community involvement opportunities: Opportunities and Challenges for Community Involvement in Public Service Provision in Rural Guatemala Johanna Speer, William F. Vásquez, 2013-03-11 The purpose of the research summarized in this paper is to provide policy-relevant knowledge on the governance of rural services in Guatemala and thus to contribute to improving the provision of services that are essential for agricultural and rural development. Almost 10 years ago, the Guatemalan government decided to strengthen decentralization and

community participation to improve the quality of public services, as well as access to these services for the poor, especially in rural areas. Based on quantitative and qualitative primary data, we examine how services are actually provided today and how community preferences and participation affect service provision in rural Guatemala. Our main finding is that the provision of formally decentralized services by local governments is incomplete. As a result, many rural communities continue to lack access to services, and some of them engage in supplying these services themselves. However, communities do not consider themselves to be more effective at service provision and would therefore prefer to be served by the government. Moreover, we find that community participation in the planning and evaluation of services has a positive impact on the responsiveness of the local government's service provision. However, the effectiveness of community participation varies greatly among the examined cases, with several participatory governance bodies not functioning properly due to low education levels, poverty, and weak civil-society organization.

community involvement opportunities: Corporate Community Involvement Nick Lakin, Veronica Scheubel, 2017-09-08 We need to do Community Involvement better - we know we're spending millions each year on charitable causes; how can we find out what is really effective and what people will appreciate us for? Who should we partner with? How can we make a real difference in society and help our business? Companies around the world are trying to answer these questions. Many are asking the same questions even as, collectively, they continue to spend billions on their communities. How do they know which activities are really worthwhile? Building on the authors' own extensive global experience at Nokia and E.ON, as well as the experience of many other experts in the field, this book offers the first-ever how to roadmap for managers on the comprehensive implementation of strategic Community Involvement inside their companies. It is designed to be practical, for those who want to act upon what they have read. It will fill a long-neglected niche as a day-to-day reference guide for practitioners. Corporate Community Involvement demonstrates what to do and how to do it. The advice is backed up by inspiring interviews with best-in-class practitioners from businesses such as Microsoft, GlaxoSmithKline, Ericsson, and Deutsche Bank and leading international Corporate Responsibility and Community Involvement experts. The book highlights proven best-practice approaches, effective methods, and concise tools to help managers get there faster and get it right first time. The core of the book is a step-by-step guide to developing and implementing a comprehensive and successful approach to Corporate Community Involvement. It shows how to: conduct a current state analysis and devise a strategy, organize staffing and budgets, integrate Corporate Community Involvement throughout the business and create high-profile programs, partner across sectors, measure and evaluate results, communicate successful activities, and overcome challenges. Corporate Community Involvement has an international perspective: the models and principles advocated are adaptable anywhere in the world. Also, it is designed to have as much relevance to a small or medium-sized enterprise as to a multinational. The book outlines the history and future of Corporate Community Involvement, explaining the business context and why companies need to manage their programs strategically. It also distinguishes between the growing lexicon of terminologies and provides clear definitions of terms such as philanthropy, sponsorship, Corporate Citizenship, Corporate Responsibility and Sustainability, advising when they are appropriate and how each can add value to corporate activities. This will be an indispensable resource for those working at the interface between business and the community. New or developing practitioners will learn from both the successes and failures of those before them. Representatives from other sectors, notably government, international agencies, NGOs, and academia, will come to understand companies' internal requirements for cross-sector collaboration programs in the community better. And students interested in this field will be better equipped to start careers.

community involvement opportunities: *Community Service-Learning* Rahima C. Wade, 1997-01-09 Service-learning, the integration of community service with academic course work, is a promising strategy for enhancing learning and developing active democratic citizens. This book responds to the many recent calls for youth involvement in service as part of the public school curriculum. While service-learning holds many benefits for students, teachers, and communities, there are also many challenges to effectively incorporate it into the curriculum. Each of the book's four parts provides a different scope and purpose. Part 1 addresses the components of quality service-learning programs; Part 2 introduces diverse models of service-learning programs at the elementary, middle, and high school levels; Part 3 allows students, agency members, and administrators to tell their own stories of service-learning involvement, to discuss issues with other individuals who share their roles, and to offer recommendations for effective action; and Part 4 asks readers to consider the future of service-learning in public schooling. Community Service-Learning is a comprehensive resource that will be valuable for all those involved with K-12 service-learning programs: administrators, classroom teachers, students, program coordinators, and university teacher education programs.

community involvement opportunities: *Place-Based Community Engagement in Higher Education* Erica K. Yamamura, Kent Koth, 2023-07-03 While an increasing number of universities have or are committed to engaging their campuses in their surrounding communities, many recognize they lack the strategic focus and resources to maximize and sustain their impact on those communities. Place-based community engagement provides a powerful way to creatively connect campus and community to foster positive social transformation. In developing community engagement strategies, most universities and community organizations face significant challenges in deciding who to partner with and why. Frequently this leads universities and community organizations to say "yes" to too many opportunities which significantly limit their ability to pursue long-term impact. Focusing on an established geographic area can make it much easier to decide where to deploy resources and which partnerships to prioritize and thus increase their ability to form strong and sustainable partnerships that are of greater value to all stakeholders. This book presents the emerging model of place-based community engagement as a powerful process for attaining more positive and enduring results in their local communities as well as stimulating wider

engagement by campus constituencies. Drawing upon the concept of collective impact and using data-driven decision making, place-based initiatives build long-term partnerships based upon a shared vision. Done thoughtfully, these place-based initiatives have attained impressive results. Drawing upon the case studies of five institutions that have implemented place-based community engagement initiatives, the authors provide guidance on the opportunities, challenges, and considerations involved in putting a place-based approach into effect. By sharing the experiences of these five institutions, they describe in detail the routes each took to turn their place-based initiatives from concept to reality, and the results they achieved.
