college prep environmental pdf: The Alignment Premium Brian J Caldwell, 2018-11-01 It is time for a new narrative on schools in Australia. The Alignment Premium proposes its major features. Analysis of approaches in 13 countries, including most of the world's top-performers, provides 15 benchmarks against which Australia's performance is assessed. Findings include: Alignment among different levels of government may be commendable in some respects but there is much that is coercive, contrived, dysfunctional or illusory; While achieving a top-ten ranking will depend on what occurs in schools, attention should shift to how systems are adapting to support all schools to become as good as Australia's best; Lack of trust and inertia are serious constraints on efforts to transform Australia's schools. Programs for professional learning of teachers and school leaders are impressive when assessed against international benchmarks. These should be the top priority. Building on findings in The Autonomy Premium, the focus should be on professional autonomy. The challenge is to design a system in which all those who work in or for schools are fully professional. This challenge extends to early childhood and innovative approaches to polytechnic education. The Alignment Premium is essential reading for policymakers, school leaders and researchers who wish to write the new narrative.

college prep environmental pdf: Educating Science Teachers for Sustainability Susan K. Stratton, Rita Hagevik, Allan Feldman, Mark Bloom, 2015-06-18 This volume contains a unique compilation of research and reflections representing multiple vantage points stemming from different parts of the world that can help science educators and teacher educators in finding ways to meaningfully and purposefully embed sustainability into teaching and learning. It is a rich resource

for exploring and contextualizing sustainability-oriented science education. At this time we find ourselves in a situation in which the earth's ecological system is under significant strain as a result of human activity. In the developed world people are asking "How can we maintain our current standard of living?" while those in the developing world are asking "How can we increase the quality of our lives?" all while trying to do what is necessary to mitigate the environmental problems. This volume responds to these questions with a focus on educating for sustainability, including historical and philosophical analyses, and pedagogical and practical applications in the context of science teacher preparation. Included are many examples of ways to educate science teachers for sustainability from authors across the globe. This text argues that issues of sustainability are increasingly important to our natural world, built world, national and international economics and of course the political world. The ideas presented in the book provide examples for original, effective and necessary changes for envisioning educating science teachers for sustainability that will inform policy makers.

college prep environmental pdf: Empowering Teachers through Environmental and Sustainability Education Melissa Barnes, Deborah Moore, Sylvia Christine Almeida, 2021-05-23 Empowering Teachers through Environmental and Sustainability Education draws inspiration from an empirical study exploring early career teachers' attempts at enacting Environmental and Sustainability Education (ESE) in their everyday teaching practices. It showcases how a confluence of personal, professional and environmental identities supports implementation of ESE. Additionally, this book discusses key concepts and issues surrounding ESE and the ways in which teachers may claim agency and power to create change in their classroom practices. Drawing from theoretical perspectives, such as Bourdieu's 'thinking tools' habitus and capital, theories of identity, and Foucault's concept of power and knowledge relations, this book explores how teachers negotiate policies, curriculum and institutional norms to further theoretical and practical understanding of ESE. The use of personal narratives offers new insights into teachers' agency in creating localised yet powerful change through small and meaningful actions. The purpose of this book, therefore, is to explore ways in which meaningful change can be made in educational settings through these small agentive and yet empowering steps. This book reveals that teachers can enact agency and navigate the power structures that exist within educational settings in order to make ESE meaningful within their classrooms.

