cvs employee portal: e-Government and Employment Services Maria Grazia Fugini, Piercarlo Maggiolini, Ramon Salvador Valles, 2014-12-27 This book explores the factors that affect the efficiency and effectiveness of electronic government (e-Government) by analyzing two employment-service systems in Italy and Catalonia: the Borsa Lavoro Lombardia Portal (Lombardy Employment Services Portal) and the Servei d'Ocupació de Catalunya (Catalan Employment Services Portal). The evaluation methodology used in the case studies and the related set of technical, social, and economic indicators are clearly described. The technological and organizational features of the systems of the two systems are then compared and their impacts assessed. In addition, the extent to which each system has been a driver of employment within its region and country is evaluated in relation to the impact of the industrial and commercial background. Readers will gain a deeper understanding of the main factors that might influence the effectiveness of e-Government and appreciate how the use of information and communication technology (ICT) may appear to improve the execution of government functions yet not achieve a true increase in effectiveness.

cvs employee portal: Effective Talent Management Mark Wilcox, 2016-06-10 Effective talent management is about aligning the business's approach to talent with the strategic aims and purpose of the organisation. The core rationale of any talent strategy should be to have a direct positive impact on the organisation's goals but in many cases this is not so. The ideas, principles and approaches outlined here will enable the reader to understand the strategic nature of talent and design a response that meets the needs of their own organisation. Case studies are used to illustrate the concepts and proven methodologies guide the day-to-day practice of the reader. The content will link the strategic intent of HR with the practical actions it takes to make a positive impact on the business's results. The author begins by examining the disconnected nature of talent management in many organisations; how at times it has been a response to trends and seen by many as a bolt on to HR and he proposes a different model, one that links clearly the development of a talent strategy with the achievement of a business strategy. Mark Wilcox summarises succinctly the case for a more strategic approach to talent management, one directly linked to business performance. He concludes that the time is now right for talent management, and therefore many HR managers, to move from a functional support role to one with a direct strategic impact on the business.

cvs employee portal: Government on the internet Great Britain: National Audit Office, 2007-07-13 This report examines the progress made by the Government, since 2002, in delivering services and information online. It examines three main areas: the quality of online provision; how it is organised and its cost; and future developments and strategy. The recommendations aim to help departments assess the costs and benefits of online provision, improve its quality, and encourage and assist citizens to use the services. Overall some £208 million is spent each year on website provision, with many positive signs of well used services but there is further potential for value for money gains. The planned transition to focus heavily on two supersites (Direct.gov.uk and businesslink.gov.uk) is an ambitious undertaking that would be the first of its kind in the world. It needs to be managed carefully.
