african religions and philosophy pdf: *New Dawn for African Women* Michael Muonwe, 2016-12-13 The need for renegotiation of the place and role of women in the family, the Church, and the society cannot be any more urgent than now, especially as people are more aware of the devastating effects of the evils of inequality, discrimination, and oppression. It is a pity that the excellent qualities of bravery, industry, resilience, and perseverance historically attributed to African women, with which they negotiated for better place in the family, the Church, and the society, have been manipulated to serve as instruments for their denigration. The problem is that the patriarchal articulations of gender relations from the western world that entered Africa through colonialism, Christianity, western education and globalization allied themselves with the macho elements in African culture, and institutionalized the oppression of women; a move that women have always resisted both overtly and covertly. But how long could they hang on? This book provides exceptional and critical assessment of these issues, especially from the perspective of the Igbo society of Nigeria. Apart from assessing the strengths and weaknesses of the efforts made by women themselves to surmount these challenges, it also explores how the autochthonous values of the traditional culture could integrate with Christian values to enthrone gender equality in the society. Fr Muonwe demonstrated in this present publication his pastoral zeal for justice especially on the predicaments of women in African nay Igbo society. He regrets as it were that the African (Igbo) traditional society is still far from realizing the Christian gospel ideal of dignity and equality of human person because of the obvious environment that is strictly androcentric and carefully crafted in patriarchal hegemony I thank Fr Muonwe for this timely publication especially for many Igbo Christian communities today experiencing crisis in several aspects of our culture I hope the Bishops, the Priests, the Religious and Laity will find in this present work a rare and indispensable treasure for solutions to our pastoral predicaments. Rev. Fr. Prof. Anthony B. C. Chiegboka. *New Dawn for African Women* is encyclopaedic in content and daunting in its wealth of documentation [It] is a well-written book. The contents covered much more than Igbo women, or gender issues. It addressed such other issues as Igbo cosmology, Igbo concept of life and death, the history of Christianity in Igboland and Igbo social anthropology, among others. It is a book, which every Nigerian, especially the Igbo, should read. The book is inspirational and provocative in the extreme; it is original and displays learning lightly carried. One cannot but return to it over and over again after the first reading. I very strongly recommend it to the Nigerian and African reading public. C. Ego Uzoezie (Ph.D.)

african religions and philosophy pdf: *An Introduction to African Religion (2nd Edition)* John S. Mbiti, 1991

african religions and philosophy pdf: *Religion and Human Rights* Hans-Georg Ziebertz, Gordan Črpić, 2015-01-13 This book examines the relationship between human rights and religiosity. It discusses whether the impact of religiosity on human rights is liberational or suppressive, and sheds light on the direction in which the relationship between religion and human rights is expected to develop. The questions explored in this volume are: Which are the rights that are currently debated or under pressure? What is the position on human rights that churches and religious communities represent? Are there tensions between churches, religious communities and the state?

Which rights are especially relevant for young people and which relate to adolescents life-world experiences? Covering 17 countries, the book describes two separate, yet connected studies. The first study presents research by experts from individual countries describing the state of human rights and neuralgic points anticipated in individual societies. The other study presents specific findings on the relationship between these two social phenomena from empirical research in a population of high school students. Studying this particular population allows insights into social trends, value systems and attitudes on human rights, as well as an indication of the likely directions of development, and potential room for intervention.

african religions and philosophy pdf: The Hebrew Bible and Philosophy of Religion Jacob Gericke, 2012-11-01 This study pioneers the use of philosophy of religion in the study of the Hebrew Bible. After identifying the need for a legitimate philosophical approach to Israelite religion, the volume traces the history of interdisciplinary relations and shows how descriptive varieties of philosophy of religion can aid the clarification of the Hebrew Bible's own metaphysical, epistemological, and moral assumptions. Two new interpretative methodologies are developed and subsequently applied through an introduction to what the biblical texts took for granted about the nature of religious language, the concept of deity, the properties of Yhwh, the existence of gods, religious epistemology, and the relation between religion and morality.

