Rodwell, 1977 Presents a survey of churches in the Diocese of Chelmsford, particularly in the Archdeaconry of Colchester, designed to illuminate the problems and potentials of church archaeology - the study of the whole historic fabric and environment of ecclesiastical buildings. The survey reveals in detail for the first time the very serious extent of the numerous destructive agencies at work on our churches, graveyards, monuments, furnishings and fittings; it is urged that this destruction be drastically reduced and that proper provision for recording the evidence be made where destruction cannot be avoided. Case studies are presented and a gazetteer of the 220 parish churches and church sites in the Archdeaconry of Colchester follows.

arcade unblocked 76: *The Liability of Internet Intermediaries* Jaani Riordan, 2016 Internet intermediaries play a central role in modern commerce and the dissemination of ideas. Although their economic and social importance is well-recognized, their legal liability remains poorly understood, and, until now, no work has specifically addressed their legal responsibility for wrongdoing carried out by third parties using their facilities or platforms. This work fills that gap by providing comprehensive coverage of the legal duties owed by intermediaries and the increasingly complex schemes that regulate their activities. The first part of the work introduces the concept of an internet intermediary, general doctrines of primary and secondary liability, and the European

enforcement regime. The second part examines the liability of intermediaries in specific areas of law, with a detailed analysis of the applicable liability rules, and the major English case law, and decisions of the Court of Justice that interpret and apply them. The final part of the work provides guidance on remedies and limitations. Written by an expert author from the intellectual property chambers at 8 New Square, Lincoln's Inn, this is an essential guide for lawyers advising on IP matters and disputes involving internet content.
