columbine survivor interview: The Martyrs of Columbine J. Watson, 2003-05-02 On April 20, 1999, Eric Harris and Dylan Klebold killed twelve fellow students and one teacher at Columbine High School in Littleton, Colorado. Two of the victims of the Columbine massacre, Cassie Bernall and Rachel Scott, reportedly were asked by the gunmen if they believed in God. Both supposedly answered 'Yes' and were killed. Within days of their death, Cassie and Rachel were being hailed as modern-day martyrs and are seen by many American evangelicals as the sparks of a religious revival among teenagers. Cassie and Rachel, as innocents martyred for faith, also became useful symbols for those seeking to advance a conservative political agenda and to lay the blame for Columbine at the feet of their liberal opponents. According to police investigators, however, Cassie and Rachel may never have been asked by their killers about God. They may have been simply victims of a senseless crime rather than martyrs to a cause. The Martyrs of Columbine provides a careful examination of the available evidence and attempts to discover what really occurred. Despite these questions the martyr-stories continued to be told and the religious and political use of Cassie and Rachel continues. The popular significance of the martyrs of Columbine persists, and may even be growing. How and why is this happening? The Martyrs of Columbine is a groundbreaking investigation of what this tragedy has come and will come to mean in American religion, politics, and culture.

columbine survivor interview: Legal and Ethical Issues of Live Streaming Shing-Ling S. Chen, Zhuojun Joyce Chen, Nicole Allaire, 2020-10-14 Legal and Ethical Issues of Live Streaming explores the potential legal and ethical issues of using live streaming technology, citing that although live streaming has a broadcasting capability, it is not regulated by the Federal Communications Commission, unlike other broadcasting media such as radio or television. Contributors provide a pathway to move forward with ethical and legal use of live streaming by analyzing the wide spectrum of critical issues through the lens of communication, ethics, and law. Scholars of legal studies, ethics, communication, and media studies will find this book particularly useful.

columbine survivor interview: A Profile of Jewish Believers in the UK Church Jonathan Allen,

2018-03-02 Given that mission agencies have been reporting for the last two hundred years or more the number of Jewish people coming to faith in Christ, this book asks the question: where are they and their descendants now? Using a multidisciplinary approach, covering social identity theory, social memory theory, and translation theory, this book constructs a profile of Jewish believers in the UK church based upon interviews carried out with church members and leaders who are Jewish or have experience working with Jewish believers. After examining both theory and data, the conclusion is that church is a hostile environment for Jewish identity. Unlike Chinese, Ghanaian, and Korean churches whose members are encouraged to retain their traditions as diaspora communities reaching out to their own people, the church has a strongly assimilationist policy toward Jewish believers, who are encouraged—even pressured—to forget their Jewish traditions, customs, and practices in favor of blending into Gentile church and disappearing. Jewish believers are at best an oxymoron; at worst, an anathema, not to be trusted or tolerated unless—as in the days of the early church from the third century onwards—they renounce their previous lives, families, and communities.

columbine survivor interview: *The Fictional Dimension of the School Shooting Discourse* Silke Braselmann, 2019-06-17 Ever since the 1990s, school shootings have shocked the public in their brutality, their suddenness, and their inexplicability. While film and literature have played a role in the heated debates about so-called copycat crimes, the growing body of fictionalizations of school shootings has been neglected thus far. However, in a discourse in which the boundaries between fiction and reality are increasingly blurred, this book shows how fiction shapes and structures, challenges and disrupts cultural processes of meaning-making. Hence, for a better understanding of the school shooting phenomenon, the relevance of fiction on all levels of discourse construction requires thorough analysis. This book therefore develops a new approach to the role of fiction for contemporary forms of excessive violence. By combining narrative theory with insights from sociology and other disciplines, it provides the means for apprehending and describing the relevance of fiction for contemporary discourses. Furthermore, it provides exemplary analyses of more specific functions of literary and filmic fictionalizations of school shootings between 2000 and 2016.

