educational psychology laura berk pdf: *These Are Our Bodies, Foundation Book* Leslie Choplin, Jenny Beaumont, 2016-08-01 Easily accessible, theologically progressive, mainline Christian Education resource on human sexuality. Our inherent value and worth comes from God's love for us, but our modern world is filled with sexual expression that too often leads us away from the life of Christ. As Christians seeking to live a life worthy of our calling and desiring to pass along these values to our children and youth, this book explores how we (as parents and adults) can explore issues of sexuality in the context of our faith. A sexuality education resource from a mainline/progressive denominational prospective aids the adult reader/teacher/parent in learning and using skills that enable them to embrace and affirm the wholeness of sexuality and to talk openly and honestly about the connection of sexuality and faith. This book, grounded from a theological perspective, focuses on foundational issues for addressing how we (and why we) are called to have these conversations in a faithful community to support families. The importance of looking at one's sexuality throughout the lifespan through the lenses of decision making, faith and daily life, respect, growth and change, behavior, responsibility, values, prayer, and intentionality is explored, offering a grounding as well as stand-alone resource for individuals and churches to build upon.

educational psychology laura berk pdf: *The Science of Play* Susan G. Solomon, 2014-11-04

Poor design and wasted funding characterize today's American playgrounds. A range of factors--including a litigious culture, overzealous safety guidelines, and an ethos of risk aversion--have created uniform and unimaginative playgrounds. These spaces fail to nurture the development of children or promote playgrounds as an active component in enlivening community space. Solomon's book demonstrates how to alter the status quo by allying data with design. Recent information from the behavioral sciences indicates that kids need to take risks; experience failure but also have a chance to succeed and master difficult tasks; learn to plan and solve problems; exercise self-control; and develop friendships. Solomon illustrates how architects and landscape architects (most of whom work in Europe and Japan) have already addressed these needs with strong, successful playground designs. These innovative spaces, many of which are more multifunctional and cost effective than traditional playgrounds, are both sustainable and welcoming. Having become vibrant hubs within their neighborhoods, these play sites are models for anyone designing or commissioning an urban area for children and their families. *The Science of Play*, a clarion call to use playground design to deepen the American commitment to public space, will interest architects, landscape architects, urban policy makers, city managers, local politicians, and parents.

educational psychology laura berk pdf: *Understanding the Working College Student*

Laura W. Perna, 2023-07-14 How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional-age students with minimal on-campus, or no, work commitments? Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students - with a substantial number of "traditional" dependent undergraduates in employment, and working independent undergraduates averaging 34.5 hours per week - little attention has been given to how working influences the integration and engagement experiences of students who work, especially those who work full-time, or how the benefits and costs of working differ between traditional age-students and adult students. The high, and increasing, prevalence and intensity of working among both dependent and independent students raises a number of important questions for public policymakers, college administrators, faculty, academic advisors, student services and financial aid staff, and institutional and educational researchers,

including: Why do so many college students work so many hours? What are the characteristics of undergraduates who work? What are the implications of working for students' educational experiences and outcomes? And, how can public and institutional policymakers promote the educational success of undergraduate students who work? This book offers the most complete and comprehensive conceptualization of the "working college student" available. It provides a multi-faceted picture of the characteristics, experiences, and challenges of working college students and a more complete understanding of the heterogeneity underlying the label "undergraduates who work" and the implications of working for undergraduate students' educational experiences and outcomes. The volume stresses the importance of recognizing the value and contribution of adult learners to higher education, and takes issue with the appropriateness of the term "non-traditional" itself, both because of the prevalence of this group, and because it allows higher education institutions to avoid considering changes that will meet the needs of this population, including changes in course offerings, course scheduling, financial aid, and pedagogy.

educational psychology laura berk pdf: Play Stories Katelyn Clark, 2024-12-24 Inform your teaching using your own play history. *Play Stories* invites early childhood educators to reflect deeply on their own childhood experiences and adult play and build their understanding of how their own identities shape their perspectives on children's play. Katelyn Clark's model for uncovering and telling play stories is revealed through four educators' personal play narratives: the Puzzler, the Character, the Explorer, and the Maker. Writing the stories of their own play provides a new platform for educators to understand their play pedagogy from a more holistic perspective and to identify where they really playfully shine in their classrooms, thus becoming more invested in the play of their students.
