cultural textile guide pdf: *Crafting Textiles in the Digital Age* Nithikul Nimkulrat, Faith Kane, Kerry Walton, 2016-09-08 In an era of increasingly available digital resources, many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies. Highly specialized craft/design practitioners may now elect to make use of digital processes in their work, but often choose not to abandon craft skills fundamental to their practice, and aim to balance the complex connection between craft and digital processes. The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands-on experimentation with material and digital technologies available in the present. Craft provides the foundations for thinking within the design and production of textiles, and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies. Within the framework of current challenges relating to sustainable development, globalization, and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner.

cultural textile guide pdf: Islamicate Textiles Faegheh Shirazi, 2023-04-06 Textiles and clothing are interwoven with Islamic culture. In Islamicate Textiles, readers are taken on a journey from Central Asia to Tanzania to uncover the central roles that textiles play within Muslim-majority communities. This thematically arranged book sheds light on the traditions, rituals and religious practices of these regions, and the ways in which each one incorporates materials and clothing. Drawing on examples including Iranian lion carpets and Arabic keffiyeh, Faegheh Shirazi frames these textiles and totemic items as important cultural signifiers that, together, form a dynamic and fascinating material culture. Like a developing language, this culture expands, bends and develops to suit the needs of new generations and groups across the world. The political significance of Islamicate textiles is also explored: Faegheh Shirazi's writing reveals the fraught relationship between the East – with its sought-after materials and much-valued textiles – and the European countries that purchased and repurposed these goods, and lays bare the historical and contemporary connections between textiles, colonialism, immigration and economics. Dr Shirazi also discusses gender and how textiles and clothing are intimately linked with sexuality and gender identity.

cultural textile guide pdf: Basic Condition Reporting Southeastern Registrars Association, Deborah Rose Van Horn, Corinne Midgett, Heather Culligan, 2022-02-05 Whether you call yourself a Registrar, Curator, Curator of Collections, Collections Manager or any number of other titles you are most likely doing condition reports. A good condition report is an accurate and informative account of an object's state of preservation at a particular moment in time. Condition reports can have multiple functions such as recording the state of an object prior to an exhibition or loan, after exhibition or loan, to assist in collections planning, or as a tool for the treatment of an object. Most of these functions can be conducted by a registrar, curator, collections manager, or volunteer. A good condition report fills many critical needs including: Knowing the exact condition of an object before or after a loan Helping staff determine the stability of an object for exhibit or loan Limiting how often an object is handled Informing object handlers of unseen problems Showing the condition of an object over time to determine the rate of deterioration Setting priorities for conservation Assisting the staff in identifying similar objects Aiding in the valuation of an object for insurance purposes The fifth edition of Basic Condition Reporting: A Handbook proffers a standard vocabulary for all of the individuals in a museum that may be conducting condition reports. In an ideal world, everyone who does a condition report for an item would be trained in the exact same

standards, use the same terminology, and use the exact same form, etc. However, the reality is that even if every registrar, collections manager, and curator in your institution does condition reports, each report will be slightly different. Then you throw in every intern, volunteer, or student that may assist and you will find a variety of methods and terminologies that appear. This volume provides a baseline that all of these people can work from so that any person who opens the condition report can understand what the problems on a particular piece include. Basic Condition Reporting, Fifth Edition is a great resource for learning the basics of doing condition reports for museum objects. The book looks at different material types and helps new and seasoned professionals identify condition issues for a variety of materials. This new addition has several new chapters including information on digital condition reporting, wood objects, mixed media objects and taxidermy while expanding the information for existing chapters. This book is a great resource for those new to the museum field and a handy reference to collections professionals.
