Understanding Cadet Hazing Incidents

Cadet hazing incidents refer to a range of abusive, humiliating, or dangerous acts inflicted upon new recruits or trainees by their peers or superiors. These incidents typically occur in military academies, police training centers, and other uniformed service institutions. Hazing is often rationalized as a way to "toughen up" cadets, foster group cohesion, or maintain traditions. However, cadet hazing can lead to serious physical injuries, psychological trauma, and, in extreme cases, fatalities. The prevalence and severity of these incidents have prompted widespread scrutiny and demands for reform.

cadet hazing incidents: *Cadets on Campus* John A. Coulter, 2017-03-24 Since the founding of the United States Military Academy at West Point in 1802, more than eight hundred military schools have existed in this country. The vast majority have closed their doors, been absorbed into other educational institutions, or otherwise faded away, but others soldier on, adapting to changing times and changing educational needs. While many individual institutions have had their histories written or their stories told, to date no single book has attempted to explore the full scope of the military school in American history. *Cadets on Campus* is the first book to cover the origin, history, and culture of the nation's military schools—secondary and collegiate—and this breadth of coverage will appeal to historians and alumni alike. Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education, including Sylvanus Thayer, the “father of West Point,” and Alden Partridge, the founder of the school later known as Norwich University, the first private military school in the country. He also reveals that military schools were present across the nation, despite the conventional wisdom that most military schools, and, indeed, the culture that surrounds them, were limited to the South. Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century.

cadet hazing incidents: *The Third Reich's Elite Schools* Helen Roche, 2021 *The Third Reich's Elite Schools* tells the story of the Napolas, Nazi Germany's most prominent training academies for the future elite. This deeply researched study gives an in-depth account of everyday life at the schools, while also shedding fresh light on the political, social, and cultural history of the Nazi dictatorship.

cadet hazing incidents: *Women at War* Rosemarie Skaine, 2015-11-16 The Persian Gulf War changed the face of combat. It brought women's military roles into the spotlight, in large part via the mass media, and showed that many women performed combat roles similar to those of men during the conflict. The war was thus an impetus for changes in laws that had prevented women from serving in combat assignments. In past centuries, because it was not culturally acceptable for women to serve in combat, surprising numbers joined secretly under assumed male names. After defining exactly what is meant by “war” and “combat,” this work presents historical and present-day

views of the involvement of women in the military. The impact of regulations on women in combat is analyzed, as is the role of the American public in the controversy. Female combat is put into context with sociological theory; also discussed are readiness, cohesion, ability, sexuality, equal opportunity and family issues.

cadet hazing incidents: Admirals of the New Steel Navy James C Bradford, 2013-01-15 This collection of interpretive, biographical essays on the admirals of the new steel navy continues the story of the development of the American naval begun so successfully in *Command Under Sail* and *Captains of the Old Steam Navy*. During the period of 1880 to 1930, the U.S. Navy underwent a significant transformation as it adapted to new technologies and grew to meet the responsibilities thrust upon it by America's new role as a world power. This book offers readers an entertaining yet informative history that allows amateur and professionals alike to better appreciate the U.S. Navy's dramatic period of development and adjustment.

cadet hazing incidents: RAF Wings over Florida Will Largent, 2020-08-01 From 1941 through 1945, British cadets in the Royal Air Force trained in the United States through the Lend-Lease Act, President Roosevelt's ingenious plan to help beleaguered Great Britain while maintaining the semblance of neutrality. This book tells the saga of two Florida training fields during this turbulent time. In their own words, British pilots tell of their Florida experiences. Many of them still in their late teens, away from home for the first time, pale and thin from years of rationing, these young men encountered immense challenges and overwhelming generosity during their training in Florida. Now retired, these former pilots still smell the scent of orange blossoms when they glance through the log books they kept while flying their Stearmans and Harvards over Florida citrus groves. They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress.

