classical music academic pdf: Rethinking Social Action through Music Geoffrey Baker, 2021-04-12 How can we better understand the past, present and future of Social Action through Music (SATM)? This ground-breaking book examines the development of the Red de Escuelas de Música de Medellín (the Network of Music Schools of Medellín), a network of 27 schools founded in Colombia's second city in 1996 as a response to its reputation as the most dangerous city on Earth. Inspired by El Sistema, the foundational Venezuelan music education program, the Red is nonetheless markedly different: its history is one of multiple reinventions and a continual search to improve its educational offering and better realise its social goals. Its internal reflections and attempts at transformation shed valuable light on the past, present, and future of SATM. Based on a year of intensive fieldwork in Colombia and written by Geoffrey Baker, the author of *El Sistema: Orchestrating Venezuela's Youth* (2014), this important volume offers fresh insights on SATM and its evolution both in scholarship and in practice. It will be of interest to a very varied readership: employees and leaders of SATM programs; music educators; funders and policy-makers; and students and scholars of SATM, music education, ethnomusicology, and other related fields.

These rapid advances have created a fast-changing field whose scholarship and activities tend to take place in isolation from each other. This volume addresses that shortcoming, bringing together a wide-ranging survey of current approaches. Featuring 39 authors, *The Routledge Companion to Applied Musicology* falls into five parts—Defining and Theorising Applied Musicology; Public Engagement; New Approaches and Research Methods; Representation and Inclusion; and Musicology in/for Performance—that chronicle the subject's rich history and consider the connections that will characterise its future. The book offers an essential resource for anyone exploring applied musicology.

classical music academic pdf: Musical Vulnerability Elizabeth H. MacGregor, 2024-12-24

Since the early twenty-first century, music education across the world has been shaped by neoliberal discourse extolling the benefits of music upon academic achievement, health and wellbeing, and social development. However, such benefits are far from universal; on the contrary, music-making often reveals our shortcomings and dependencies. This highlights an urgent need for music education to be reframed by an understanding of 'musical vulnerability': our inherent and situational openness to being affected by the semantic and somatic properties of music-making. Drawing on existing vulnerability studies, this book evaluates how musicmaking can foster both positive receptivity and negative susceptibility, depending on its delineation of self-identity, social identity, and space, and its embodiment through aural receptivity, mimetic participation, and affective transmission. Through phenomenological, ethnographic research with teachers and pupils, it exposes how values espoused in the music classroom require the personal and interpersonal negotiation of conflicting musical expectations, identities, and abilities. It makes recommendations for music education policymakers, teachers, and researchers in diverse global contexts, suggesting the importance of developing 'pedagogies of vulnerability' in order to foster caring classroom music-making praxes that acknowledge music's capacity both to heal and to harm.

classical music academic pdf: *Meanings of Music Participation* C. Victor Fung, Lisa J. Lehmberg, 2022-08-26 This book uncovers the multifaceted nature of music participation through a collection of studies in a wide variety of musical contexts across the United States. The contributors combine personal voices and vivid narratives with scholarship to present many potential meanings of music participation, and lay out research-based implications for lifelong music education. Exploring music participation in choral and instrumental ensembles; school music classes and community groups; in-person and virtual spaces; among children, young adults, and older adults; and for native-born citizens and immigrants, the 10 original studies in this volume present a diverse portrait of musical engagement. The chapters draw out themes including enjoyment, identity development, learner autonomy, social interaction, motivation, commitment, and quality of life, and draw connections between musical meanings and philosophical principles from both Western and Eastern traditions. Linked by interludes that connect the empirical studies with philosophical interpretations, this volume brings together multiple methodologies and perspectives to consider the social, cultural, and psychological meanings of lifelong music participation. It offers a valuable resource for scholars, professionals, and students working in school and community music or music education research, as well as readers interested in general education, social psychology, lifelong learning, and aging studies.

classical music academic pdf: Popular Music Will Not Save Us Lauren K. Richerme, 2025 In today's globalized landscapes, both traditional and progressive K-12 music education practices, including those associated with popular music, can further capitalism-related inequities. In this context, music educators and students might consider how they position themselves and their music-making practices in relation to capitalist aims and processes and confront the more unethical aspects of capitalism. Popular Music Will Not Save Us challenges music educators to rethink their philosophical stances in the face of contemporary capitalist values and explores the intersection of music education and globalized capitalism, unveiling how certain practices exacerbate material inequities and erode social responsibility. As author Lauren Kapalka Richerme unravels the complexities of music education, her analysis sheds light on how prevalent practices can inadvertently uphold capitalist ideals and reinforce individualism, unceasing accumulation, and precarity in the workforce. Given that no musical genre inherently challenges problematic aspects of capitalism, Richerme proposes that music educators instead focus on affective flows, or the circulation of sensations within pedagogical spaces, and consider four alternative positionalities: thriving within, surviving under, resisting, and challenging capitalism. Popular Music Will Not Save Us advocates for a shift away from capitalistic individualism and inequities and toward a more equitable, affective pedagogical mode. Now is the time to transcend traditional boundaries and embrace a new paradigm that prioritizes social impact over commercial gain.

classical music academic pdf: Music, Higher Education, and Society David E. Myers, 2025-03-27 This volume asserts that institutional teaching, study, administration, and performance of music should derive from essential goodness: the transcendent value embodied in meaning-making that is manifest through holistic cognitive, creative, kinesthetic, productive, and expressive reality. The classical music ecosystem suffers from a legacy of survival, rather than flourishing across increasingly diverse audiences among whom personal and shared meaning is the crux of perceived value. Myers calls for a renaissance in professional education and practice that embeds rigorous and disciplined adherence to essential goodness as a non-negotiable premise. Change leadership is essential if classical music and musicians are to offer society the value it deserves through the classical arts, and administrators, boards, funders, and artists must adopt attitudes of service to this greater good in order to invite and lead participatory, co-creative engagement. Through critical analysis of the longstanding status quo, Myers offers powerful suggestions for change beginning in higher education and flowing through applications across society. Contextualizing music higher education within wider ecosystems of teaching and practice, this book shows how leaders can embrace strategic change as a positive opportunity and offers new models for addressing contemporary challenges in a mission-driven way, including preparing musicians for careers and engaging communities.

Problematising the role and purpose of conservatoires in the context of changing cultural and societal conditions, the contributors reframe the conservatoire as a vehicle for positive change in the performing arts and society at large. Organised into three main sections, the volume covers conservatoire identities and values, teaching and learning music at a conservatoire, and reflections on the conservatoires of the future. Diverse voices from inside and outside the RCM reflect viewpoints from professional musicians, academics, industry, and the student community, spanning topics such as arts practice, music pedagogy and education, technology, inclusion, employability, entrepreneurship, performance science, material culture, and philanthropy. With chapters that combine interviews, case studies, analysis, critical reflection, and perspectives from inside and outside the RCM, this book offers an in-progress model for the forward-thinking conservatoire, underpinned by renewed emphasis on equitable, innovative, sustainable, and technologically enabled artistic practice.
