11th grade english textbook pdf: *Intercultural Learning in Textbooks* Sara Vali, 2015-09-02
Given the interest in recent years in developing Intercultural Communicative Competence (ICC) as a key aim in teaching a foreign language, textbooks are often studied and evaluated in terms of their roles and impacts on the promotion of intercultural awareness among language learners. While some textbook designers prefer to focus on the target language culture, others mainly consider the local culture. However, as most of the research has been conducted on a textbook or a series of coursebooks in a single country, there are few studies which analyze the textbooks comparatively in an international setting concerning cultural matters. Thus, the present work attempts to enrich this discussion by analyzing four English textbooks at the first grade of upper-secondary school level from intercultural perspectives in Germany, Iran, the Netherlands and Sweden. In this case, this study aims to investigate the extent to which the texts and activities in the textbooks develop intercultural competence.

11th grade english textbook pdf: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.
