**commercial legislation 17th pdf: The Integration of Driverless Vehicles in Commercial Carsharing Schemes in Germany: A Prefeasibility Study** Daniel Kowalski, 2014-02-01 With an increasing world population and a steadily rising share of people living in urban areas, traffic density is on the rise, and has become a major issue of urban agglomerations all over the world. These trends are accompanied by the process of the motorization of the individual - with negative effects on both, the society and the individual. While millions of people get injured and die in traffic accidents each year, congestion causes mental stress and economic inefficiencies. Different solutions seek to tackle the problem like strengthening of public transport or encouraging residents to walk or make use of bicycles. However, they have yet failed to combine, for example, individual mobility needs and infrastructural conditions. In order to contribute to the debate of possible solutions, this study investigates the combination of two emerging concepts, carsharing and driverless vehicles. Germany was chosen as the basis of this study for its strong position in the car industry.

**commercial legislation 17th pdf: Islamic Fintech** Sara Sánchez Fernández, 2021-03-29 The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of

departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia's economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering ('AML') in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.

**commercial legislation 17th pdf: *Multinational Enterprises and the Law*** Peter Muchlinski, 2021 *Multinational Enterprises and the Law* is the only comprehensive, contemporary, and interdisciplinary account of the techniques used to regulate multinational enterprises (MNEs) at the national, regional, and multilateral levels. In addition, it considers the effects of corporate self-regulation, and the impact of civil society and community groups upon the development of the legal order in this area. The book has been thoroughly revised and updated for this third edition, making it a definitive reference work for students, researchers, and practitioners of international economic law, business, corporate and commercial law, development studies, and international politics. Split into four parts, the book first deals with the conceptual basis for MNE regulation. It explains the growth of MNEs, their business and legal forms, and the relationship between them and the effects of a globalized economy and society, now increasingly challenged by recently revived nationalist economic policies, upon the evolution of regulatory agendas in the field. In addition, the limits of national and regional jurisdiction over MNE activities are considered, a question that arises throughout the specialized areas of regulation covered in the remainder of the book. Part II covers the main areas of economic regulation, including controls over, and the liberalization of, entry and establishment, tax, company and competition law and the impact of intellectual property rights on technology diffusion and transfer. A specialized chapter on the regulation of multinational banks in the wake of the global financial crisis is new to this edition. Part III introduces the social dimension of MNE regulation covering labour rights, human rights, and environmental issues. Finally, Part IV deals with the contribution of international investment law to MNE regulation and to the control of investment risks, covering the main provisions found in international investment agreements, their interpretation by international tribunals, the process of investor-state arbitration, and how concerns over these developments are leading to reform proposals.

**commercial legislation 17th pdf: *Studies and Essays on International and International Humanitarian Law*** Marco Tabili, 2024-05-21 The book compiles essential documents, case law, reports, and other resources on International Humanitarian Law (IHL) and international law. It provides students, educators, and professionals with a readily accessible, focused, and critically informed overview of the relevant regulations and their practical applications. Encompassing all facets of international law, it delves into contemporary issues such as cyber warfare, targeted attacks, occupation, detention, human rights in armed conflict, peacekeeping, neutrality, accountability, enforcement of standards, and reparations. This comprehensive resource serves as an invaluable tool for education, research, reference, and practical application, serving both as a standalone guide and a complement to specialized textbooks and references.

**commercial legislation 17th pdf: *Space Strategy and Military Doctrine*** Bert Chapman, 2025-07-24 Examining open access civilian and military space policy, strategy, and doctrine documents, this book highlights emerging trends and developments in military space strategy. Bert Chapman collects public documents from Australia, Canada, the European Union, NATO, the United

States, and the United Kingdom from 2017 onward to illustrate space's critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change, food security, personal and global communications, and the potential for expanded space exploration. In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space-based infrastructures of the U.S. and other countries and China's increasing space assertiveness and capabilities, it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments.

**commercial legislation 17th pdf: Handbook of Research on Franchising** Frank Hoy, Rozenn Perrigot, Andrew Terry, 2017-10-27 Franchising is one of the major engines of business expansion and job creation globally. The Handbook of Research on Franchising offers new insights into entrepreneurial behavior, organizational forms, regulation, internationalization, and other contemporary issues relating to this dynamic business strategy. The Handbook challenges both practitioners and scholars to give attention to the conclusions of scholarly research on this business model. Practitioners can benefit from the results of high quality scientific research, and scholars can find exciting opportunities for contributing to the body of knowledge of a subject that has not received sufficient attention in educational institutions.

**commercial legislation 17th pdf: Research Handbook on the Politics of Human Rights Law** Bård A. Andreassen, 2023-01-20 International human rights law is undoubtedly intertwined with politics, and so this Research Handbook explores and provokes reflection on how politics impacts human rights legislation and, conversely, how human rights law shapes politics and the functioning of the state. Bringing together leading international scholars in human rights law and politics, the Research Handbook provides theoretical reflections and empirical analyses across the areas of governance and policies and examines the implementation mechanisms of human rights law in national and international jurisdictions.

