aron beauregard books: The Scientific American Book of Love, Sex and the Brain Judith Horstman, Scientific American, 2011-11-15 Who do we love? Who loves us? And why? Is love really a mystery, or can neuroscience offer some answers to these age-old questions? In her third enthralling book about the brain, Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love-from the bonding of parent and child to the passion of erotic love, the affectionate love of companionship, the role of animals in our lives, and the love of God. Drawing on the latest neuroscience, she explores why and how we are born to love-how we're hardwired to crave the companionship of others, and how very badly things can go without love. Among the findings: parental love makes our brain bigger, sex and orgasm make it healthier, social isolation makes it miserable-and although the craving for romantic love can be

described as an addiction, friendship may actually be the most important loving relationship of your life. Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines, The Scientific American Book of Love, Sex, and the Brain offers a fascinating look at how the brain controls our loving relationships, most intimate moments, and our deep and basic need for connection.

aron beauregard books: Monsters in the Mills Christa Carmen, L.E. Daniels, 2024-07-08 DEEP IN THE WEEDS, THEY WAIT. Behind graffitied fences or obscured by woods, the abandoned mills of New England watch...for thrillists and historians, urbexers and developers, or just the average passer-by. Omnipresent and looming, the mills lure the innocent to their mysteries, secrets...and terrors. The We are Providence writers hunt what lurks among the crumbled bricks and strangling sumac. A widower on a demolition crew wakes the revenants. A musician rents a foundry's rehearsal space...and otherworldly tenants practice on him. A lonely girl combs the ruins to find an unsettling friend. A bitter punk moves into a refinery where her best friend vanishes. A criminal breaks into a cloth factory to discover a sentient—and sinister—machine. These sixteen terrifying tales and two poems suggest when abandoned mills beckon, it's best to ignore them. After all, they've come to collect their due.
