**civics textbook pdf download:** *(Re)Constructing Memory: Textbooks, Identity, Nation, and State* James H. Williams, Wendy D. Bokhorst-Heng, 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts – some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about “who we are” not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.

**civics textbook pdf download:** *The Routledge Handbook of Religious Literacy, Pluralism, and Global Engagement* Chris Seiple, Dennis R. Hoover, 2021-12-27 This pioneering handbook proposes an approach to pluralism that is relational, principled, and non-relativistic, going beyond banal calls for mere tolerance. The growing religious diversity within societies around the world presents both challenges and opportunities. A degree of competition between deeply held religious/worldview perspectives is natural and inevitable, yet at the same time the world urgently needs engagement and partnership across lines of difference. None of the world's most pressing problems can be solved by any single actor, and as such it is not a question of if but when you partner with an individual or institution that does not think, act, or believe as you do. The authors argue that religious literacy—defined as a dynamic combination of competencies and skills, continuously refined through real-world cross-cultural engagement—is vital to building societies and states of neighborly solidarity and civic fairness. Through examination, reflection, and case studies across multiple faith traditions and professional fields, this handbook equips scholars and students, as well as policymakers and practitioners, to assess, analyze, and act collaboratively in a world of deep diversity. **civics textbook pdf download:** *Education in Troubled Times* Yahia Baiza, 2022-08-22 This volume presents a scholarly conversation about education in troubled times across different temporal and spatial contexts. The concept of troubled times in this book refers to situations of serious challenges or crises that affect the practice of education at community, national and global levels. It examines how education operates across a wide range of challenging circumstances, from the COVID-19 pandemic, political manipulations, and the neoliberal economy to conflict and post-conflict situations. The volume also considers the measures national governments should take to contain and mitigate their effects, and how effective these measures are in curbing such challenges. By addressing these questions, it also suggests ways to overcome the identified challenges and crises in their respective contexts.

**civics textbook pdf download:** *Self-Censorship in Contexts of Conflict* Daniel Bar-Tal, Rafi Nets-Zehngut, Keren Sharvit, 2017-10-30 This groundbreaking volume explores the concept of self-censorship as it relates to individuals and societies and functions as a barrier to peace. Defining self-censorship as the act of intentionally and voluntarily withholding information from others in the absence of formal obstacles, the volumes introduces self-censorship as one of the socio-psychological

mechanisms that prevent the free flow of information and thus obstruct proper functioning of democratic societies. Moreover it analyzes this socio-psychological phenomenon specifically in the context of intractable conflict, providing much evidence from the Israeli-Palestinian conflict. Moving from the micro to the macro level, the collected chapters put the individual as the focal unit of psychological analysis while embedding the individual in multiple levels of context including families, organizations, and societies. Following a firm conceptual explanation of self-censorship, a selection of both emerging and prominent scholars describe the ways in which self-censorship factors into families, organizations, education, academia, and other settings. Further chapters discuss self-censorship in military contexts, narratives of political violence, and the media. Finally, the volume concludes by looking at the ways in which harmful self-censorship in societies can be overcome, and explores the future of self-censorship research. In doing so, this volume solidifies self-censorship as an important phenomenon of social behavior with major individual and collective consequences, while stimulating exciting and significant new research possibilities in the social and behavioral sciences. Conceptually carving out a new area in peace psychology, *Self Censorship in Contexts of Peace and Conflict* will appeal to psychologists, sociologists, peace researchers, political scientists, practitioners, and all those with a wish to understand the personal and societal functioning of individuals in the real world.