**commercial legislation 17th pdf: Greek Space Law** Anthi Koskina, Manolis Plionis, 2025-02-25 This book provides an overview of the Greek legislation applying to space activity under the responsibility of the Greek State, as in line with international space law. Greece is not an established space-faring country; however, it is showing particular dynamism, making the most of its participation in international and EU space endeavors. Indeed, along with outstanding achievements in space science Greece took legislative action both at the international and national levels (proposals at the UNCOPUOS; Greek space law; signing of the Artemis Accords). Hence, the time has come to refer to – and present aspects of – the Greek space legislation. After an introductory section, the book provides information first on the national laws providing for the Greek participation in international space systems and in EU activities, which could be regarded as being the initial steps of Greece in the context of space. Thereafter, the rules applying to Greek space activity per se are presented, focusing on the authorities competent to decide on space matters, then on the substantial law rules allowing for – and clarifying – the application of international space law to domestic space operations. This book presents an overall view and analysis of the Greek space legislation, adding valuable information to the existing bibliography. Included as an appendix is a scholarly translation of the 2017 Greek space law.

**commercial legislation 17th pdf: Justice Between Simplification and Formalism** Christoph Kern, 2007 A recent study in the field of comparative economics (or, more precisely, numerical comparative law) constructed an index of procedural formalism of dispute resolution for more than 100 countries and analyzed the relationship between procedural formalism and certain aspects of quality of the judicial systems. The study's results suggest a strong relationship between legal origins, formalism, and the quality of dispute resolution. Not surprisingly, the study closes with

a recommendation for reform. What makes this study so important is not only its findings, backed by an amount of data which seems to be a guarantee for the study's universal validity, but also the financial support of the World Bank - an indicator of the Bank's interest in these questions. Similar studies in the area of banking, securities, and corporate law have received much attention from the legal community. However, for the recent study on civil procedure, this is not the case. Christoph Kern provides a first critical approach to the study from the perspective of a legal scholar. He does not suggest a mere re-coding, but focuses on the methodology and the underlying legal questions. After an extensive discussion of the input to the study, the author turns to the way the study combines the data and, in particular, how it interprets the results. He concludes that the study leaves a mixed impression and that, therefore, doubts remain as to its results and interpretation.

**commercial legislation 17th pdf:** *Routledge Handbook on Transnational Commercial Law* Bruno Zeller, Camilla Baasch Andersen, 2025-02-21 This handbook, edited by Zeller and Andersen, is an indispensable contribution to the field of transnational commercial law. With an introduction by Sir Roy Goode, this book presents perspectives on legal issues of international sales transactions as perceived by world leading experts, exposing pragmatic and modern aspects of everything from drafting, to uniform laws, to dispute resolution. The book divides itself between fundamental knowledge of transnational commercial law (e.g. chapters on forum shopping, CISG, Cape Town Convention, etc.) and current and topical developments (e.g. chapters on blockchain, smart contracts, metaverse, digital assets, etc.). International or transnational trade during the past twenty years has become more and more important, outstripping domestic trade as a hallmark of economic success. Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries, so a translational element must always be considered as part of any choice of law. Addressing a global audience, as the instruments dealt with herein apply to many states in different regions, this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers.

**commercial legislation 17th pdf:** *Grenzüberschreitende Verbraucherverträge* Graf-Peter Calliess, 2006 English summary: E-commerce integrates the consumer into global markets. But who provides the necessary institutional framework for international contractual exchange? Graf-Peter Calliess analyzes in detail the current German legal regime for cross-border consumer contracts as well as recent reform projects in Europe and the United States. The results are devastating: the nation states are both unable and unwilling to guarantee legal certainty and fairness on the global market place. Within the broader context of the global governance debate, transnational legal regimes based on co-regulation of states, industry, and civil society are proposed as an alternative. The New Law Merchant as well as the Uniform Dispute Resolution Policy of ICANN are taken as blueprints for a global consumer protection regime, the establishment of which can be observed on the basis of codes of conduct, trustmark schemes, and online dispute resolution systems. German description: Welche Folgen hat die Europaisierung und Internationalisierung der Markte fur das Schuldvertragsrecht? Insbesondere die rasante Entwicklung des elektronischen Geschäftsverkehrs hat den Ruf nach einem Europaischen Vertragsrecht oder gar einem Weltprivatrecht wieder laut werden lassen. Am Beispiel des Verbrauchervertragsrechts fragt Graf-Peter Calliess nach dem Schicksal bisher vom Nationalstaat garantierter sozialer Schutzrechte in der Globalisierung. Im ersten Teil analysiert er das geltende deutsche, europaische und internationale Recht der grenzüberschreitenden Verbraucherverträge. Im zweiten Teil untersucht er Lösungsansätze für die neue Problemlage, dass nicht nur die internationale Kaufmannschaft, sondern auch unerfahrene Verbraucher direkten Zutritt zu den Weltmärkten haben. Er beleuchtet aktuelle Entwicklungen im internationalen Privat- und Zivilverfahrensrecht und kommt zu einem vernichtenden Ergebnis: die Nationalstaaten sind weder willens noch in der Lage, für Rechtssicherheit und Gerechtigkeit auf globalen Märkten zu sorgen. Der Autor fragt deshalb nach dem potentiellen Beitrag von privater Ordnung und zivilgesellschaftlicher Global Governance zur Entstehung einer Weltrechtsordnung. Ist Recht auch jenseits der Nationalstaaten denkbar? Am Beispiel der Lex Mercatoria und der ICANN UDRP werden Voraussetzungen, Funktionsweise und Legitimation nicht-staatlicher, transnationaler

