college handbook ebook: Managing the Digital University Łukasz Sułkowski, 2023-03-02 The reflection on university management is based on the question about the shape of universities of the future. Civic, responsible, sustainable, virtual, digital, and many other universities can be mentioned among the concepts present in the literature. All these names describe an important distinctive feature of a university, which will gain more and more importance in the future. However, given the fundamental importance of the radical change taking place, it seems that the most appropriate name, reflecting the essence of the emerging new formation, is digital university. This is because of the importance of digital transformation, which has been developing for several decades, bringing

deep and multidirectional changes in the areas of technology, economy, society, and culture. It is a disruptive civilizational transition and, although stretched over many decades, it is revolutionary in nature, significantly changing our lives in the Anthropocene. The book has three cognitive and pragmatic objectives: to provide a new perspective on the changing academic organization and management; to reflect on higher education management concepts and methods; and to present an overview of university management, governance, and leadership, useful from the perspective of academic managers, and other stakeholders. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

college handbook ebook: Digital History and Hermeneutics Andreas Fickers, Juliane Tatarinov, 2022-06-21 As a result of rapid advancements in computer science during recent decades,

there has been an increased use of digital tools, methodologies and sources in the field of digital humanities. While opening up new opportunities for scholarship, many digital methods and tools now used for humanities research have nevertheless been developed by computer or data sciences and thus require a critical understanding of their mode of operation and functionality. The novel field of digital hermeneutics is meant to provide such a critical and reflexive frame for digital humanities research by acquiring digital literacy and skills. A new knowledge for the assessment of digital data, research infrastructures, analytical tools, and interpretative methods is needed, providing the humanities scholar with the necessary munition for doing critical research. The Doctoral Training Unit Digital History and Hermeneutics at the University of Luxembourg applies this analytical frame to 13 PhD projects. By combining a hermeneutic reflection on the new digital practices of humanities scholarship with hands-on experimentation with digital tools and methods, new approaches and opportunities as well as limitations and flaws can be addressed.

college handbook ebook: Building Tomorrow's Biomedical Workforce: Evaluation of How Evidence-Based Training Programs Align Skill Development and Career Awareness with a Broad Array of Professions Adriana Bankston, Rebekah L. Layton, Audra Van Wart, 2025-08-27 Building the future STEM workforce requires robust federal investments to support the next generation of innovators, as well as systemic changes to enable graduate and postdoctoral researchers to transition with confidence into the biomedical workforce. This effort involves the transformation of the biomedical research enterprise and training environment at all levels, but especially at the predoctoral and postdoctoral levels. Innovative initiatives in education and training as well as career and professional development of biomedical trainees are necessary to build upon the robust biomedical workforce of today and create and sustain a diverse, innovative, and highly trained biomedical workforce of tomorrow. An important aspect of supporting the biomedical workforce relates to changes within training and the research enterprise, with opportunities for re-imagining what STEM education should look like at different levels, including providing agency for junior scientists in the field. The future of the field should focus on inclusivity, supporting trainees from different backgrounds and with diverse perspectives, including (but not limited to) intersectional identities in race/ethnicity, gender, sexual orientation, first generation status, and international talent in STEM. This requires critical policy changes in order to support the transition of biomedical research professionals into the labor market.

college handbook ebook: *Exploring the Collective Unconscious in the Age of Digital Media* Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics—the multidimensionality, immateriality, and non-locality of the unified field of energy and information—as a virtual reality. As a result, a new

paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. Exploring the Collective Unconscious in a Digital Age investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media-sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.

college handbook ebook: Digital Distractions in the College Classroom Flanigan, Abraham Edward, Kim, Jackie HeeYoung, 2022-02-04 Student misuse of mobile technology for off-task purposes has become an international phenomenon in college classrooms. When a student's self-regulation of learning breaks down in the classroom, or when their task motivation begins to wane, turning toward their digital devices for leisure purposes is often the result. Although numerous studies have independently examined student digital distraction in the context of the college classroom, there remains a need to organize the field's collective understanding of the phenomenon. Digital Distractions in the College Classroom explores the challenges that arise from student digital distraction along with potential solutions, including how mobile technology can be leveraged to improve student motivation, self-regulation of learning, and achievement. Addressing topics such as academic motivation and instructional design, this book is ideal for instructional designers, instructors, researchers, administrators, academicians, and students.

college handbook ebook: Outer-Art, Vol. III (prints, outer-sculptures, and digital works) Florentin Smarandache, 2006-02-01 Outer-Art is a movement set up as a protest against, or to ridicule, the random modern art which states that everything is art! It was initiated by Florentin Smarandache, in 1990s, who ironically called for an upside-down artwork: to do art in a way it is not supposed to be done, i.e. to make art as ugly, as silly, as wrong as possible, and generally as impossible as possible. Read manifestos and anti-manifestos for outer-art, essays, interviews, together with a small virtual Outer-Art Gallery

at:<http://www.gallup.unm.edu/~smarandache/a/outer-art.htm>. Excerpts from his (outer-)art theory: The way of how not to write, which is an emblem of paradoxism, was later on extended to the way of how not to paint, how not to design, how to not sculpture, until the way of how not to act, or how not to sing, or how not to perform on the stage thus: all reversed. Only negative adjectives are cumulated in the outer-art: utterly awful and uninteresting art; disgusting, execrable, failure art; garbage paintings: from crumpled, dirty, smeared, torn, ragged paper; using anti-colors and a-colors; naturalist paintings: from wick, spit, urine, feces, any waste matter; misjudged art; self-discredited, ignored, lousy, stinky, hooted, chaotic, vain, lazy, inadequate art (I had once misspelled rat instead of art); obscure, unremarkable, syncopal art; para-art; deriding art expressing inanity and emptiness; strange, stupid, nerd art, in-deterministic, incoherent, dull, uneven art... as made by any monkey! the worse the better!
