argumentative strategies book: *Dante and the Making of a Modern Author* Albert Russell Ascoli, 2008-03-13 Leading scholar Albert Russell Ascoli traces the metamorphosis of Dante Alighieri - minor Florentine aristocrat, political activist and exile, amateur philosopher and theologian, and daring experimental poet - into Dante, author of the *Divine Comedy* and perhaps the most self-consciously 'authoritative' cultural figure in the Western canon. The text offers a comprehensive introduction to Dante's evolving, transformative relationship to medieval ideas of authorship and authority from the early *Vita Nuova* through the unfinished treatises, *The Banquet* and *On Vernacular Eloquence*, to the works of his maturity, *Monarchy* and the *Divine Comedy*. Ascoli reveals how Dante anticipates modern notions of personalized, creative authorship and the phenomenon of 'Renaissance self-fashioning'. Unusually, the book examines Dante's career as a whole offering an important point of access not only to the Dantean oeuvre, but also to the history and theory of authorship in the larger Italian and European tradition.

argumentative strategies book: Argumentation Strategies in the Classroom Chrysi Rapanta, 2019-09-01 Argumentation as a teaching and learning method in the K-12 curriculum has received increasing attention across the globe. The reason for this is simple: argumentation helps students develop necessary critical thinking skills. However, teaching this method is not as straightforward as it may appear. Placing the classroom at the centre of the investigation, this book seeks to throw light onto argumentation as a teaching practice by asking: What does it take to teach as argument? What does it mean to be 'argumentative' teachers? And, how can we create classroom environments that will help and encourage young people to develop their argument skills? Based on first-hand experience and extensive research, this volume guides the reader through argumentation with the focus placed on the relationship between this teaching method and effective learning and the need to investigate the role of teachers in encouraging argumentation in the classroom. Although there are a considerable number of tools and techniques that promote argumentation in the K-12 classroom, many teachers struggle to successfully implement them in the classroom. Aimed at addressing this issue, this book endeavours to instruct teachers on how to apply argumentation effectively in their day-to-day classes and to clarify argumentation as a teaching and learning strategy. As an important contribution to the field of argumentation and education, this book will be of interest to researchers, post-graduate students, and secondary school teachers, alike.

argumentative strategies book: *Disturbing Argument* Catherine Palczewski, 2015-01-30 This edited volume represents the best of the scholarship presented at the 18th National Communication Association/American Forensic Association Conference on Argumentation. This biennial conference brings together a lively group of argumentation scholars from a range of disciplinary approaches and a variety of countries. *Disturbing Argument* contains selected works that speak both to the disturbing prevalence of violence in the contemporary world and to the potential of argument itself, to disturb the very relations of power that enable that violence. Scholars' essays analyze a range of argument forms, including body and visual argument, interpersonal and group argument, argument in electoral politics, public argument, argument in social protest, scientific and technical argument, and argument and debate pedagogy. Contributors study argument using a range of methodological approaches, from social scientifically informed studies of interpersonal, group, and political argument to humanistic examinations of argument theory, political discourse, and social protest, to creatively informed considerations of argument practices that truly disturb the boundaries of what we consider argument.

argumentative strategies book: *Strategy in Information and Influence Campaigns* Jarol B. Manheim, 2011-01-24 Information and influence campaigns are a particularly cogent example of the broader phenomenon we now term strategic political communication. If we think of political communication as encompassing the creation, distribution, control, use, processing and effects of information as a political resource, then we can characterize strategic political communication as the purposeful management of such information to achieve a stated objective based on the science of individual, organizational, and governmental decision-making. IICs are more or less centralized, highly structured, systematic, and carefully managed efforts to do just that. *Strategy in Information and Influence Campaigns* sets out in comprehensive detail the underlying assumptions, unifying strategy, and panoply of tactics of the IIC, both from the perspective of the protagonist who initiates the action and from that of the target who must defend against it. Jarol Manheim's forward-looking, broad, and systematic analysis is a must-have resource for scholars and students of political and strategic communication, as well as practitioners in both the public and private sectors.

argumentative strategies book: *Europe's Evolving Role in US Grand Strategy* Linde Desmaele, 2023-11-10 This book looks at the evolution of the role of Europe in US grand strategy, and unpacks how US administrations have instrumentalized this relationship in pursuit of extra-European objectives. The work considers geopolitical pressures in conjunction with leaders' strategic ideas to provide an account of the evolution of the role of Europe in the context of US grand strategy. Observers generally agree on the vague notion that Europe has been de-prioritized in Washington's external affairs. Against this background, the book makes the case that such de-prioritization of Europe in the context of US grand strategy also entails a reconceptualization of the transatlantic relationship, namely as a region featuring long-standing relationships that can at times be leveraged in pursuit of non-European goals. The United States has a long history of seeking European support or acquiescence for its role as the leader of the international system, but whereas

during the Cold War Washington enlisted its European allies in a grand strategic struggle against a European power, more recently, it has sought to enlist European allies in extra-European struggles of different types. Thinking about the role of Europe in US grand strategy now requires new theoretical and empirical tools that allow for the recognition of this very fact. Accordingly, this book proposes that strategic ideas on the viability of international cooperation held within the White House crucially shape what – if any -- type of support the United States seeks from Europe on the global stage. In doing so, the book adds important nuance to other accounts proclaiming either the proverbial death of the transatlantic relationship or the eternal and unchanging nature thereof. This book will be of much interest to students of European security, US foreign policy, and International Relations.