Zivilregimes erläutert. Im dritten Teil wird schliesslich die Entwicklung eines transnationalen Verbrauchervertragsrechts für den elektronischen Weltmarktplatz nachgezeichnet.

**commercial legislation 17th pdf:** China's One Belt One Road Initiative and Private International Law Poomintr Sooksripaisarnkit, Sai Ramani Garimella, 2018-05-16 The concept of the One Belt One Road initiative (OBOR) was raised by the President of the People's Republic of China in October 2013. The OBOR comprises the 'Silk Road Economic Belt' and the '21st Century Maritime Silk Road', encompassing over 60 countries from Asia to Europe via Southeast Asia, South Asia, Central Asia, West Asia, and the Middle East. The overall objective of the OBOR is to encourage the economic prosperity of the countries along the Belt and Road and regional economic cooperation, encourage mutual learning between different civilizations, and promoting peace and development. However, countries along the Belt and Road routes of the OBOR project have diverse laws and legal systems. It is not difficult to envisage problems relating to harmonisation of laws and rules in trade between countries along the OBOR routes or otherwise. These problems can potentially cut through the core of the very objective of the OBOR itself. Integration in China's One Belt One Road Initiative explores possible challenges to the success of the OBOR arising from the situational interface of diversity of laws, with the focus primarily on issues associated with private international law. It shows the latest state of knowledge on the topic and will be of interest to researchers, academics, policymakers, and students interested in private international law issues pertaining to the OBOR routes as well as private international law in general, Asian studies, and the politics of international trade.

**commercial legislation 17th pdf:** *Legal Aspects of Privately Financed Infrastructure Projects (PFIPs) in China* Shuang Liang, 2020-08-01 This book discusses the reform and improvement of Chinese legislation on Privately Financed Infrastructure Projects (PFIPs), the goal being to help its implementation in China satisfy international standards. In this regard, current Chinese laws are found to be insufficient when it comes to reducing risks to PFIPs, due to certain shortcomings. Therefore, the corresponding legislation must be reformed and improved. The Legislative Guide and Model Provisions drafted by UNCITRAL are discussed as the international standards that can effectively guide this reform; other countries' laws on PFIPs provide supplementary reference material. Given the rapid rise in the use of PFIPs in China, this book offers a strong theoretical basis for improving Chinese legislation. It also provides general suggestions that can be applied to the reform of laws on PFIPs in any country.

**commercial legislation 17th pdf: Strategies of Financial Regulation** Junghoon Kim, 2020-12-03 This book analyses different strategies and their results in implementing financial regulation in terms of rule-making, public enforcement and private enforcement. The analysis is based on a comparative study of conduct of business regulation on mis-selling of financial instruments in the UK and South Korea. It extends into liquidity regulation in the banking sector and credit rating agency regulation. The book concludes that in rule-making, purposive rules are more effective for achieving regulatory goals with minimal undesirable results, but a rule-making system with purposive rules can only work on a foundation of trust among rule-makers, enforcers and the regulates, that with respect to public enforcement, the enforcement strategies should combine the compliance-oriented and deterrence-oriented approaches and be continuously adjusted based on close monitoring of the regulatory outcomes and that in private enforcement, regulation should be instituted as the minimum requirement in private law.

**commercial legislation 17th pdf: Liquid Legal** Kai Jacob, Dierk Schindler, Roger Strathausen, 2016-12-01 This book compels the legal profession to question its current identity and to aspire to become a strategic partner for corporate executives, clients and stakeholders, transforming legal into a function that creates incremental value. It provides a uniquely broad range of forward-looking perspectives from several different key-players in the legal industry: in-house legal, law firms, LPO's, legal tech, HR, associations and academia. This publication is a platform for leading legal professionals that offers a new perspective on the accelerating transformation in legal. Combining expert contributions with editorial insights, it argues that the new legal function will shift

from a paradigm of security to one of opportunity; that future corporate lawyers will no longer primarily be negotiators, litigators and administrators, but that instead they will be coaches, arbiters and intrapreneurs; that legal knowledge and data-based services will become a commodity; and that analytics and measurement will be key drivers of the future of the profession. A must-read for all legal professionals, this book sets the course for revitalizing the profession.