african religions and philosophy pdf: Handbook of Research on Development and Religion Matthew Clarke, 2013-01-01 With eighty percent of the world's population professing religious faith, religious belief is a common human characteristic. This fascinating and highly unique Handbook brings together state-of-the-art research on incorporating religion into development studies literature and research. The expert contributors illustrate that as religious identity is integral to a community's culture, exclusion of religious consideration will limit successful development interventions; it is therefore necessary to conflate religion and development to enhance efforts to improve the lives of the poor. Issues addressed include: key tenets, beliefs and histories of religions; religious response to development concerns (gender, environment, education, microfinance, humanitarian assistance); and the role of faith based organisations and missionaries in the wider development context. Practical case studies of countries across Africa, Eastern Europe and the Pacific (including Australia) underpin the research, providing evidence that the intersection between religion and development is neither new nor static. By way of conclusion, suggestions are prescribed for extensive further research in order to advance understanding of this nascent field. This path-breaking Handbook will prove a thought-provoking and stimulating reference tool for academics, researchers and students in international development, international relations, comparative religion and theology.

african religions and philosophy pdf: Futurism and the African Imagination Dike Okoro, 2021-12-30 This book investigates how African authors and artists have explored themes of the future and technology within their works. Afrofuturism was coined in the 1990s as a means of

exploring the intersection of African diaspora culture with technology, science and science fiction. However, this book argues that literature and other arts within Africa have always reflected on themes of futurism, across diverse forms of speculative writing (including science fiction), images, spirituality, myth, magical realism, the supernatural, performance and other forms of oral resources. This book reflects on themes of African futurism across a range of literary and artistic works, also investigating how problems such as racism, sexism, social injustice and postcolonialism are reflected in these narratives. Chapters cover authors, artists, movements and performers such as Wole Soyinka, Ben Okri, Ngugi wa Thiong'o, Elechi Amadi, Mazisi Kunene, Nnedi Okorafor, Lauren Beukes, Leslie Nneka Arimah and the New African Movement. The book also includes a range of original interviews with prominent authors and artists, including Tanure Ojaide, Lauren Beukes, Patricia Jabbeh Wesley, Benjamin Kwakye, Ntongela Masilela and Bruce Onobrakpeya. Interdisciplinary in its approach, this book will be an important resource for researchers across the fields of African literature, philosophy, culture and politics.

What are the possibilities and limits of counter-visions of education? how do we make school curricula inclusive through teaching, research and graduate training in questions of Indigeneity and multi-centric ways of knowing? african religions and philosophy pdf: Religion and Violence Jeffrey Ian Ross, 2015-03-04 First Published in 2015. Daily newspaper headlines, talk radio and cable television broadcasts, and Internet news web sites continuously highlight the relationship between religion and violence. How does one make sense of the role of religion in violence, and of perpetrators of violence who cite religion as a motivation? african religions and philosophy pdf: African Legal Theory and Contemporary Problems Oche Onazi, 2013-11-26 The book is a collection of essays, which aim to situate African legal theory in the context of the myriad of contemporary global challenges; from the prevalence of war to the misery of poverty and disease to the crises of the environment. Apart from being problems that have an indelible African mark on them, a common theme that runs throughout the essays in this book is that African legal theory has been excluded, under-explored or under-theorised in the search for solutions to such contemporary problems. The essays make a modest attempt to reverse this trend.

The contributors investigate and introduce readers to the key issues, questions, concepts, impulses and problems that underpin the idea of African legal theory. They outline the potential offered by African legal theory and open up its key concepts and impulses for critical scrutiny. This is done in order to develop a better understanding of the extent to which African legal theory can contribute to discourses seeking to address some of the challenges that confront African and non-African societies alike.

african religions and philosophy pdf: The Critique of Bioethical Principlism in Contrast to an African Approach to Bioethics Jude Thaddaeus Buyondo, 2024-08-16 Though some argue that bioethics in the Black African world is simply a reflection of the Western approach to bioethics, this work suggests otherwise. While the Western approach (bioethical principlism) claims to offer an absolute approach to bioethics in a universalized common morality, this book argues that bioethical principlism can be complemented with African approaches to bioethics. Western principlism, as primarily presented by Thomas L. Beauchamp and James F. Childress, can hardly be incarnated in the African context of bioethical problems unless it is complemented by a contextual normative understanding of African social realities, realities that themselves must be enriched by bioethical principlism. Without claiming to offer the last word on intercultural bioethics or disputing which bioethical approaches deserve prioritization, the work interactively relies on ordinary moral experiences that are practically visible in lived social realities, as well as the community realities surrounding Africans south of the Sahara. Prescriptively, in order to not simply promote life but to do so fully, the African ethical system supports an integral community life by continuously promoting the norm of solidarity, continued vitality, and the hierarchization of life within the corporate community, which the individual must not blindly follow but responsibly interact with, without her identity, freedom, and conscience being crushed.
