aristotle investments book pdf: The Decision-Making Process of Investor-State Arbitration Tribunals Mary Mitsi, 2018-12-28 In the course of a single investor-state dispute, an arbitrator may make numerous decisions, from interpreting the treaty or national laws to taking into account case law, customs and policies. In practice, this process raises important issues regarding the consistency of decisions and the predictability and legitimacy of the decision-making process in general. Investment arbitration tribunals have developed a specialised process of legal decision making adapted to the interpretational needs that arise in the context of an investor-state dispute and to the transnational characteristics of the investment arbitration framework. This is the first book to offer an in-depth analysis of the transnational characteristics of investment arbitration and to analyse the interpretive arguments of investment tribunals and the way they use treaties, precedent, policies, general principles of law and customary law in their decision-making process. Drawing on publicly available arbitral case law supplemented with personal interviews with investment arbitrators, the author touches on such concepts and practices as the following: - an overview of various decision-making genres of arbitral tribunals: attitudinal, economic, strategic and legal; - the legal argumentation triptych of language-rhetoric-dialogue; - the specific language arbitrators have developed when interpreting the law; - how arbitrators use the concepts 'standards', 'rules', 'principles' and 'rights'; - the importance of the legal reasoning of arbitral awards and the role of rhetoric therein; - concepts of 'acceptability', 'audience' and 'legitimacy'; - limitations of the public international law interpretive methodology enshrined in the Vienna Convention; - interpretation of precedents, customary law, general principles of law and policies; - the way national and international legal orders interact in the context of interpretation; and - how decision-making is connected to the issues of predictability, consistency and the rule of law. The core of the book proposes a novel, full- edged dialogical network theory for analysing the interpretation process. As an exemplary demonstration of developing theory to keep up with practice, this unique book provides a deeply engaged means for enhancing the practice of international arbitration. Its introduction of a new field of interdisciplinary analysis employing legal argumentation theories is sure to provide inestimable guidance for institutions and policymakers, especially in light of recent proposals for the creation of a permanent investment arbitration court.

Given that unveiling the legal decision-making process is critical for the well-being of the whole dispute resolution procedure, and that being aware of how arbitrators interpret the law can constitute a roadmap for counsel's arguments and approaches when dealing with cross-border disputes, the topic of this book is relevant for both academics and practitioners, and its significance can only grow as recourse to investor-state arbitration continues to expand.

aristotle investments book pdf: *Islam: Religion of Peace?* Mario Alexis Portella, 2018-09-25 Eight hundred years ago, St. Francis of Assisi embarked on a mission to the port city of Damietta, Egypt, to try and convert Sultan al-Kamil to Christianity. While this did not come to fruition, both the sultan and the saint were able to have a peaceful dialogue and establish a mutual respect that is absent from the present-day polemics of Islam. While many today hold that those who seek to create a universal caliphate through acts of terror in the name of Islam falsely represent their religion, they ignore the original Islamic texts that inspire these perpetrators. The Islamization of our society, however, does not just come from avowed terrorists but from various Islamic scholars and activists seeking to impose sharia law. As a result of the West disavowing its Greco-Roman and Judeo-Christian roots, government officials have catered to such injustices since they consider the petrodollar more valuable than the victims of violence. Consequently, they have capitulated our rights of free speech and religion to the point of classifying anyone who questions Islamists' intentions as an Islamophobe. *Islam: Religion of Peace?* places Islam in its historical and sociopolitical contexts in order to better understand what has bred the Islamic threat facing today's society, as well as how many of our political and church leaders have failed to address the problem, thereby creating more instability between both Muslims and non-Muslims. Author Mario Alexis Portella also proposes solutions whereby both peoples may enter into a meaningful discourse and establish harmony.

aristotle investments book pdf: *Retail Depositor and Retail Investor Protection under EU Law* Constantinos Tokatlides, 2017-02-10 *Retail Depositor and Retail Investor Protection under EU Law* offers an original perspective on EU financial law in the area of retail investor protection, examining the status of protection awarded by EU law to retail depositors and retail investors in the event of financial institution failure. The analysis of relevant EU law is on the basis of effectiveness and has been elaborated in two levels of comparison. The first comparative approach examines relevant EU law both externally and internally: externally, vis-à-vis relevant international initiatives and developments in the area of financial law, as the latter affect the features and evolution of EU law, and internally by examining relevant instruments of EU law with regard to each other as to their normative structure and content. The second comparative approach also examines the status of retail depositors in relation to that of retail investors under EU law, in the event of financial institution failure, and the relevant legal consequences thereof.

aristotle investments book pdf: *Investing in the Age of Democracy* Morten Arisson, 2018-09-06 This book offers a structured, deductive approach to Austrian investing, beginning with an analysis of the current investing paradigm. There are five economic concepts on which the Austrian School of Economics has a unique view: Entrepreneurship, Class Probability, Capital, the Interest Rate, and Institutions. This book explains, lesson by lesson, how each of these shapes our thinking about investing. If we follow them through their logical consequences, they leave us with a unique approach to investing. Except for the theory of probability, there has not been a comprehensive analysis of the linkages between these concepts, when it comes to investing. Although they would have been obvious to the average investor before the age of democracy, since the French and American revolutions, government interventions have steadily transformed the way we think about them (and the way we invest). Above all, Entrepreneurship and Institutions are downplayed today, while investors use Case Probability, and confuse the concepts of Money and Capital. This book offers a historical review of these interventions, to shed light on how we went from what was common sense to the status quo. Offering a sometimes technical analysis, the book examines a series of fundamental investment fallacies, their origins and how not to fall for them.

