Ali Awad, Chris Ha, Daniel Polotsky, Chi-Hung David Nguyen, Scott Ditrapani, Rachel Adams Lee, Craig Campbell, Will Cannon, Lyann Nguyen, Felix He, Anastasia Cortez, Sid Peddinti, Harry Tsang , Low Yiyiu , Jeff J Hunter, Josef Gotsch, Janelle Kao, Jane Zhao, Billy Guan, Sarah Obscura, Jeb Carty, Angela J Campos, Anthony Pusch, Freya Fox, Richard Qin, Ben Buckwalter, Frank Song, Jad Kantari, Caroline Crowder, Suzanne Soliman, Krista Nickols, Ligia Lugo, Tim Davis, Kirk Cooper, Royston G King, Ryan Chaffin, 2020-06-01 If someone is searching for you or your business, they will most likely search on Google first. That notion's already set up in how we use "google" as if it were its own verb. Every day consumers rely heavily on being able to find the product or service they need by typing for it in the Google search panel. If you or your business do not show up, then you might as well be invisible. If you are someone whose brand relies on their own name, then that is even worse. So how do you know you will appear in Google search? There are different results you could get. The first is your website link that could appear (if you are lucky) on page one of the search results. The other is a type of gray box that often has a picture with it and, if you are an individual, statistics such as your alma mater, birthday, height, date, weight, spouses, publications, etc. This type of result is called the Knowledge Panel. If you have got a local or personal brand, then you might be able to indirectly dictate what Google can show on that panel.

campbell biology textbook download: *Forging the Nation* SiuSue Mark, 2023-05-31 On February 1, 2021, Myanmar was thrown into a state of crisis by a military coup, abruptly ending a decade of civilian rule. The junta imprisoned the political opposition and deployed lethal force to quell dissent, thinking that most people would meekly acquiesce. However, they underestimated the tenacity of the nascent democracy that had taken root in the last decade. Instead, a civil disobedience movement quickly emerged, with people going on strike across the country to prevent the junta from exerting control, which was soon followed by armed struggle among urban youth. *Forging the Nation: Land Struggles in Myanmar's Transition Period* examines how democratic institutions were fought over and built from 2011 to 2020 through the lens of land politics. This book explains how the differences in outcomes in the contest over land are situated in the specific historic and political contexts of Myanmar's states and regions, despite them being subject to the same national dynamics. As Myanmar is an agriculture-based economy involving two-thirds of the population, land remains a coveted asset in the era of the "global land rush," referring to the intensification of capital's pursuit of land since the food price surges in 2008–2009. Thus, land is also the ideal lens through which to understand the dynamics of a country that underwent a three-part transition: toward democracy, toward peace with a national ceasefire, and toward open markets after the lifting of sanctions by the West. Against a fraught democratization process that unfolded from 2011 to 2020, *Forging the Nation* looks at how state and societal actors in Myanmar's multiethnic society, recovering from over seven decades of civil war, negotiated land politics to shape democratic land institutions. By exploring the interaction of the democratic transition, ethnic politics, and global capital pressures on land across national, regional, and local scales, SiuSue Mark provides an overarching frame pulling together these three facets that are usually treated separately in the literature. Emphasizing the co-constituent relationship between democratization and land politics, *Forging the Nation* makes a unique contribution to understanding the role of land in political-economic transitions. The views expressed in this book are solely those of the author and not necessarily those of any affiliated institution.
