anh do biography ebook: Vietnamese Migrants in Australia and the Global Digital Diaspora Anh Nguyen Austen, 2022-09-16 Through oral histories, memoirs, and Facebook posts of Vietnamese adults who entered Australia as children after the Vietnam War (and Vietnamese refugees, war orphans, and children of refugees) this book provides insight into the memories of forced migrant childhoods and histories, as well as the complexities of national and transnational identity and belonging in digital diaspora. As war and displacement compounds the need for creating communities and histories for cultural continuity, this book is a history about childhood and migration for the Vietnamese diaspora of refugees, adoptees, and second generation in Australia and their connectedness to a global and digital diaspora. Using Facebook as a digital archive for historical research, Vietnamese Migrants in Australia and the Global Digital Diaspora presents new methods for the study of what Nguyen Austen proposes as a new area of digital diaspora studies for interdisciplinary research about real and digital life in the humanities and social sciences. As a contemporary digital diaspora study of Vietnamese forced child migrants from 1975 to the present, this book contains a mixed-methods historical analysis of the impact of war and displacement on memories of childhood. This book presents an innovative history of the national, transnational, digital, and contemporaneous lives of Vietnamese child migrants, which will make a significant contribution to the discourse on transnational childhood, migration, and belonging for refugees and migrants in the twenty-first century.

anh do biography ebook: *Digital Media and Youth Discipleship* Vo Huong Nam, 2023-06-30 Today's youth grow up immersed in digital technology. This presents a unique challenge to the church as it seeks to faithfully make disciples of the next generation. What does it look like - theologically and practically - to minister contextually to those whose lives are permeated by social media and digital culture? In this in-depth study, Dr. Vo Huong Nam offers both social and theological insight into the task of discipling youth in the digital age. He examines the impact of digital media on both society and young people and offers an overview of Christian responses to the changing technological landscape. Engaging such authors as John Calvin, Dietrich Bonhoeffer, and Henri Nouwen, he develops a constructive theology of spiritual formation relevant to the context of twenty-first century youth. He explores the implications of this theology on church practice, urging the church to take seriously its call to be all things for all people. Drawing specific examples from youth ministry in Vietnam, he addresses practical questions of application and contextualization and suggests that silence, solitude, and prayer are spiritual disciplines uniquely vital for the digital age. This book is an important resource for all those involved in discipling young people and longing to see today's youth come to fullness of life in Christ.

anh do biography ebook: *Biting the Hand* Julia Lee, 2023-04-18 Julia Lee is angry. And she has questions. What does it mean to be Asian in America? What does it look like to be an ally or an accomplice? How can we shatter the structures of white supremacy that fuel racial stratification? When Julia was fifteen, her hometown went up in smoke during the 1992 Los Angeles riots. The daughter of Korean immigrant store owners in a predominantly Black neighborhood, Julia was taught to be grateful for the privilege afforded to her. However, the acquittal of four white police officers in the beating of Rodney King, following the murder of Latasha Harlins by a Korean shopkeeper, forced Julia to question her racial identity and complicity. She was neither Black nor white. So who was she? This question would follow Julia for years to come, resurfacing as she traded in her tumultuous childhood for the white upper echelon of elite academia. It was only when she began a PhD in English that she found answers—not through studying Victorian literature, as Julia had planned, but rather in the brilliant prose of writers like James Baldwin and Toni Morrison. Their works gave Julia the vocabulary and, more important, the permission to critically examine her own tortured position as an Asian American, setting off a powerful journey of racial reckoning, atonement, and self-discovery. With prose by turns scathing and heart-wrenching, Julia lays bare the complex disorientation and shame that stem from this country's imposed racial hierarchy. And she argues that Asian Americans must work toward lasting social change alongside Black and brown communities in order to combat the scarcity culture of white supremacy through abundance and joy. In this passionate, no-holds-barred memoir, Julia interrogates her own experiences of marginality and resistance, and ultimately asks what may be the biggest question of all—what can we do?

anh do biography ebook: The Life Informatic Dominic Boyer, 2013-04-26 News journalism is in the midst of radical transformation brought about by the spread of digital information and communication technology and the rise of neoliberalism. What does it look like, however, from the inside of a news organization? In The Life Informatic, Dominic Boyer offers the first anthropological

ethnography of contemporary office-based news journalism. The result is a fascinating account of journalists struggling to maintain their expertise and authority, even as they find their principles and skills profoundly challenged by ever more complex and fast-moving streams of information. Boyer conducted his fieldwork inside three news organizations in Germany (a world leader in digital journalism) supplemented by extensive interviews in the United States. His findings challenge popular and scholarly images of journalists as roving truth-seekers, showing instead the extent to which sedentary office-based screenwork (such as gathering and processing information online) has come to dominate news journalism. To explain this phenomenon Boyer puts forth the notion of digital liberalism—a powerful convergence of technological and ideological forces over the past two decades that has rebalanced electronic mediation from the radial (or broadcast) tendencies of the mid-twentieth century to the lateral (or peer-to-peer) tendencies that dominate in the era of the Internet and social media. Under digital liberalism an entire regime of media, knowledge, and authority has become integrated around liberal principles of individuality and publicity, both unmaking and remaking news institutions of the broadcast era. Finally, Boyer offers some scenarios for how news journalism will develop in the future and discusses how other intellectual professionals, such as ethnographers, have also become more screenworkers than fieldworkers.
