cinema studies ebook: Between Film, Video, and the Digital Jihoon Kim, 2016-07-14

Encompassing experimental film and video, essay film, gallery-based installation art, and digital art, Jihoon Kim establishes the concept of hybrid moving images as an array of impure images shaped by the encounters and negotiations between different media, while also using it to explore various theoretical issues, such as stillness and movement, indexicality, abstraction, materiality, afterlives of the celluloid cinema, archive, memory, apparatus, and the concept of medium as such. Grounding its study in interdisciplinary framework of film studies, media studies, and contemporary art criticism, *Between Film, Video, and the Digital* offers a fresh insight on the post-media conditions of film and video under the pervasive influences of digital technologies, as well as on the crucial roles of media hybridity in the creative processes of giving birth to the emerging forms of the moving image. cinema studies ebook: Cinema in the Digital Age Nicholas Rombes, 2017-12-19

Have digital technologies transformed cinema into a new art, or do they simply replicate and mimic analogue, film-based cinema? Newly revised and expanded to take the latest developments into account,

Cinema in the Digital Age examines the fate of cinema in the wake of the digital revolution. Nicholas Rombes considers *Festen* (1998), *The Blair Witch Project* (1999), *Timecode* (2000), *Russian Ark* (2002), and *The Ring* (2002), among others. Haunted by their analogue pasts, these films are interested not in digital purity but rather in imperfection and mistakes—blurry or pixilated images, shaky camera work, and other elements that remind viewers of the human behind the camera. With a new introduction and new material, this updated edition takes a fresh look at the historical and contemporary state of digital cinema. It pays special attention to the ways in which nostalgia for the look and feel of analogue disrupts the aesthetics of the digital image, as well as how recent films such as *The Social Network* (2010) and *The Girl with the Dragon Tattoo* (2011)—both shot digitally—have disguised and erased their digital foundations. The book also explores new possibilities for writing about and theorizing film, such as randomization.

cinema studies ebook: *Doing Digital Film History* Sarah-Mai Dang, Tim van der Heijden, Christian Gosvig Olesen, 2024-12-30 How has the digital turn shaped the practices of film historical research and teaching? While computational approaches have been used by film historians since the 1960s and 1970s, the arrival and use of digital tools and methods in recent decades has fundamentally changed the ways we search, analyze, interpret, present, and so think and write about film history - from digital archival and curatorial practices, data-driven search, and analysis of film historical collections to the visualization and dissemination of film historical materials online. While film historians have increasingly embraced the new possibilities brought by digital technologies, their practical, epistemological, and methodological implications need further exploration. What opportunities does the digitization of film historical sources provide for film historians? What new questions can be raised by using digital methods? What new perspectives emerge from analyzing, interpreting, and visualizing film historical data at the levels of both “close” and “distant” - or “scalable” - reading and viewing? By focusing on the concepts, tools, and practices of digital film historiography, this edited volume aims to contribute to a better understanding and critical reflection on the changes and continuities of doing film history in the digital age.

cinema studies ebook: *Cinema Expanded* Jonathan Walley, 2020 Expanded cinema:

avant-garde moving image works that claim new territory for the cinematic, beyond the bounds of familiar filmmaking practices and the traditional theatrical exhibition space. First emerging in the 1960s amidst seismic shifts in the arts, multi-screen films, live cinematic performance, light art, kinetic art, video, and computer-generated imagery - all placed under expanded cinema's umbrella - re-emerged at the dawn of the 2000s, opening a vast new horizon of possibility for the moving image, and perhaps even heralding the end of cinema as we know it. *Cinema Expanded: Avant-Garde Film in the Age of Intermedia* offers a bold new account of its subject, breaking from previous

studies and from larger trends in film and art scholarship. Author Jonathan Walley argues that expanded cinema's apparent departure from the traditions and forms of cinema as we know it actually radically asserts cinema's nature and artistic autonomy. Walley also resituates expanded cinema within the context of avant-garde film history, linking it to a mode of filmmaking that has historically investigated and challenged the nature and limits of cinematic form. As an outgrowth of this tradition, expanded cinema offered a means for filmmakers within the avant-garde, regardless of their differing styles, formal concerns, and politics, to stake out cinema's unique aesthetic terrain - its ontology, its independence, its identity. In addition to reconsidering the better-known expanded cinema works of the 1960s and 70s by artists like Andy Warhol, Robert Whitman, and Nam June Paik, *Cinema Expanded* also provides the first scholarly accounts of scores of lesser-known works across more than 50 years. Making new arguments about avant-garde cinema in general and its complex meditations on the nature of cinema, it urgently addresses current and crucial debates about the fate of the moving image amidst a digital age of near-constant technological change.

