However, suspicions about the alien presence on Bright Star, persisted. His actions later result in a trip to Earth to face execution. He saw many exciting discoveries in space on that journey. M-13, a moon orbiting a dead planet, recently discovered, was about to give up its secrets and unravel a mystery about the human race and an earlier journey into deep space; a debris field was orbiting this small moon and could be seen more clearly as it passed in front of the sun. Was this a result of a cataclysmic end to a space journey...
