ap government textbook pdf: American Media and the Memory of World War II Debra Ramsay, 2015-02-11 For three generations of Americans, World War II has been a touchstone for the understanding of conflict and of America's role in global affairs. But if World War II helped shape the perception of war for Americans, American media in turn shape the understanding and memory of World War II. Concentrating on key popular films, television series, and digital games from the last two decades, this book explores the critical influence World War II continues to exert on a generation of Americans born over thirty years after the conflict ended. It explains how the war was configured in the media of the wartime generation and how it came to be repurposed by their progeny, the Baby Boomers. In doing so, it identifies the framework underpinning the mediation of World War II memory in the current generation's media and develops a model that provides insight into the strategies of representation that shape the American perspective of war in general.

ap government textbook pdf: *Serving Library Users from Asia* John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.
