These are genres of the Anthropocene par excellence, capturing the dilemmas of the human condition in the current, increasingly precarious epoch. dystopian novels classic: *British Novels and the European Union* Lisa Bischoff, 2023-03-08 This book looks at the cultural, political and economic conditions of British Euroscepticism. Focusing on eight British dystopian novels, published in the years before the decisive In/Out-Referendum, and taking into account cultural, political and economic contexts, Lisa Bischoff shows how the novels' stance towards the integration project range from slight criticism to outright hostility. The wide availability of the novels, and the prominence of both its authors and readers, among which are political figures David Cameron, Nigel Farage and Daniel Hannan, amplify the power of literary Euroscepticism. Drawing on cultural studies, literature and social science, *British Novels and the European Union* reveals the many facets of British Euroscepticism.

dystopian novels classic: *Visions of Dystopia in China's New Historical Novels* Jeffrey C. Kinkley, 2014-11-04 The depiction of personal and collective suffering in modern Chinese novels differs significantly from standard Communist accounts and most Eastern and Western historical narratives. Writers such as Yu Hua, Su Tong, Wang Anyi, Mo Yan, Han Shaogong, Ge Fei, Li Rui, and Zhang Wei scramble common conceptions of China's modern development, deploying avant-garde narrative techniques from Latin American and Euro-American modernism to project a surprisingly Öun-ChineseÓ dystopian vision and critical view of human culture and ethics. The epic narratives of modern Chinese fiction make rich use of magical realism, surrealism, and unusual treatments of historical time. Also featuring graphic depictions of sex and violence and dark, raunchy comedy, these novels deeply reflect China's turbulent recent history, re-presenting the overthrow of the monarchy in the early twentieth century and the resulting chaos of revolution and war; the recurring

miseries perpetrated by class warfare during the dictatorship of Mao Zedong; and the social dislocations caused by China's industrialization and rise as a global power. This book casts China's highbrow historical novels from the 1990s to the mid-2000s as a distinctively Chinese contribution to the form of the global dystopian novel and, consequently, to global thinking about the interrelations of utopia and dystopia.

dystopian novels classic: Survival and Resistance in Evangelical America Crawford Gribben, 2021-02-23 Over the last thirty years, conservative evangelicals have been moving to the Northwest of the United States, where they hope to resist the impact of secular modernity and to survive the breakdown of society that they anticipate. These believers have often given up on the politics of the Christian Right, adopting strategies of hibernation while developing the communities and institutions from which a new America might one day emerge. Their activity coincides with the promotion by prominent survivalist authors of a program of migration to the American Redoubt, a region encompassing Idaho, Montana, parts of eastern Washington and Oregon, and Wyoming, as a haven in which to endure hostile social change or natural disaster and in which to build a new social order. These migration movements have independent origins, but they overlap in their influences and aspirations, working in tandem to offer a vision of the present in which Christian values must be defended as American society is rebuilt according to biblical law. This book examines the origins, evolution, and cultural reach of this little-noted migration and considers what it might tell us about the future of American evangelicalism. Drawing on Calvinist theology, the social theory of Christian Reconstruction, and libertarian politics, these believers are projecting significant soft power. Their books are promoted by leading mainstream publishers and listed as New York Times bestsellers. Their strategy is gaining momentum, making an impact in local political and economic life, while being repackaged for a wider audience in publications by a broader coalition of conservative commentators and in American mass culture. This survivalist evangelical subculture recognizes that they have lost the culture war - but another kind of conflict is beginning.

dystopian novels classic: Dystopia & Education Jessica A. Heybach, Eric C. Sheffield, 2013-04-01 *Dystopia and Education: Insights into Theory, Praxis, and Policy in an age of Utopia Gone Wrong* provides an as-of-yet unexplored critical perspective for examining contemporary educational theory, praxis, and policy with particular reference to the current state of dehumanizing and often oppressive policy and practices that have come to demarcate the era of NCLB and RTT. The authors in this collection employ dystopian themes found in literature, film, visual art, and video games as the lens for that critical inquiry. As such *Dystopia and Education: Insights into Theory, Praxis, and Policy* is an essential contribution to the philosophical/critical tradition in educational scholarship. It is especially valuable because the inquiry undertaken is from a new perspective—one that will extend the critical tradition into a yet unexplored arena. Given the educational climate established by NCLB and RTT, this collection is especially important to the ongoing critical analysis of such policy mandates. There is also a significantly important timeliness to this book given NCLB's utopian expectation of universal academic proficiency among American schoolchildren by the year

2014: as educators race to achieve such a noble yet naïve goal, this collection of essays examines the educational environment that has been enacted to achieve such ends, and describes our current state as a utopia-gone wrong.