cinema studies ebook: *Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age* Taskiran, Nurdan Oncel, 2019-11-29 The fast pace of technology in this day and age has made it difficult for individuals to stay informed without becoming lost in the folds of an information overload. Methods used to narrow down information are becoming just as important as providing the information to be discovered. The *Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age* is a pivotal reference source that provides vital research on the significance of being literate in the age of speed and technology. While highlighting topics such as e-advertising, mobile computing, and visual culture, this publication explores the major issues society has in the information age and the methods of innovative achievements of public or private institutions. This book is ideally designed for researchers, academicians, teachers, and business managers seeking current research on a variety of social sciences in terms of the digital age.

cinema studies ebook: *Deleuze, Digital Media and Thought* Timothy Deane-Freeman, 2024-05-31 Timothy Deane-Freeman traces Deleuze's remarks about the digital to reveal both their origins and implications. In so doing, we encounter a position which is fundamentally ambiguous. On the one hand, digital techniques are intimately related to what Deleuze calls 'societies of control', which deploy them in order to close down potential spaces of creativity and resistance. On the other, digital images take up the mantle of cinema, displacing habitual forms of cognition and forcing us to think in new ways. Deane-Freeman traces these dual impulses through the images of cinema, television and social media, as well as explicating key Deleuzian concepts, including virtuality, immanence and the outside.

cinema studies ebook: *Cinemas Dark and Slow in Digital India* Lalitha Gopalan, 2021-02-12 This book provides a sustained engagement with contemporary Indian feature films from outside the mainstream, including *Aaranaya Kaandam*, *I.D.*, *Kaul*, *Chauthi Koot*, *Cosmic Sex*, and *Gaali Beeja*, to undercut the dominance of Bollywood focused film studies. Gopalan assembles films from Bangalore, Chennai, Delhi, Kolkata, and Trivandrum, in addition to independent productions in Bombay cinema, as a way of privileging understudied works that deserve critical attention. The book uses close readings of films and a deep investigation of film style to draw attention to the advent of digital technologies while remaining fully cognizant of 'the digital' as a cryptic formulation for considering the sea change in the global circulation of film and finance. This dual focus on both the techno-material conditions of Indian cinema and the film narrative offers a fulsome picture of changing narratives and shifting genres and styles.

cinema studies ebook: *Global Cinema Studies in Landscape Allegory* David Melbye, 2024-08-19 *Global Cinema Studies in Landscape Allegory* explores the narrative and stylistic approaches to imbuing natural settings in audiovisual media with a psychological dimension - or, in other words, configuring a 'landscape' to function beyond its typical role as a backdrop - and the cultural contexts for this aesthetic impulse. Contributors argue that while audiovisual allegory can be understood as inherently avant-garde, certain kinds of stories - and the ways in which they are

presented – can be categorized as a ‘landscape allegory.’ Focusing on the idea of a ‘landscape’ in the most concrete and literal form, contributions drawing from a global spectrum of cultural contexts work toward establishing a fuller and more culturally diverse understanding of landscape allegory in cinema.

cinema studies ebook: Visualizing Film History Christian Gosvig Olesen, 2025-01-07 Though many archival digital objects were not born digital, film archives are now becoming important resources for digital scholarship as a consequence of digitization. Moreover, with advancements in digital research methods involving video annotation, visual analysis, and GIS affecting the way we look at archival films' material, stylistic histories and circulation, new research practices are more important than ever. Visualizing Film History is an accessible introduction to archive-based digital scholarship in film and media studies and beyond. With a combined focus on the history of film historiography, archiving, and recent digital scholarship—covering a period from the first wave of film archiving in the early 1900s to recent data art—this book proposes ways to work critically with digitized archives and research methods. Christian Olesen encourages a shift towards new critical practices in the field with an in-depth assessment of and critical approach to doing film historiography with the latest digital tools and digitized archives. Olesen argues that if students, scholars and archivists are to fully realize the potential of emerging digital tools and methodologies, they must critically consider the roles that data analysis, visualization, interfaces and procedural human-machinery interactions play in producing knowledge in current film historical research. If we fail to do so, we risk losing our ability to critically navigate and renew contemporary research practices and evaluate the results of digital scholarship.

cinema studies ebook: From Film Practice to Data Process Sarah Atkinson, 2017-12-20 Examines the practices of independent digital feature-filmmaking in contemporary Britain To what extent have digital innovations transformed the UK film industry? By focusing on the pivotal year of 2012, and by considering the input of every single contributor to the process, this book illuminates how this period of analogue to digital transition is impacting upon working practices, cultures, opportunities and structures in the industry, and examines the various causative forces behind their adoptions and resistances. With an in-depth case study of Sally Potter's 2012 film *Ginger & Rosa*, and drawing upon interviews with international film industry practitioners, *From Film Practice to Data Process* is a groundbreaking examination of film production in its totality, in a moment of profound change.
