom to teach students to think historically. These strategies include an approach developed by the author called "The You Decide! Lecture," and innovative ways to use board games and role-playing games in the history classroom. The goal is not simply to add window dressing to fundamentally dull lessons, but rather to re-examine how teachers think about students as learners of history. This book follows the growing trend within historical pedagogy to care less about content coverage and more about deep engagement, student learning, and the importance of historical thinking. The students in our classrooms today are the history teachers of tomorrow and awakening them to the exciting complexities of the past is critical to keep the study of history thriving.

american born chinese pdf: Using Graphic Novels in the English Language Arts Classroom William Boerman-Cornell, Jung Kim, 2020-10-01 Shortlisted for the UK Literacy Association's Academic Book Award 2021 There is an increasing trend in teachers using graphic novels to get their students excited about reading and writing, using both original stories and adaptations of classic works by authors such as Homer, Shakespeare, and the Brontes. However, there is surprisingly little research available about which pedagogies and classroom practices are proven to be effective. This book draws on cutting-edge research, surveys and classroom observations to provide a set of effective methods for teaching with graphic novels in the secondary English language arts classroom. These methods can be applied to a broad base of uses ranging from understanding literary criticism, critical reading, multimodal composition, to learning literary devices like foreshadowing and irony. The book begins by looking at what English language arts teachers hope to achieve in the classroom. It then considers the affordances and constraints of using graphic novels to achieve these specific goals, using some of the most successful graphic novels as examples, including *Maus*; *Persepolis*; *The Nameless City*; and *American Born Chinese* and series such as *Manga Shakespeare*. Finally, it helps the teacher navigate through the planning process to figure out how to best use graphic novels in their own classroom. Drawing on their extensive teaching experience, the authors offer examples from real classrooms, suggested lesson plans, and a list of teachable graphic novels organized by purpose of teaching.
