crime documentary netflix: [How Documentaries Went Mainstream](#) Nora Stone, 2023 Since the 1960s, documentary films have moved closer to the mainstream, thanks to the popularity of rockumentaries, association with the independent film movement, support from public and cable television, and the rise of streaming video services. Documentary films have become reliable earners at the U.S. box office and ubiquitous on streaming platforms, while historically they existed on the

margins of mainstream media. How do we explain the growing commercialization of documentary films and the conditions that fueled their transformation? The growing commercialization of documentary film has not gone unnoticed, but it has not been sufficiently explained. Streaming and the growing interest in reality TV are usually offered as initial explanations whenever a documentary enters the cultural conversation or breaks a box-office record, but neither of those causes grapple with the overlapping causal mechanisms that commercialized documentary film. How Documentaries Went Mainstream provides a more comprehensive and meaningful periodization of the commercialization of documentary film. Although the commercial ascension of documentary films might seem meteoric, it is the culmination of decades-long efforts that have developed and fortified the audience for documentary features. Author Nora Stone refines rough explanations of these efforts through a robust synoptic history of the market for documentary films, using knowledge of film economics and the norms of industry discourse to tell a richer story. This periodization will allow scholars to compare the commercialization of documentary film with other genres. Drawing on archival documents, industry trade journals and popular press, and interviews with filmmakers and film distributors, Stone illuminates how documentary features have become more plentiful, popular, and profitable than ever before.

crime documentary netflix: Justice on Demand Tanya Horeck, 2019-11-11 Explores the proliferation of true crime audiovisual texts across multiple media platforms. Justice on Demand: True Crime in the Digital Streaming Era offers a theoretical rumination on the question asked in countless blogs and opinion pieces of the last decade: Why are we so obsessed with true crime? Author Tanya Horeck takes this question further: Why is true crime thought to be such a good vehicle for the new modes of viewer/listener engagement favored by online streaming and consumption in the twenty-first century? Examining a range of audiovisual true crime texts, from podcasts such as Serial and My Favorite Murder to long-form crime documentaries such as The Jinx and Making a Murderer, Horeck considers the extent to which the true crime genre has come to epitomize participatory media culture where the listener/viewer acts as a desktop detective or internet sleuth. While Facebook and Twitter have re-invigorated the notion of the armchair detective, Horeck questions the rhetoric of interactivity surrounding true crime formats and points to the precarity of justice in the social media era. In a cultural moment in which user-generated videos of real-life violence surface with an alarming frequency, Justice on Demand addresses what is at stake in the cultural investment in true crime as packaged mainstream entertainment. Paying close attention to the gendered and racialized dimensions of true crime media, Horeck examines objects that are not commonly considered true crime, including the subgenre of closed-circuit television (CCTV) elevator assault videos and the popularity of trailers for true crime documentaries on YouTube. By analyzing a range of intriguing case studies, Horeck explores how the audience is affectively imagined, addressed, and commodified by contemporary true crime in an on demand mediascape. As a fresh investigation of how contemporary variations of true crime raise significant ethical questions regarding what it means to watch, listen, and witness in a digital era of accessibility, immediacy, and instantaneity, Justice on Demand will be of interest to film, media, and digital studies scholars.

In this process communities invest in the exchange of documentary moving image discourse around politics and social change. This book advances a new argument suggesting that documentary's capacity for social change is found in its ability to establish forms of collective identification and political agency capable of producing and sustaining activist media cultures. It advances the creation of a conceptual, theoretical, and historical space in which documentary and social change can be examined, drawing upon research in cinema, media, and communication studies as well as cultural theory to explore how political ideas move into participatory action. This book takes a distinctive approach, understanding how struggles for social justice are located, reflected, and represented on the documentary screen, but also in pre- and post-production processes. To address this living history, this project includes over sixty unpublished field interviews with documentary filmmakers, critics, funders, activists, and distributors.