dystopian novels classic: What Are Children For? Anastasia Berg, Rachel Wiseman, 2024-08-15 Having children is one of the biggest decisions you'll make in your life. Increasingly, we aren't making it at all. A NEW STATESMAN BEST BOOK OF 2024 'A book for lovers of sound reasoning.' THE NEW YORKER Across the developed world, fewer and fewer people are becoming parents. We seek self-fulfilment; we want women to find meaning and self-worth outside the household; we wish to protect the planet from the ravages of climate change; we do what we can to protect others from senseless suffering. On the face of it, none of these goals are served by having children. Amid such pressures, how on earth can we make the choice to do so? Anastasia Berg and Rachel Wiseman offer a way out of this inertia and indecision by reminding us that in making the individual decision whether to have children, we confront a profound philosophical question: for all its pains and failures, is human life worth living? *What Are Children For?* is a stirring call to overcome fear and dread and embrace the value of human existence and a human future.

dystopian novels classic: We Yevgeny Zamyatin, 2022-05-17 Yevgeny Zamyatin's novel *We* presents a chilling vision of a dystopian future where individuality is suppressed for the sake of societal uniformity. Written in a fragmented, yet lyrical prose style, Zamyatin intricately weaves philosophical musings with a critique of totalitarianism, laying the groundwork for later dystopian literature. The narrative is set in a mathematically regulated society, where the protagonist, D-503, grapples with the conflict between conformity and the burgeoning desire for personal freedom. This bold exploration reflects the author's disillusionment with the early Soviet regime and the broader trends of industrialization and rationalization that characterized early 20th-century thought. Yevgeny Zamyatin (1884-1937), a Russian writer and a dissident voice, drew from his experiences and observations of the socio-political landscape of his time to compose this pioneering work. His background in engineering and exposure to European intellectual ideas enriched his perspective on the relationship between the individual and the state, ultimately informing the satirical and cautionary tone of *We*. Despite facing censorship and exile, Zamyatin's commitment to artistic integrity and personal freedom shines through in this bold narrative. For readers intrigued by the

interplay of freedom and oppression, We is an essential read that resonates powerfully in contemporary discussions about surveillance, autonomy, and the cost of societal security. Zamyatin's visionary prose invites readers to reflect critically on the balance between individual rights and collective responsibility, making it a timeless classic in dystopian literature.

dystopian novels classic: Desire and Empathy in Twentieth-Century Dystopian Fiction

Thomas Horan, 2018-02-13 This book assesses key works of twentieth-century dystopian fiction, including Katharine Burdekin's *Swastika Night*, George Orwell's *Nineteen Eighty-Four*, and Margaret Atwood's *The Handmaid's Tale*, to demonstrate that the major authors of this genre locate empathy and morality in eroticism. Taken together, these books delineate a subset of politically conscious speculative literature, which can be understood collectively as projected political fiction. While Thomas Horan addresses problematic aspects of this subgenre, particularly sexist and racist stereotypes, he also highlights how some of these texts locate social responsibility in queer and other non-heteronormative sexual relationships. In these novels, even when the illicit relationship itself is truncated, sexual desire fosters hope and community.

dystopian novels classic: Environments in Science Fiction Susan M. Bernardo, Donald E.

Palumbo, C.W. Sullivan III, 2014-03-08 The all-new essays in this book respond to the question, How do spaces in science fiction, both built and unbuilt, help shape the relationships among humans, other animals and their shared environments? Spaces, as well as a sense of place or belonging, play major roles in many science fiction works. This book focuses especially on depictions of the future that include, but move beyond, dystopias and offer us ways to imagine reinventing ourselves and our perspectives; especially our links to and views of new environments. There are ecocritical texts that deal with space/place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two.

dystopian novels classic: Women's Utopian and Dystopian Fiction Sharon R. Wilson,

2014-07-18 Women's Utopian and Dystopian Fiction explores the genres of utopian and dystopian recent fiction. It is about how this literature of both imagined perfection and disaster creates new worlds and critiques gender roles, traditions, and values. Essays range in subject matter from Charlotte Perkins Gilman, P. D. James, Joanna Russ, and Marge Piercy, to Ursula Le Guin, Fay Weldon, and Toni Morrison. Two of the three sections focus on Doris Lessing and Margaret Atwood. Examining especially the twentieth century, including second-wave feminism, writers from Tunisia, Turkey, Italy, Korea, the US, and England give both an historical and a global perspective. Utopian and dystopian elements are explored in the Nobel-Prize-winning Doris Lessing's *Memoirs of a Survivor*, the little-known *Mara and Dann*, and *The Cleft*; and new perspectives are offered on Atwood's *The Handmaid's Tale*.
