educational guide daddy day care: Hybrid Learning Philip Tsang, Simon K.S. Cheung, Victor S.K. Lee, Ronghuai Huang, 2010-08-12 The Third International Conference on Hybrid Learning (ICHL 2010) was organized by the School of Continuing and Professional Studies of The Chinese University of Hong Kong, Beijing Normal University, Goethe-Institut China, Caritas Francis Hsu College, and Caritas Bianchi College of Careers. ICHL 2010 provided a platform for knowledge exchange on hybrid learning among educators, researchers and computer scientists, who share a common goal to enhance the quality of learning and teaching in this fast-changing knowledge world,

with the support of technology innovation. Hybrid learning has been an ongoing trend for a number of years. It is not merely a simple combination of face-to-face and technology-mediated instruction, but also encompasses different learning strategies for teaching and learning. It places emphasis on outcome-based teaching and learning, and provides a diversified learning environment. Hybrid learning is probably the most efficient learning mode in the present age of globalization, when learning has to be borderless and dynamic in order to address the diverse learning needs of students. Students are given more opportunities to develop into active independent learners, and to practice practical skills for work and study. It was our pleasure to have three keynote speakers for the ICHL 2010. They were Rebecca Launer from Goethe-Institut, Germany, Bebo White from Stanford University, and Yan Ji Chang from Tsinghua University, all of whom shared with us their valuable insights in the hybrid learning field.

educational guide daddy day care: Educating through Popular Culture Edward Janak, Ludovic A. Sourdout, 2017-03-01 This edited volume serves as a place for teachers and scholars to begin seeking ways in which popular culture has been effectively tapped for research and teaching purposes around the country. The contents of the book came together in a way that allowed for a detailed examination of teaching with popular culture on many levels. The first part allows teachers in PreK-12 schools the opportunity to share their successful practices. The second part affords the same opportunity to teachers in community colleges and university settings. The third part shows the impact of US popular culture in classrooms around the world. The fourth part closes the loop, to some extent, showing how universities can prepare teachers to use popular culture with their future PreK-12 students. The final part of the book allows researchers to discuss the impact popular culture plays in their work. It also seeks to address a shortcoming in the field; while there are outlets to publish studies of popular culture, and outlets to publish pedagogical/practitioner pieces, there is no outlet to publish practitioner pieces on studying popular culture, in spite of the increased popularity and legitimacy of the field.