college prep environmental pdf: *Environmental and Sustainability Education in Teacher Education* Douglas D. Karrow, Maurice DiGiuseppe, 2020-01-01 This book was inspired by the inaugural National Roundtable on Environmental and Sustainability Education in Canadian Faculties of Education (Roundtable 2016), which took place June 14-16, 2016, at Trent University in Peterborough, Ontario. Roundtable 2016 brought together over seventy participants from across Canada, including educators, researchers, policy-makers, consultants, and community organizations. Over the course of three days, participants took part in keynote addresses, research colloquia, networking socials, and collaborative inquiry activities focused on Environmental Sustainability Education in Teacher Education (ESE-TE). Roundtable 2016 resulted in the publication of a National Action Plan containing action-oriented recommendations for enhancing ESE-TE, and a position statement titled "The Otonabee Declaration," where delegates articulated their views regarding environmental degradation, the critical need for enhancing ESE-TE, and, the role educators, children, youth, educational institutions, policy makers, and Indigenous communities play in enhancing ESE-TE in Canada. college prep environmental pdf: *Anti-Crisis Approach to the Provision of the Environmental Sustainability of Economy* Elena G. Popkova, Bruno S. Sergi, 2023-06-12 This book focuses on the notion of the environmental sustainability of the economy. The Sustainable Development Goals, formulated by the UN, led to the formation of a concept of the environmental sustainability of the economy. This concept implies the harmony of economy and environment, achieved due to the support for the SDGs in the economy. This book is original due to its reconsidering the environmental sustainability of the economy from the position of crises. The theoretical significance of the book consists in the development of an anti-crisis approach to the provision of the environmental sustainability of the economy: responsible nature use based on digital markets and smart governance. The proprietary approach allows for the comprehensive description of the potential of the leading technologies—artificial intelligence (AI), robots, the Internet of Things (IoT), and blockchain—to support—during their use in smart governance—crisis management of the environmental sustainability of economy. The book's practical significance is due to the description and detailed discussion of the modern international experience of responsible nature use given the

specifics of developed and developing countries. The anti-crisis approach to the provision of the environmental sustainability of the economy is based on digital markets: FinTech, EdTech, GovTech, AgroTech, and EnergyTech, the practice of which is described in the book with the help of multiple examples from the international experience and case studies. The book is aimed at scholars who study environmental economics. In this book, they find an innovative view of the environmental sustainability of the economy in its close connection with economic crises.

college prep environmental pdf: School's Choice Wagma Mommandi, Kevin Welner, 2021 Access issues are pivotal to almost all charter school tensions and debates. How well are these schools performing? Are they segregating and stratifying? Are they public and democratic? Are they fairly funded? Can apparent successes be scaled up? Answers to all these core questions hinge on how access to charter schools is shaped. This book describes the incentives and pressures on charter schools to restrict access and examines how charters navigate those pressures, explaining access-restricting practices in relation to the ecosystem within which charter schools are created. It also explains how charters have sometimes responded by resisting the pressures and sometimes by surrendering to them. The text presents analyses of 13 different types of practices around access, each of which shapes the school's enrollment. The authors conclude by offering recommendations for how states and authorizers can address access-related inequities that arise in the charter sector. School's Choice provides timely information on critical academic and policy issues that will come into play as charter school policy continues to evolve. Book Features: Examines how charter schools control who gains and retains access. Explores policies and practices that undermine equitable admission and encourage opportunity hoarding. Offers a set of policy recommendations at the state and federal level to address access-related issues.

college prep environmental pdf: *Yearning for Inclusive Growth and Development, Good Jobs and Sustainability* Luigi Paganetto, 2019-10-11 This book addresses topics and issues of high relevance to the widely shared desire to promote inclusive growth, sustainability, and innovation within a context of global governance. It is based on the XXXth Villa Mondragone International Economic Seminar, where leading experts met to discuss the latest research and thinking on different aspects of globalization, trade, inequalities, growth imbalances, green technologies, the labor market, and financial systems. The aim is to stimulate new responses and possible solutions to a variety of well-recognized problems, including low growth in real wages, stagnating productivity, and growing disparities in income. Some of these problems are especially evident in Europe, where austerity policies have failed to deliver adequate growth and investment. However, while a number of the contributions focus on aspects of particular importance to Europe, others look further afield, for example to the scope for innovation in Africa and to experiences with quantitative easing in Japan. The book will be of wide interest to academics, researchers, policy makers, and practitioners.