argumentative strategies book: *Just Prospering? Plato and the Sophistic Debate about Justice* Merrick Anderson, 2024 *Just Prospering?* explores an important debate about the value of justice in Ancient Greece. Anderson begins with an analysis of the 5th Century BCE sophists and their novel philosophical debates about justice, before turning to Plato's Republic which, he argues, cannot be understood without attending to the sophistic dialogue.

argumentative strategies book: *Argument Tactics* Xena Mindhurst, AI, 2025-01-31 *Argument Tactics* presents a groundbreaking approach to understanding and mastering the art of argumentation by uniquely combining psychological insights with philosophical principles. This comprehensive guide explores the intricate relationship between logical construction and psychological dynamics, demonstrating how effective arguments rely on both rational structure and understanding human cognitive processes. The book progresses systematically through three main sections, beginning with the fundamental architecture of arguments, including premises, conclusions, and inferential relationships. It then delves into the psychological elements of argumentation, examining cognitive biases and decision-making patterns that influence how people process and respond to different forms of reasoning. The final section bridges theory with practice through real-world case studies from law, business negotiation, and academic discourse. What sets this work apart is its evidence-based methodology, drawing from cognitive science, formal logic, and communication studies to create a practical framework for argument construction. Rather than simply focusing on traditional debate techniques, it teaches readers how to recognize and counter logical fallacies while understanding the psychological factors that influence persuasion. This balanced approach makes it particularly valuable for professionals in fields requiring strong analytical skills and students developing their critical thinking abilities, offering both theoretical understanding and practical application strategies.

argumentative strategies book: *Communication Strategies for Engaging Climate Skeptics* Emma Frances Bloomfield, 2019-05-10 *Communication Strategies for Engaging Climate Skeptics* examines the intersection of climate skepticism and Christianity and proposes strategies for engaging climate skeptics in productive conversations. Despite the scientifically established threats of climate change, there remains a segment of the American population that is skeptical of the scientific consensus on climate change and the urgent need for action. One of the most important stakeholders and conversants in environmental conversations is the religious community. While existing studies have discussed environmentalism as a factor within the religious community, this book positions religion as an important factor in environmentalism and focuses on how identities play a role in environmental conversation. Rather than thinking of religious skeptics as a single unified group, Emma Frances Bloomfield argues that it is essential to recognize there are different types of skeptics so that we can better tailor our communication strategies to engage with them on issues of the environment and climate change. To do so, this work breaks skeptics down into three main types: separators, bargainers, and harmonizers. The book questions monolithic understandings of climate skepticism and considers how competing narratives such as religion, economics, and politics play a large role in climate communication. Considering recent political moves to remove climate change from official records and withdraw from international environmental agreements, it is imperative now more than ever to offer practical solutions to academics, practitioners, and the public to change the conversation. To address these concerns, this book provides both a theoretical examination of the rhetoric of religious climate skeptics and concrete strategies for engaging the religious community in conversations about the environment. This book will be of great interest to students, scholars, and practitioners of climate change science, environmental communication, environmental policy, and religion.

argumentative strategies book: Image and Argument in Plato's Republic Marina McCoy, 2020-08-01 Although Plato has long been known as a critic of imagination and its limits, Marina Berzins McCoy explores the extent to which images also play an important, positive role in Plato's philosophical argumentation. She begins by examining the poetic educational context in which Plato is writing and then moves on to the main lines of argument and how they depend upon a variety of uses of the imagination, including paradigms, analogies, models, and myths. McCoy takes up the paradoxical nature of such key metaphysical images as the divided line and cave: on the one hand, the cave and divided line explicitly state problems with images and the visible realm. On the other hand, they are themselves images designed to draw the reader to greater intellectual understanding. The author gives a perspectival reading, arguing that the human being is always situated in between the transcendence of being and the limits of human perspective. Images can enhance our capacity to see intellectually as well as to reimagine ourselves vis-à-vis the timeless and eternal. Engaging with a wide range of continental, dramatic, and Anglo-American scholarship on images in Plato, McCoy examines the treatment of comedy, degenerate regimes, the nature of mimesis, the myth of Er, and the nature of Platonic dialogue itself.

argumentative strategies book: *Praxis - Handeln und Handelnde in antiker Philosophie* Friedemann Buddensiek, Sebastian Odzuck, 2022-12-19 Die antike Philosophie bietet eine differenzierte Diskussion zu akteurs- und handlungstheoretischen Fragen. Die deutschen und

englischen Beiträge des Bandes geben einen Einblick in die Reichhaltigkeit dieser Diskussion vom 5. Jahrhundert vor unserer Zeit bis zur Spätantike mit einem Schwerpunkt auf Aristoteles. Diskutiert werden zum einen Fragen zu den rationalen und arationalen seelischen Faktoren, die antiken Philosophen zufolge dem Handeln zugrunde liegen. Diskutiert werden zum anderen Fragen zum Verhältnis von Handelnden, Handlungen und Handlungszielen. Zwei antike Überlegungen werden hier besonders in den Blick genommen: Handlungen sind Ausdruck dessen, was sich den Handelnden in ihrer seelischen Verfasstheit als zu erstrebendes Gut darstellt. Zugleich gibt es objektive Maßstäbe für das Gut-Sein des Ziels und die Angemessenheit der Mittel, die es für ethisch richtiges Handeln auch angesichts von Unwägbarkeiten der Handlungsumstände richtig zu erfassen gilt. Diskutiert werden schließlich Fragen zur handlungsrelevanten Rationalität und zum Handeln in der Gemeinschaft. Die Band leistet einen Beitrag zur anhaltenden Forschungsdiskussion zu handlungs- und akteurstheoretischen Fragen in der antiken Philosophie.
