college accounting pdf download: Environmental Management Accounting for Cleaner Production Stefan Schaltegger, Martin Bennett, Roger L. Burritt, Christine M. Jasch, 2008-10-10 Sustainability requires companies to develop in an economically, environmentally and socially sustainable manner. Corporate sustainable development in turn requires movement towards cleaner production. In order to recognize the potential from cleaner production – reduced costs and fewer environmental impacts through the reduced use of materials – environmental management accounting (EMA) is a necessary information management tool. Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect, evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options. EMA is therefore the key for driving environmental progress, cost savings, increased competitiveness and corporate sustainability through the means of cleaner production.

college accounting pdf download: Public Policy, Governance and Polarization David K. Jesuit, Russell Alan Williams, 2017-07-06 Polarization is widely diagnosed as a major cause of the decline of evidence-based policy making and public engagement-based styles of policy making. It creates an environment where hardened partisan viewpoints on major policy questions are less amenable to negotiation, compromise or change. Polarization is not a temporary situation – it is the “new normal.” Public Policy, Governance and Polarization seeks to provide a theoretical foundation for scholars and policy makers who need to understand the powerful and often disruptive forces that

have arisen in Europe and North America over the past decade. Academics and practitioners need to better understand this growing trend and to find ways in which it may be managed so that policy solutions to these threats may be developed and implemented. Researchers and future policymakers in fields such as public administration, public management and public policy need to recognise how institutional design, corporatist interest group systems and different pedagogical approaches may help them understand, discuss and work beyond policy polarization. Edited by two leading political science scholars, this book aims to begin that process.

college accounting pdf download: Taxation of Derivatives and Cryptoassets Oktavia Weidmann, 2024-06-10 Derivatives stand at the forefront of financial innovation, continually evolving to accommodate new asset classes and risk categories. In the past decade, the growing popularity of cryptoassets and ESG investments has sparked the development of a variety of innovative investment strategies and risk management tools, including crypto and ESG derivatives and related structured products. This new edition has similarly evolved. Using illustrative examples, it provides a comprehensive analysis of the key tax issues associated with derivatives and cryptoassets in domestic and cross-border transactions and presents approaches that tax legislators could adopt to solve them. The new edition also comments on recent trends in global tax policy, such as the OECD Base Erosion and Profit Shifting (BEPS) 1.0 and 2.0 projects. Throughout the book, specific references are made to UK, German, and Swiss tax law. The updated edition addresses the following topics: economic and financial properties of derivatives and cryptoassets; definition of derivatives for tax purposes and its application to crypto derivatives and ESG derivatives, among others; accounting treatment of derivatives and cryptoassets under IFRS, UK, German and US GAAP; current tax legislation and policy alternatives to the taxation of derivatives and cryptoassets; characterisation of derivatives gains and losses as income or capital, and equity or debt; accounting and taxation treatment of hedging transactions involving derivatives or cryptoassets; accounting and taxation rules applying to structured products and hybrid instruments, including crypto and ESG-linked structured products; withholding taxes on derivatives and the concept of beneficial ownership in domestic and cross-border transactions; and anti-avoidance legislation applying to derivatives and cryptoassets, including the domestic law implementation of BEPS Action 2, the EU Anti-Tax Avoidance Directives (ATAD I and II), the tax transparency rules for cryptoassets (DAC8) and Pillar Two. This comprehensive book analyses recent developments in three intertwined areas of expertise: financial products, accounting and tax law. It will be a valuable resource to tax professionals in their daily practice of advising companies, banks and investment funds.
