ebook music education resource: Digitalization in Education: Developing Tools for Effective Learning and Personalisation of Education Manpreet Kaur Bagga, Laura Sara Agrati, 2024-08-20 Technology-driven trends in the modern society have transformed the ways humans think and communicate. The latest technological artefacts and devices have a profound impact on the forms of interaction between individuals and also significantly influence the process of co construction of knowledge. The COVID pandemic induced experience of remote teaching has significantly contributed to the widespread use of digital technologies in teaching - learning processes, faculty communications, research collaborations, conferences and workshops. The crisis also led to an understanding of the uncertainty of returning to conventional normal and paved way for a new normal ushered by the COVID pandemic. Such transformations create a need for Institutions to prioritize identification of perspective models of digitalization in education (Salmon, 2013). Teachers, teacher educators and policymakers need to collaborate for co-constructing the technology-assisted classroom that will gradually evolve from teaching supplements to pivotal support for creating a personal learning environment (Dabbagh et al., 2021). This article collection aims at examining teachers' experience in implementation of computer technologies and exploring gaps and challenges in the current academic educational practice with regard to use of digital tools. Various elements of digital environment including online courses, e-resources, virtual and augmented reality, artificial intelligence and robotics have become an integral component of learning and fostering students skills, practical teaching experience and effective professional training . It is imperative that aspects of e education are discussed at the global level in order to stimulate creation of personal learning environments, meet inclusive learning needs, support life-long education and identify relevant digital technologies for upgradation of pedagogical methods and teacher strategies in education.

ebook music education resource: *The Politics of Diversity in Music Education* Alexis Anja Kallio, Heidi Westerlund, Sidsel Karlsen, Kathryn Marsh, Eva Sæther, 2021-03-19 This open access book examines the political structures and processes that frame and produce understandings of diversity in and through music education. Recent surges in nationalist, fundamentalist, protectionist and separatist tendencies highlight the imperative for music education to extend beyond nominal policy agendas or wholly celebratory diversity discourses. Bringing together high-level theorisation of the ways in which music education upholds or unsettles understandings of society and empirical analyses of the complex situations that arise when negotiating diversity in practice, the chapters in this volume explore the politics of inquiry in research; examine music teachers' navigations of the shifting political landscapes of society and state; extend conceptualisations of diversity in music education beyond familiar boundaries; and critically consider the implications of diversity for music education leadership. Diversity is thus not approached as a label applied to certain individuals or musical repertoires, but as socially organized difference, produced and manifest in various ways as part of everyday relations and interactions. This compelling collection serves as an invitation to ongoing reflexive inquiry; to deliberate the politics of diversity in a fast-changing and pluralist world; and together work towards more informed and ethically sound understandings of how diversity in music education policy, practice, and research is framed and conditioned both locally and globally.
