civic education test guide pdf: *Education for Citizenship in Times of Global Challenge* Wolfram Schulz, John Ainley, Julian Fraillon, Bruno Losito, Gabriella Agrusti, Valeria Damiani, Tim Friedman, 2024-10-25 This open access book investigates the ways in which young people around the world are prepared to undertake their roles as citizens. It presents the international results from the third cycle of the study IEA's International Civic and Citizenship Education Study (ICCS 2022). Based on data from 24 countries or benchmarking participants from Europe, Latin America, and Asia, ICCS 2022 studies contexts for and learning outcomes of civic and citizenship education in a wide range of national contexts at the beginning of the third decade of the 21st Century. It responds to both enduring and emerging challenges of educating young people in a world where contexts of democracy and civic participation continue to change. The study addresses issues related to young people's engagement through digital technologies, migration and diversity, perceptions of the political system, global citizenship, and education for sustainable development. Further, it contains data that reflects civic-related aspects of recent developments such as students' perceptions of restrictions in response to national emergencies and their trust in scientists. Over the past 50 years, the IEA has conducted comparative research studies in a range of domains focusing on educational policies, practices, and outcomes in many countries around the world. Prior to ICCS 2022, the IEA had conducted four international comparative studies of civic and citizenship education, with a first survey implemented in 1971, a second in 1999, a third in 2009 and a fourth in 2016. ICCS 2022 data allows education systems to evaluate the strengths of educational policies, from a comparative perspective, and to measure progress in achieving critical social objectives of their educational policy agendas.

civic education test guide pdf: *Social Studies Education in East Asian Contexts* Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it. This is particularly important in East Asia where strong economic growth, long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts. This book, with its team of regional authors, shows how different societies in the region are dealing with these challenges and what can be expected from future citizens. The book will appeal to policy makers, researchers and teachers interested in the current state of social studies education in East Asian societies.

civic education test guide pdf: *Reliability and Validity of International Large-Scale Assessment* Hans Wagemaker, 2020-09-03 This open access book describes and reviews the development of the quality control mechanisms and methodologies associated with IEA's extensive program of educational research. A group of renowned international researchers, directly involved in the design and execution of IEA's international large-scale assessments (ILSAs), describe the operational and quality control procedures that are employed to address the challenges associated with providing high-quality, comparable data. Throughout the now considerable history of IEA's international large-scale assessments, establishing the quality of the data has been paramount. Research in the complex multinational context in which IEA studies operate imposes significant burdens and challenges in terms of the methodologies and technologies that have been developed to achieve the stated study goals. The demands of the twin imperatives of validity and reliability must be satisfied in the context of multiple and diverse cultures, languages, orthographies, educational structures, educational histories, and traditions. Readers will learn about IEA's approach to such challenges, and the methods used to ensure that the quality of the data provided to policymakers and researchers can be trusted. An often neglected area of investigation, namely the consequential validity of ILSAs, is also explored, examining issues related to reporting, dissemination, and impact, including discussion of the limits of interpretation. The final chapters address the question of the influence of ILSAs on policy and reform in education, including a case study from Singapore, a country known for its outstanding levels of achievement, but which nevertheless seeks the means of continual improvement, illustrating best practice use of ILSA data.

civic education test guide pdf: African Immersion Julius A. Amin, 2014-12-18 Based on previously unused primary sources including extensive interviews in Cameroon, personal journals, diaries, responses to questionnaires, and a variety of secondary sources, this study is a critical analysis of US study abroad programs in Africa. Using the University of Dayton Cameroon Immersion program as a case study, the work examines different aspects of experiential learning including selection, orientation, activities of US college students in Cameroon, post-immersion meetings, and impact of program. The nation of Cameroon and University of Dayton are uniquely ideal for the study as Cameroon is considered "Africa in miniature" and serves as a window to understanding many of Africa's political, economic, cultural, and social complexities. Located in the American Midwest, the University of Dayton, while unique, shares many similarities with other American universities. The study expands the boundaries of scholarship on study abroad. By comparing the impact of the African experience on students to that of Returned Peace Corps Volunteers who served in that continent, the study opens up avenues for comparative analyses. Africa is vital to the global community and, with its complex political, economic, cultural, and social systems, offers important lessons to understanding students' ability to adapt to change in a rapidly changing global environment.