college prep environmental pdf: (Re)Storying Human/Earth Relationships in Environmental Education Kathryn Riley, 2023-06-21 This book is situated in the simultaneous thinking (theory) and doing (action) of posthumanist performativity and new materialist methodologies to bring forth a multitude of stories that demonstrate co-constituted and co-implicated worldmaking practices. It is written in response to the fact that our Earth is at a critical juncture. As atmospheric temperatures rise and cast unprecedented and wide-spread social and ecological crises across the planet, social and ecological injustices and threats cannot be separated from globalising, neoliberal, capitalist, and colonial discourses that proliferate through anthropocentric and humancentric logics. Manifesting in binary classifications that position the human as separate from the Earth, and dominant categories of the human in hierarchies of power, such logics homogenise and institutionalise the field of environmental education and result in an over-emphasis on instrumentalist, technicist, and mechanistic teaching and learning practices. Exploring the affects emerging within, and between, an assemblage comprising Researcher/Teacher/Environmental Education Worldings, this book seeks to understand how the researcher makes sense of herself with/in the broader ecologies of the world; collaborative processes with an elementary-school teacher in Saskatchewan, Canada, as actualised through four co-created and co-implemented multisensory researcher/teacher enactments (Mindful Walking, Mapping Worlds, Eco-art Installation, and Photographic Encounters); and how the researcher/teacher organises themselves with Land-based pedagogies, environmental education curriculum policy, and wider discourses of Western education. This book does not propose a better way of teaching and learning in environmental education. Rather, showing how difference between categories is relationally bound, this book offers a conceptual (re)storying of human/Earth relationships in environmental education for social and ecological justice in these times of the Anthropocene.

college prep environmental pdf: Continuing Assistance to the National Institutes of Health on Preparation of Additional Risk Assessments for the Boston University NEIDL, Phase 3 National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Continuing Assistance to the National Institutes of Health on Preparation of Additional Risk Assessments for the Boston University NEIDL, 2011-01-01 In 2003, the Boston University Medical Center (BUMC) was awarded a \$128 million grant from the National Institutes of Health (NIH) to build one of two national maximum-containment laboratory facilities for pathogen research. The National Emerging Infectious Diseases Laboratories (NEIDL) are meant to support the National Institute of Allergy and Infectious Diseases' biodefense research agenda, conducting research to develop new approaches to treating, preventing, and diagnosing a variety of bacterial and viral diseases. The facility includes a biosafety level 4 (BSL-4) containment laboratory housed in a 192,000 square foot building. Although the NEIDL BSL-4 laboratory accounts for only 13 percent of the building's total space, it has been the source of virtually all of the community concern surrounding this project. The location of the facility on Albany Street in Boston's South End, which is an environmental justice community, has been controversial, and there have been numerous public meetings over the plans for the facility as well as three legal actions challenging the project. Continuing Assistance to the National Institutes of Health on Preparation of Additional Risk Assessments for the Boston University NEIDL, Phase 3, the fifth in a series of reports about the proposed facility, provides further technical input on the scope and design of any additional studies that may be needed to assess the risks associated with the siting and operation of the NEIDL. This report presents comments and questions on a 90 percent, or penultimate, draft of the revised risk assessment. According to the report, the 90 percent draft of the risk assessment is a substantial improvement over past documents reviewed. Additionally, the report makes recommendations to improve the version that is ultimately prepared for public comment.

college prep environmental pdf: Due Diligence in the International Legal Order Heike Krieger, Anne Peters, Leonhard Kreuzer, 2020-12-03 Due diligence is a prominent concept in international law, frequently referred to in arbitral awards, court decisions, and in scholarly discussions on state responsibility. However, until now, the specific normative content and systemic relation of due diligence to rules and principles of international law has largely remained

unexplored. The present book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law, including international environmental law, international peace and security law, and international economic law. Sector by sector, contributors explore the diverse interactions between due diligence and area-specific substantive and procedural rules as well as general principles of international law. This book exposes the promises and limits of due diligence for enhancing accountability and compliance. It identifies the rise of due diligence as both a driver and signal of change in the international legal order towards risk management and proceduralisation.