cadet hazing incidents: Harsh Country, Hard Times Janet Williams Pollard, Louis Gwin, 2011-09-01 Clayton Wheat Williams—West Texas oilman, rancher, civic leader, veteran of the Great War, and avocational historian—was a risk taker, who both reflected and molded the history of his region. His life spanned a dynamic period in Texas history when automobiles replaced horse-drawn wagons, electricity replaced steam power in the oilfields, and barren and virtually worthless ranch land became valuable for the oil and gas under its surface. The setting for Williams's story, like that of his father before him, is Fort Stockton in the rugged Trans-Pecos region of Texas. As a youngster accompanying his father on surveying trips through the land, and subsequently as a cadet at Texas A&M, he developed a toughness that served him well in France and Flanders. His letters home provide an unusually nuanced picture of what life was like for an American officer in Europe during the Great War. After the war, he returned home, where he taught himself petroleum geology—so effectively that he picked the site of what would become in 1928 the deepest producing oil well in the world. With his brother, he mapped the structure of what later became the Fort Stockton oil and gas field, and he went on to hammer out a successful career in the boom and bust cycles of the West Texas oil industry. On the civic front, Williams served for fourteen years as a Pecos County commissioner, and he held offices in a number of social and civic organizations. Imbued with a deep love for the history of his region, he wrote (with the editorial help of historian Ernest Wallace at Texas Tech University) *Texas' Last Frontier: Fort Stockton and the Trans-Pecos, 1861-1895*, published by Texas A&M University Press in 1982. Nonetheless, by some of his neighbors he may be best remembered for his role in drying up the town's famous Comanche Springs by pumping water feeding the spring's aquifer to irrigate his and others' farms west of town. Williams left behind a treasure trove of letters, personal papers and writings, and interviews with his family, helping document in rich detail the history of an unforgiving land as well as what life was like during a pivotal period of American history. These materials, which form the core of the present manuscript, reveal a life that made a difference in the economy and history of the region and the nation at large.

cadet hazing incidents: MacArthur and West Point Sherman L. Fleek, 2024-09-02 Few figures loom larger in the story of the United States Military Academy at West Point—or in US military history in general—than Douglas MacArthur. In this wide-ranging book, acclaimed military historian Sherman L. Fleek explores the mutual influence between the United States Military Academy and General of the Army Douglas MacArthur. More than a simple narration of MacArthur's time at the academy—both as a cadet and as superintendent—this book examines how MacArthur and the institution that he regarded as a second home shaped each of them, along with the subsequent impacts both entities had on history and the conduct of the US military. Perhaps the preeminent figure among the handful of those who have guided and changed the direction of the academy at West Point and the “long gray line” of those who have passed through its halls, MacArthur frequently referred to the institution in letters, speeches, official documents, and personal contacts throughout his lifetime. Although MacArthur was only in residence at the military academy for seven years, in many ways he has never been absent from West Point, nor was the academy ever absent from the man. In *MacArthur and West Point*, Fleek offers readers a new perspective on the truly reciprocal nature of the longstanding relationship between one of the US military's most significant historical figures and one of its most venerated institutions.

cadet hazing incidents: Race, Politics, and Reconstruction Rory McGovern, Ronald G. Machoian, 2024-10-11 The first in-depth study of racial integration at West Point after the Civil War

Race, Politics, and Reconstruction tells the story of racial integration at the United States Military Academy after the Civil War and spotlights the social environment and cultural currents that led to its failure. The first attempt to racially integrate West Point proved not simply a lost opportunity but an opportunity sabotaged with shocking degrees of forethought and deliberation. By investigating West Point's experience with race from varied and nuanced perspectives, including those of the first Black cadets, the US Army officer corps, white cadets, the Academy's faculty and staff, and the Black and white American publics, the contributors to this volume cast both the promise and the failure of integration at West Point as an illuminating microcosm of Reconstruction itself.

cadet hazing incidents: Torture and the Military Profession J. Wolfendale, 2007-10-04
Wolfendale argues that the prevalence of military torture is linked to military training methods that cultivate the psychological dispositions connected to crimes of obedience. While these methods are used, the military has no credible claim to professional status.

cadet hazing incidents: Carved from Granite Lance Betros, 2012-04-23 The United States Military Academy at West Point is one of America's oldest and most revered institutions. Founded in 1802, its first and only mission is to prepare young men—and, since 1976, young women—to be leaders of character for service as commissioned officers in the United States Army. West Point's success in accomplishing that mission has secured its reputation as the foremost leadership-development institution in the world. An Academy promotional poster says it this way: "At West Point, much of the history we teach was made by people we taught." Carved from Granite is the story of how West Point goes about producing military leaders of character. An opening chapter on the Academy's nineteenth-century history provides context for the topic of each subsequent chapter. As scholar and Academy graduate Lance Betros shows, West Point's early history is interesting and colorful, but its history since then is far more relevant to the issues—and problems—that face the Academy today. Drawing from oral histories, archival sources, and his own experiences as a cadet and, later, a faculty member, Betros describes and assesses how well West Point has accomplished its mission. And, while West Point is an impressive institution in many ways, Betros does not hesitate to expose problems and challenge long-held assumptions. In a concluding chapter that is both subjective and interpretive, the author offers his prescriptions for improving the institution, focusing particularly on the areas of governance, admissions, and intercollegiate athletics. Photographs, tables, charts, and other graphics aid the clarity of the discussion and lend visual and historical interest. Carved from Granite: West Point since 1902 is the most authoritative history of the modern United States Military Academy written to date. There will be lively debate over some of the observations made in this book, but if they are followed, the author asserts that the Academy will emerge stronger and better able to accomplish its vital mission in the new century and beyond.
