Richard Bailey, Robin Barrow, David Carr, Christine McCarthy, 2010-03-23 This book provides an authoritative, yet accessible guide to the Philosophy of Education, its scope, its key thinkers and movements, and its potential contribution to a range of educational concerns. The text offers a balanced view of three key dimensions: first, in giving an equal weight to different styles and modes of philosophy; second, by including past and present perspectives on philosophy of education; and third, in covering both the general perennial issues in philosophy and issues of more contemporary concern. Section one of the book exemplifies different styles of philosophy, paying attention to the contemporary debates as to the nature, possibilities and limitations of these different approaches to philosophy of education. Section two is devoted to particular thinkers of the past, and more general coverage of the history of philosophy of education. Section three is dedicated to contemporary philosophic thought on education, providing the basis and reference point for an exploration of contemporary issues. The handbook is designed primarily to be useful to students studying the field of philosophy of education, in the context of the study of educational foundations or theory. But it is also designed to be of use to practising teachers who wish to gain easy access to current philosophical thinking on particular contemporary educational issues, and to educationalists of all types who want a succinct guide to questions relating to the nature, the history, and the current state of the art of philosophy of education.

educational autumn pdf resources: Diversity and Excellence in Higher Education

Rosalind M. O. Pritchard, Matthias Klumpp, Ulrich Teichler, 2015-11-03 Diversity and excellence in Higher Education seem to be conflicting concepts. Nevertheless, they are dynamic and closely intertwined -- indeed they may even require each other. The book brings together insights from ten different countries to analyse these multi-faceted phenomena and discuss how they may be reconciled within higher education. To set the overall context, it critically addresses markets and managerialism, whilst foregrounding the dangers of certain behavior that European countries are currently, though often unwisely, copying from the U.S. In a mass Higher Education system, the social basis of the student body diversifies – a fact that creates new challenges for planners and managers. The authors' study of diversity concentrates particularly upon issues of equity and justice for students, addressing their life cycle transitions from school to higher education, degree completion, postgraduate education and employability. It also considers challenges posed by diversification at the institutional level, encompassing changes in management, leadership, governance and performance assessment. It addresses attempts to achieve excellence by selectivity, thereby contributing to the stratification of university systems; and it explores attempts to achieve excellence by merging smaller institutions to form larger entities. The book's overall conclusion is that diversity and excellence are not necessarily enemies but relatives who cannot escape the bond between them.
