Major Historical Fashion Eras and Their Characteristics

Understanding the defining features of major fashion eras is critical when referencing clothing styles online. Each period is marked by distinct silhouettes, fabrics, colors, and cultural influences. Below are some of the most frequently researched clothing eras:

Victorian Era (1837-1901)

The Victorian era is known for its elaborate garments, corseted waists, and voluminous skirts. Women's fashion featured crinolines, bustles, and ornate detailing, while men's clothing emphasized tailored suits and formal wear. Accessories like gloves, hats, and parasols were common, reflecting the era's emphasis on modesty and refinement.

Edwardian Era (1901-1910)

Characterized by the "S-bend" silhouette, the Edwardian period introduced lighter fabrics, lace, and flowing lines. Women's dresses often had high collars and were adorned with intricate embroidery. Men's fashion began to shift towards more relaxed tailoring, with the lounge suit gaining popularity.

1920s - The Jazz Age

Flapper dresses, dropped waists, and Art Deco influences defined the 1920s. Women's fashion embraced bold, geometric designs and shorter hemlines, while men wore sleek suits and tuxedos. This era reflected social liberation and modernity.

1950s - Post-War Elegance

The 1950s witnessed a return to glamour with fitted bodices, full skirts, and luxurious fabrics. Iconic styles included poodle skirts, pencil dresses, and tailored menswear. Fashion icons like Audrey Hepburn and Marilyn Monroe influenced mainstream trends.

1970s - Bohemian and Disco

Understanding Fashion Scandals is the first book to explore this changing landscape of contemporary fashion through case studies showing how 'shock value' lost its currency. The book focuses on the changes since the late-1970s and early 1980s, when brands like Calvin Klein and Benetton first used controversy as a promotional tool to build their brand identity, to the contemporary industry where avoiding social media backlash is critical to survival. Analyzing the tactics brands including Burberry, Dior, Dolce & Gabbana and Prada adopt to avoid or mitigate scandals, Vänskä and Gurova map the fashion industry's journey towards cultural sustainability.

clothing era reference online: *Medieval Art and the Look of Silent Film* Lora Ann Sigler, 2019-06-20 The heyday of silent film soon became quaint with the arrival of talkies. As early as 1929, critics and historians were writing of the period as though it were the distant past. Much of the literature on the silent era focuses on its filmic art--ambiance and psychological depth, the splendor of the sets and costumes--yet overlooks the inspiration behind these. This book explores the Middle Ages as the prevailing influence on costume and set design in silent film and a force in fashion and architecture of the era. In the wake of World War I, designers overthrew the artifice of prewar style and manners and drew upon what seemed a nobler, purer age to create an ambiance that reflected higher ideals.

clothing era reference online: *Staging Fashion* Tiziana Ferrero-Regis, Marissa Lindquist, 2020-12-10 The fashion show and its spaces are sites of otherness, representing everything from rebellion and excess through to political and social activism. This conceptual and stylistic variety is reflected in the spaces they occupy, whether they are staged in an industrial warehouse, on a city street, or out in the open landscape. Staging Fashion is the first collection of essays about the presentation and staging of fashion in runway shows in the period from the 1960s to the 2010s. It offers a fresh perspective on the many collaborations between artists, architects and interior designers to reinforce their interdisciplinary links. The research and ideas underpinning Staging Fashion address how fashion and the spatial fields have collaborated in the creation of the space of the fashion show. The 15 essays are written by fashion, interior, architecture and design scholars focusing on the presentation of fashion within the runway space, from avant-garde practices and collaboration with artists, to the most spectacular and commercial shows of recent years, from Prada to Chanel.

clothing era reference online: *Retail Design* Ann Petermans, Anthony Kent, 2016-12-01 The late twentieth century saw rapid growth in consumption and the expansion of retailing and services. This was reflected in the number and type of stores and locations, from regional shopping malls and out-of-town superstores to concept and flagship stores. Retail design became an essential part of its success by creating distinctive brands and formats. However, the economic recession in the developed world and competition for consumer goods from the developing world has led to a re-assessment of the growth-led conventions of the retail industry. In addition, the rapid advance of e-commerce and online shopping has created new challenges for physical stores and the communication and distribution of retail brands. The book will provide students, researchers and practitioners a detailed assessment of retail design, taking a distinctive global approach to place design practice and theory in context. Chapters are devoted to key issues in the visual and structural contribution of design to retail brands and format development, and to the role of design in communication. In the course of the book, the authors engage with problems of convergence between retailing and other services and between the physical and virtual worlds, and also changing patterns of use, re-use and ownership of retail spaces and buildings. Retail Design concerns designers and organisations but also defines its broader contribution to society, culture and economy.

clothing era reference online: *Fashion, Dress and Post-postmodernism* José Blanco F., Andrew Reilly, 2021-01-28 Scholars have argued that postmodernism is dead and that we are entering into a new era that some have labelled altermodernism, digimodernism, performatism, and post-postmodernism. This book expands on the nascent scholarship of post-postmodernism to highlight how dress, fashion, and appearance are reflections of this new age. The volume starts with a discussion of fashion, subjectivity, and time and an analysis of temporality, technology, and fashion

in post-postmodern times. Later chapters analyse the work of design houses and mass producers such as Vetements, Gucci, and Uniqlo whose products align with post-postmodern aesthetics, hyperconsumption, and hypermodern branding. The book looks at diverse geographic and identity markers by discussing post-postmodernism and the religio-politico-cultural questions in South Asian Muslim fashion, image and identity presentation in queer social networking apps, and by exploring fashion designer Tom Ford's output as a movie director. Two chapters discuss the post-postmodern fashion exhibition with analyses of recent exhibitions and an in-depth look at the work of exhibition maker Judith Clark. The final chapter is written by members of The Rational Dress Society, a counter-fashion collective that makes JUMPSUIT, an experimental garment to replace all clothes. Fashion, Dress, and Post-postmodernism is a companion to research on relationships between post-postmodernism, fashion, and dress, and the go-to resource for researchers and students interested in these areas.
