educational ebooks for grade 8: IEA International Computer and Information Literacy Study 2023 Julian Fraillon, Mojca Rožman, 2024-11-02 This open access book presents the conceptual and operational foundations of the IEA International Computer and Information Literacy Study (2023), which is designed to assess how well students are prepared for study, work, and life in a digital world. Participating countries also have an option for their students to complete an assessment of computational thinking (CT). The ICILS assessment framework articulates the basic structure of the study. It provides a description of the field and the constructs to be measured. It outlines the design and content of the measurement instruments, sets down the rationale for those designs, and describes how measures generated by those instruments relate to the constructs.
