The Origins and Historical Context of Chicana Feminism

The development of chicana feminism text is deeply rooted in the social and political movements of the 1960s and 1970s, particularly within the broader Chicano civil rights movement. During this era, Chicana women began to articulate their own distinct feminist perspectives, which diverged from mainstream Anglo-American feminism by emphasizing cultural identity and community solidarity. The historical context of chicana feminism text includes the struggle for labor rights, educational access, and political representation, as well as resistance against sexism within the Chicano movement itself. These early texts laid the foundation for a feminist discourse that recognizes the dual oppression of race and gender experienced by Chicana women.

The Chicano Movement and Gender Politics

Chicana feminism text emerged as a response to the male-dominated Chicano movement, which often marginalized women's experiences and concerns. chicana feminism text: *Globalization and the Decolonial Option* Walter D. Mignolo, Arturo Escobar, 2013-10-18 This is the first book in English profiling the work of a research collective that evolved around the notion of coloniality, understood as the hidden agenda and the darker side of modernity and whose members are based in South America and the United States. The project called for an understanding of modernity not from modernity itself but from its darker side, coloniality, and proposes the de-colonization of knowledge as an epistemological restitution with political and ethical implications. Epistemic decolonization, or de-coloniality, becomes the horizon to imagine and act toward global futures in which the notion of a political enemy is replaced by intercultural communication and towards an-other rationality that puts life first and that places institutions at its service, rather than the other way around. The volume is profoundly inter- and trans-disciplinary, with authors writing from many intellectual, transdisciplinary, and institutional spaces. This book was published as a special issue of *Cultural Studies*.

chicana feminism text: *Separate Roads to Feminism* Benita Roth, 2004 This examines the emergence of feminist movements from the Civil Rights/Black Liberation movement, the Chicano movement, and the white left in the 1960s and 1970s. The author argues that the 'second wave' was

comprised of feminisms: organizationally distinct movements that influenced each other in complex ways. The making of second wave feminisms resulted from decisions that feminists made about their political choices given constraints that affected their activism. These constraints were placed on them by structural inequalities that militated against unity among feminists from different racial/ethnic communities; by loyalties that feminists, particularly feminists of color, felt to other members of their movement communities; and by the necessity of making political decisions within a competitive and complex extra-institutional oppositional milieu.

chicana feminism text: Reading Spiritualities Dawn Llewellyn, 2016-04-01 The phenomenon of 'sacred text' has undergone radical deconstruction in recent times, reflecting how religion has broken out of its traditional definitions and practices, and how current literary theories have influenced texts inside the religious domain and beyond. *Reading Spiritualities* presents both commentary and vivid examples of this evolution, engaging with a variety of reading practices that work with traditional texts and those that extend the notion of 'text' itself. The contributors draw on a range of textual sites such as an interview, Caribbean literature, drama and jazz, women's writings, emerging church blogs, Neopagan websites, the reading practices of Buddhist nuns, empirical studies on the reading experiences of Gujarati, Christian and post-Christian women, Chicana short stories, the mosque, cinema, modern art and literature. These examples open up understandings of where and how 'sacred texts' are emerging and being reassessed within contemporary religious and spiritual contexts; and make room for readings where the spiritual resides not only in the textual, but in other unexpected places. *Reading Spiritualities* includes contributions from Graham Holderness, Ursula King, Michael N. Jagessar, David Jasper, Anthony G. Reddie, Michèle Roberts, and Heather Walton to reflect and encourage the interdisciplinary study of sacred text in the broad arena of the arts and social sciences. It offers a unique and well-focused 'snapshot' of the textual constructions and representations of the sacred within the contemporary religious climate - accessible to the general reader, as well as more specialist interests of students and researchers working in the crossover fields of religious, theological, cultural and literary studies.

chicana feminism text: Chicano Studies Michael Soldatenko, 2012-11-01 Chicano Studies is a comparatively new academic discipline. Unlike well-established fields of study that long ago codified their canons and curricula, the departments of Chicano Studies that exist today on U.S. college and university campuses are less than four decades old. In this edifying and frequently eye-opening book, a career member of the discipline examines its foundations and early years. Based on an extraordinary range of sources and cognizant of infighting and the importance of personalities, Chicano Studies is the first history of the discipline. What are the assumptions, models, theories, and practices of the academic discipline now known as Chicano Studies? Like most scholars working in the field, Michael Soldatenko didn't know the answers to these questions even though he had been teaching for many years. Intensely curious, he set out to find the answers, and this book is the result of his labors. Here readers will discover how the discipline came into existence in the late 1960s and how it matured during the next fifteen years—from an often confrontational protest of dissatisfied Chicana/o college students into a univocal scholarly voice (or so it appears to outsiders). Part intellectual history, part social criticism, and part personal meditation, Chicano Studies attempts to make sense of the collision (and occasional wreckage) of politics, culture, scholarship, ideology, and philosophy that created a new academic discipline. Along

the way, it identifies a remarkable cast of scholars and administrators who added considerable zest to the drama.