aristotle investments book pdf: International Tax Aspects of Sovereign Wealth Investors Richard Snoeij, 2018-04-18 An increasing number of States have entered the market looking to invest resources in foreign assets. This emergence of States acting as investors, managing the wealth of a nation and competing in the marketplace with private investors, has attracted growing and wide attention. This book is the first in-depth analysis of the international tax aspects of sovereign wealth investors, and serves as a comprehensive guide to designing tax policy, from a source State perspective, toward inbound sovereign wealth investment. Drawing on a wide range of relevant sources, including international instruments, domestic tax legislation, administrative practice, (international) case law and the writings of highly qualified publicists, the author fully addresses the following aspects of the subject: – the definition, functions, legal form, governance, home State tax status, etc. of sovereign wealth investors; – tax policy considerations and objectives (i.e., neutrality, equity and international attractiveness) from a source State perspective vis-à-vis foreign sovereign wealth investors; and – the potential impact of the sovereign immunity principle, bilateral tax treaties and European (Union) law on source States' ability to achieve these tax policy objectives in relation to foreign sovereign wealth investors. The conceptual framework developed by the author will greatly assist source States in introducing new tax policy or in evaluating or reconsidering their existing tax policy vis-à-vis foreign sovereign wealth investors. In addition, practitioners, academics and (home States of) sovereign wealth investors will welcome this first authoritative analysis of an important but insufficiently understood subject in international tax.

aristotle investments book pdf: *The Oxford Handbook of Sovereign Wealth Funds* Douglas J. Cumming, Geoffrey Wood, Igor Filatotchev, Juliane Reinecke, 2017-10-12 Sovereign Wealth Funds (SWFs) represent both an increasingly important - and potentially dominant - category of alternative investor, and a novel form for governments to project their interests both home and abroad. As such, they represent both economic actors and embody power vested in the financial and diplomatic resources they can leverage. Although at times they have acted in concert with other alternative investors, their intergenerational savings function should, in theory at least, promote more long-termist thinking. However, they may be impelled in towards greater short termism, in response to popular pressures, demands from predatory elites and/or unforeseen external shocks. Of all the categories of alternative investment, SWFs perhaps embody the most contradictory pressures, making for diverse and complex outcomes. The aim of this volume is to consolidate the present state of the art, and advance the field through new applied, conceptual and theoretical insights. The volume is ordered into chapters that explore thematic issues and country studies, incorporating novel insights in on the most recent developments in the SWF ecosystem. This handbook is organized into four sections and 23 chapters. The four sections are: Governance of SWFs, Political

and Legal Aspects of SWFs, Investment Choices and Structures of SWFs, Country and Regional Analyses of SWFs.

aristotle investments book pdf: The Fair and Equitable Treatment (FET) Standard in International Investment Arbitration Rumana Islam, 2018-09-18 This book presents comprehensive information on a range of issues in connection with the Fair and Equitable Treatment (FET) standard, with a particular focus on arbitral awards against host developing countries, thereby contributing to the available literature in this area of international investment law. It examines in detail the interpretation of the FET standard of key arbitral awards affecting host developing countries, demonstrating the full range of interpretation approaches adopted by the current investment tribunals. At the same time, the book offers valuable practical guidance for counsels/scholars representing host developing countries in investment arbitration, where balancing the competing interests of the foreign investors and the host developing countries in investment disputes poses a complex challenge. The book puts forward the pressing need for a re-conceptualized interpretation of the FET standard in tune with the developmental issues and challenges faced by host developing countries, recognizing these countries' particular perspectives as an important and relevant aspect of investment disputes (often ignored by the current investment tribunals), while continuing to ensure reasonable protections for foreign investors and therefore serving the needs of the system as whole. The findings presented here will greatly benefit host developing countries engaged in investment arbitration. In addition, the book offers an insightful guide for all researchers whose work involves investment law and investment arbitration issues.

aristotle investments book pdf: *The Politics of Virtue* John Milbank, Adrian Pabst, 2016-08-22 Contemporary politics is dominated by a liberal creed that champions 'negative liberty' and individual happiness. This creed undergirds positions on both the right and the left - free-market capitalism, state bureaucracy and individualism in social life. The triumph of liberalism has had the effect of subordinating human association and the common good to narrow self-interest and short-term utility. By contrast, post-liberalism promotes individual fulfilment and mutual flourishing based on shared goals that have more substantive content than the formal abstractions of liberal law and contract, and yet are also adaptable to different cultural and local traditions. In this important book, John Milbank and Adrian Pabst apply this analysis to the economy, politics, culture, and international affairs. In each case, having diagnosed the crisis of liberalism, they propose post-liberal alternatives, notably new concepts and fresh policy ideas. They demonstrate that, amid the current crisis, post-liberalism is a programme that could define a new politics of virtue and the common good.

It lays out a new path to resolve global energy geopolitical tensions grounded in a shared sense of belonging within the global energy commons.
