**children s cat literature: Children and Yiddish Literature From Early Modernity to Post-Modernity** Gennady Estraiikh, Kerstin Hoge, Krutikov Mikhail, 2016-05-20 Children have occupied a prominent place in Yiddish literature since early modern times, but children's literature as a genre has its beginnings in the early 20th century. Its emergence reflected the desire of Jewish intellectuals to introduce modern forms of education, and promote ideological agendas, both in Eastern Europe and in immigrant communities elsewhere. Before the Second World War, a number of publishing houses and periodicals in Europe and the Americas specialized in stories, novels and poems for various age groups. Prominent authors such as Yankev Glatshiteyn, Der Nister, Joseph Opatoshu, Leyb Kvitko, made original contributions to the genre, while artists, such as Marc Chagall, El Lissitzky and Yisakhar Ber Rybak, also took an active part. In the Soviet Union, meanwhile, children's literature provided an opportunity to escape strong ideological pressure. Yiddish children's literature is still being produced today, both for secular and strongly Orthodox communities. This volume is a pioneering collective study not only of children's literature but of the role played by children in literature.

**children s cat literature: Lying, Truth-telling, and Storytelling in Children's and Young Adult Literature** Anita Tarr, 2023-12-20 Even though we instruct our children not to lie, the truth is that lying is a fundamental part of children's development—socially, cognitively, emotionally, morally. Lying can sometimes be more compassionate than telling the truth, even more ethical. Reading specific children's books can instruct child readers how to be guided by an etiquette of lying, to know when to tell the truth and when to lie. Equally important, these stories can help prevent them from being prey to those liars who are intent on taking advantage of them. Becoming a critical reader requires that one learn how to lie judiciously as well as to see through others' lies. When humans first began to speak, we began to lie. When we began to lie, we started telling stories. This is the paradox, that in order to tell truthful stories, we must be good liars. Novels about child-artists showcased here illustrate how the protagonist embraces this paradox, accepting the stigma that a writer is a liar who tells the truth. Emily Dickinson's phrase "tell it slant" best expresses the vision of how writers for children and young adults negotiate the conundrum of both

protecting child readers and teaching them to protect themselves. This volume explores the pervasiveness of lying as well as the necessity for lying in our society; the origins of lying as connected to language acquisition; the realization that storytelling is both lying and truth-telling; and the negotiations child-artists must process in order to grasp the paradox that to become storytellers they must become expert liars and lie-detectors.

**children s cat literature:** *The Early Reader in Children's Literature and Culture* Jennifer Miskec, Annette Wannamaker, 2015-12-22 This is the first volume to consider the popular literary category of Early Readers - books written and designed for children who are just beginning to read independently. It argues that Early Readers deserve more scholarly attention and careful thought because they are, for many younger readers, their first opportunity to engage with a work of literature on their own, to feel a sense of mastery over a text, and to experience pleasure from the act of reading independently. Using interdisciplinary approaches that draw upon and synthesize research being done in education, child psychology, sociology, cultural studies, and children's literature, the volume visits Early Readers from a variety of angles: as teaching tools; as cultural artifacts that shape cultural and individual subjectivity; as mass produced products sold to a niche market of parents, educators, and young children; and as aesthetic objects, works of literature and art with specific conventions. Examining the reasons such books are so popular with young readers, as well as the reasons that some adults challenge and censor them, the volume considers the ways Early Readers contribute to the construction of younger children as readers, thinkers, consumers, and as gendered, raced, classed subjects. It also addresses children's texts that have been translated and sold around the globe, examining them as part of an increasingly transnational children's media culture that may add to or supplant regional, ethnic, and national children's literatures and cultures. While this collection focuses mostly on books written in English and often aimed at children living in the US, it is important to acknowledge that these Early Readers are a major US cultural export, influencing the reading habits and development of children across the globe.

**children s cat literature:** **Risk in Children's Adventure Literature** Elly McCausland, 2024-05-31 Risk in Children's Adventure Literature examines the way in which adults discuss the reading and entertainment habits of children, and with it the assumption that adventure is a timeless and stable constant whose meaning and value is self-evident. A closer enquiry into British and

American adventure texts for children over the past 150 years reveals a host of complexities occluded by the term, and the ways in which adults invoke adventure as a means of attempting to get to grips with the nebulous figure of 'the child'. Writing about adventure also necessitates writing about risk, and this book argues that adults have historically used adventure to conceptualise the relationship between children and risk: the risks children themselves pose to society; the risks that threaten their development; and how they can be trained to manage risk in socially normative and desirable ways. Tracing this tendency back to its development and consolidation in Victorian imperial romance, and forward through various adventure texts and media to the present day, this book probes and investigates the truisms and assumptions that underlie our generalisations about children's love for adventure, and how they have evolved since the mid-nineteenth century.

**children s cat literature: Storying Plants in Australian Children's and Young Adult Literature** Melanie Duckworth, Annika Herb, 2023-10-04 *Storying Plants in Australian Children's and Young Adult Literature: Roots and Winged Seeds* explores cultural and historical aspects of the representation of plants in Australian children's and young adult literature, encompassing colonial, postcolonial, and Indigenous perspectives. While plants tend to be backgrounded as of less narrative interest than animals and humans, this book, in conversation with the field of critical plant studies, approaches them as living beings worthy of attention. Australia is home to over 20,000 species of native plants - from pungent Eucalypts to twisting mangroves, from tiny orchids to spiky, silvery spinifex. Indigenous Australians have lived with, relied upon, and cultivated these plants for many thousands of years. When European explorers and colonists first invaded Australia, unfamiliar species of plants captured their imagination. Vulnerable to bushfires, climate change, and introduced species, plants continue to occupy fraught but vital places in Australian ecologies, texts, and cultures. Discussing writers from Ambelin Kwaymullina and Aunty Joy Murphy to May Gibbs and Ethel Turner, and embracing transnational perspectives from Ukraine, Poland, and Aotearoa New Zealand, *Storying Plants* addresses the stories told about plants but also the stories that plants themselves tell, engaging with the wide-ranging significance of plants in Australian children's and Young Adult literature.