columbine survivor interview: Rhetorical Pain Tiara Good, 2024-10-17 This book provides close-textual analysis of traditional and mediated, popular memorials that tackle some of the most significant sources of pain in United States. In doing so, Tiara K. Good argues that pain is highly rhetorical and functions to form collectives and instigate change. This book also demonstrates how popular media texts, such as Nia DaCosta's 2021 *Candyman* and Hulu's original 2021 series *Dopesick*, hold enormous potential to be effective memorials by virtue of their accessibility and quality of being unbounded by space and place. Tiara K. Good analyzes how each memorial rhetorically operates to demand witness and craft witnesses into people whom can make change. Scholars of rhetoric, public memory, and communication will find this book of particular interest.

columbine survivor interview: North Pole Tenderfoot Doug Hall, 2010-06 Why would Doug Hall follow in Robert Peary's 1909 sled tracks to the North Pole, despite the grueling terrain and temperatures between 15 and 62 degrees below zero? His goal was to resurrect the spirit of Peary's journey in a world increasingly driven by instant gratification, short term business focus, and lack of sustained dedication to great causes. Peary succeeded where some 578 expeditions before him had failed. *North Pole Tenderfoot* is Doug's attempt to let the reader experience what is possible when one does what Peary did: think big.

columbine survivor interview: *School Violence* Dewey G. Cornell, 2017-09-29 Illustrated with numerous case studies—many drawn from the author’s work as a forensic psychologist—this book identifies 19 myths and misconceptions about youth violence, from ordinary bullying to rampage shootings. It covers controversial topics such as gun control and the effects of entertainment violence on children. The author demonstrates how fear of school violence has resulted in misguided, counterproductive educational policies and practices ranging from boot camps to zero tolerance. He reviews evidence from hundreds of controlled studies showing that school-based school violence prevention programs and mental health services, which are largely effective, are often overlooked in favor of politically popular yet ineffective programs such as school uniforms, Drug Abuse Resistance Education, and Scared Straight. He concludes by reviewing some of his own research on student threat assessment as a more flexible and less punitive alternative to zero tolerance, and presents a wide ranging series of recommendations for improving and expanding the use of school-based violence prevention programs and mental health services for troubled students. Key features include the following: Contrarian Approach—This book identifies and refutes 19 basic misconceptions about trends in youth violence and school safety, and shows how the fear of school violence has been exaggerated through inaccurate statistics, erroneous conclusions about youth violence, and over-emphasis on atypical, sensational cases. Readability—The book translates scientific, evidence-based research into language that educators, parents, law enforcement officers, and policymakers can readily understand and shows what can be done to improve things. Expertise—Dewey Cornell is a forensic psychologist and Professor of Education at the University of Virginia, where he holds an endowed chair in Education. He is Director of the UVA Youth Violence Project and is a faculty associate of the Institute of Law, Psychiatry, and Public Policy. The author of more than 100 publications in psychology and education, he frequently testifies in criminal proceedings and at legislative hearings involving violence prevention efforts. This book is appropriate for courses or seminars dealing wholly or partly with school violence and school safety. It is also an indispensable volume for school administrators and safety officers; local, state, and national policymakers; involved parents; and academic libraries serving these groups.

columbine survivor interview: School Shootings Nils Böckler, Thorsten Seeger, Peter Sitzer, Wilhelm Heitmeyer, 2012-12-13 School shootings are a topic of research in a variety of different disciplines—from psychology, to sociology to criminology, pedagogy, and public health—each with their own set of theories. Many of these theories are logically interconnected, while some differ widely and seem incompatible with each other, leading to divergent results about potential means of prevention. In this innovative work, leading researchers on the topic of school shootings introduce their findings and theoretical concepts in one combined systematic volume. The contributions to this work highlight both the complementary findings from different fields, as well as cases where they diverge or contradict each other. The work is divided into four main sections: an overview of current theoretical approaches and empirical models; application of these theories to international cases, including Columbine (USA), Emsdetten (Germany), and Tuusula (Finland); a critique of the influence of the media, both in the portrayals of past events and its effect on future events; and finally an overview of existing models for prevention and intervention, and measures of their success. The result is a comprehensive source for current research on school shootings, and will provide a direction for future research.
