african american history books: *Black Book Publishers in the United States* Donald Franklin Joyce, 1991-10-14 Since the second decade of the nineteenth century, there have been black-owned book publishers in the United States, addressing the special concerns of black people in ways that other book publishers have not. This is the first work to treat extensively the individual

publishing histories of these firms. Though largely ignored by historians, the story of these publishers, as documented in this study, reveals fascinating details of literary history, as well as previously unknown facts about the contribution of blacks to Western civilization. Donald Franklin Joyce offers comprehensive profiles of forty-six publishing companies, selected for inclusion through an examination of major bibliographic works, book advertisements, periodical literature, and business directories. Each profile contains information on the company's publishing history, books and other publications that were released, information sources about the firm, other titles issued, libraries holding titles produced by the publisher, and officers and addresses, where appropriate. Entries are arranged alphabetically by the publisher name, while an appendix presents a geographic listing of the firms and an index offers author, title, and subject access. This work will be an important resource for students, scholars, and researchers interested in cultural and intellectual black history, as well as public and academic libraries seeking specific information on individual publishing companies.

african american history books: The Black History Bowl: Mini Biographies of African Americans Cadmus S. Hull, 2018-12-07 When I spoke at book signings for my first book, I found that people, in general, knew very little about many of the African Americans that I had on the display board. Thus, this second book in The Black History Bowl series was written to make people aware of the contributions that African Americans have made to American and World history. The African American history quiz that is included in the book is divided into eight (8) sections. Each section begins with a worksheet. The worksheet is followed by short biographies of the African American history contributors. There is an answer sheet at the end of each section. In addition, note sheets have been included with each biography for you to use to take notes when researching and gathering information. Additional information on each African American can be found on the web site that is listed at the bottom of the page after the biography. Also, included in this book is information on some points of interest that I think are important to the knowledge base of the average American. The information includes the African American holiday of Kwanzaa, the NAACP's Spingarn Medal, and information on Juneteenth (the actual day when all slaves were freed). In addition, this book includes a section for Women's History Month which highlights African American women from my first book. A timeline of African American history is also included. It is hoped that you will enjoy reading the book as you continue to enrich your knowledge of the contributions that African Americans have made to history. Dr. C. african american history books: Writing History from the Margins Claire Parfait, Hélène Le Dantec-Lowry, Claire Bourhis-Mariotti, 2016-09-13 With contributions from leading American and European scholars, this collection of original essays surveys the actors and the modes of writing history from the margins of society, focusing specifically on African Americans. Nearly 100 years after *The Journal of Negro History* was founded, this book assesses the legacy of the African American historians, mostly amateur historians initially, who wrote the history of their community between the 1830s and World War II. Subsequently, the growth of the civil rights movement further changed historical paradigms--and the place of African Americans and that of black writers in publishing and in the historical profession. Through slavery and segregation, self-educated and formally educated Blacks wrote works of history, often in order to inscribe African Americans within the main historical narrative of the nation, with a two-fold objective: to make African Americans proud of their past and to enable them to fight against white prejudice. Over the past decade, historians have turned to the study of these pioneers, but a number of issues remain to be considered. This anthology will contribute to answering several key questions concerning who published these books, and how were they distributed, read, and received. Little has been written concerning what they reveal about the construction of professional history in the nineteenth century when examined in relation to other writings by Euro-Americans working in an academic setting or as independent researchers.
