court procedures 13th edition free: Openness and Evidence: The Oscar Pistorius Crossroad Dr Sonja Els, 2024-11-15 Weighing the constitutional rights of freedom of expression of the media and fair trial rights of the criminal accused, known as the “fair trial – free press conundrum”, is a global challenge. The development of technology such as live streaming of criminal trials through television and real-time reporting through social media challenges the traditional views of open justice, especially regarding evidence and the credibility thereof. The legal maxim of “Justice must be seen to be done” lies at the heart of this book that focuses on openness and evidence in the South African criminal process. The principle of open justice, a Constitutional requirement, is examined in relation to truth finding in the adversarial system of evidence. New media challenge the procedural legitimacy of evidence. As a rule of practice, to prevent witness contamination, witnesses in a criminal trial remain outside the courtroom while the other witnesses testify. This book explores the impact of live broadcasting and streaming of criminal trials on the credibility of witnesses who might have been exposed to evidence before testifying. The book also evaluates the applicability of the sub judice rule against the requirement of openness. Furthermore, the conflicting constitutional rights, being the right to a fair trial and the right to freedom of expression, are interrogated in the quest to new media broadcasting. The book features a legal comparison between the jurisprudence of South Africa, the United States of America and Britain in the domain of new media court reporting. In conclusion, principles of therapeutic jurisprudence are considered as live broadcasting of criminal trials may provide therapeutic outcomes for the victim, the accused, and the broader society. This book serves as an indispensable resource for those

navigating the intersection between the use of new media in court reporting and the constitutional imperatives being open justice and fundamental rights. Scholars in the fields of Law of Criminal Procedure, Media Law, and Constitutional Law will gain fresh insights into these topical issues.

court procedures 13th edition free: The English Legal Process Terence Ingman, 2011 This edition has been updated and revised to take into account recent developments in the English legal process. Many recent Court of Appeal and High Court case law developments are incorporated, as are important pronouncements by the House of Lords.

court procedures 13th edition free: European Court Procedure Viktor Luszcz, 2020-10-29 "More than just another new theoretical study, this book really is a practical and useful tool that I sincerely recommend. From the foreword by Mr Marc van der Woude, President of the General Court of the European Union The new Rules of Procedure of the General Court, in force as of 2015, as well as the reform of the General Court and the re-establishment of a two-tier EU judiciary in September 2016 are the last bricks in the post-Lisbon legal structure governing litigation before the EU Courts. This work covers the already sizeable case-law developed after the completion of these reforms and explains the changes in the Courts' practice entailed by them. Written by experienced EU Court and Commission insiders, it gives a detailed and practice-oriented overview of the whole spectrum of litigation procedure before the EU judiciary. It also presents the entire system of judicial avenues that enable litigants to enforce their rights under EU law against European institutions, Member States or private parties. The book is thus a comprehensive reference tool for practising lawyers and helps them present their cases effectively, while at the same time offering valuable guidance to national judges dealing with cases raising points of EU law. Moreover, it provides insights into the reasoning process of the EU Courts, which will be of interest to scholars in the field, and is built around a structure that facilitates its use as a teaching material.

court procedures 13th edition free: Courts and Tax Treaty Law Guglielmo Maisto, 2007 A detailed and comprehensive study of the issues faced by judiciaries when dealing with tax treaty law cases. It begins with an overview of some of the questions that domestic courts have to deal with when facing treaty cases. It then provides a comparative look into the structure of tax judiciaries and the issues raised by the burden of proof in cases dealing with the application of tax treaties. The different approaches of judiciaries of common law and civil law countries are also taken into consideration. A particular focus is devoted to the interaction between European law principles and bilateral tax treaties, both from the point of view of national judges and the Court of Justice of the European Communities, as well as the relevance of foreign court decision in interpreting tax treaties and the twofold influence between decisions issued by national courts and the Commentaries to the OECD Model Tax Convention. Individual country surveys provide an in-depth analysis on how national courts face cases dealing with the application of tax treaties, with a particular emphasis on issues raised by tax treaty interpretation. Lastly, the book deals with issues raised by judicial treaty override, proposes solutions to resolve judicial errors in the context of international tax law and analyses the procedural conditions for the implementation of tax treaty obligations under domestic law.

court procedures 13th edition free: *Shares and Other Securities in the Conflict of Laws* Maisie Ooi, 2003 This book examines the problems of choice of law relating to shares and other securities. It is a subject that occupied a fairly obscure corner of conflict of laws until the impetus given to it by *Macmillan v Bishopsgate Investment Trust (No 3)* and recent interest generated by fears within the international financial community that the conflicts problems arising from the modern system of securities holding through intermediaries threatens the system's viability. At both European and international levels, efforts have been made to legislate for certainty in an area of the greatest practical importance to the major players in the capital markets, as the value of cross-border transactions in such securities runs into billions of pounds daily. *Shares and Other Securities in the Conflict of Laws* is divided into two parts. Part I determines the present state of English law with respect to choice of law treatment of dealings in shares, and examines the basic rules involved. It considers the context in which the rules have evolved, the situations in which they are said to apply and have been applied, and the place of the rules in the conflicts treatment of securities transactions today. The main focus is on dealings with shares in the traditional direct holding system from which the basic rules developed. Part II considers the difficulties associated with the application and extension of the basic rules to the choice of law issues that arise in the indirect holding system, the various theories and legislative reforms (of the EU and at the Hague) that have been suggested in respect to their resolution, and the extent to which they provide a viable solution. Comparison is also made with the related law reform initiatives in the US of Revised Articles 8 and 9 of the Uniform Commercial Code. The book concludes with an examination of special choice of law concerns in insolvency and arising from collateralization (such as perfection and recharacterization), the impact of dematerialization and immobilization on shares, and the choice of law problems posed by them.

court procedures 13th edition free: *Legal Methods* Thomas M. J. Möllers, 2022-03-22 Möllers *Legal Methods* Legal decisions are accepted if they are well reasoned. German law is exemplary for its technique of legal interpretation and legal construction. This landmark book provides lawyers with more than a hundred legal argumentation figures that are used by lawyers across Europe and the world to justify their legal decisions. It aims to put lawyers in a position to develop legal solutions step by step, and to increase the cogency of their argumentation. Using an interdisciplinary and legal-doctrinal context, it looks at legal sources, traditional and modern

concepts of argumentation, the challenging substantiation and construction of law, the influence of the constitution and European law as a higher-ranking law, determination of the limits of permissible further development of the law and - very relevant for legal practice - the hermeneutics of facts.
