Society, Gender, and Identity

Societal structures, family systems, gender roles, and identity politics are thoroughly covered. Textbooks address issues such as urbanization, generational change, and the influence of tradition versus modernity. Contemporary challenges, including youth culture, migration, and social

east asia studies textbook: Designing History in East Asian Textbooks Gotelind Mueller, 2011-02-01 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. east asia studies textbook: Imagining Japan in Post-war East Asia Paul Morris, Naoko Shimazu, Edward Vickers, 2014-03-26 In the decades since her defeat in the Second World War, Japan has continued to loom large in the national imagination of many of her East Asian neighbours. While for many, Japan still conjures up images of rampant military brutality, at different times and in different communities, alternative images of the Japanese 'Other' have vied for predominance - in ways that remain poorly understood, not least within Japan itself. Imagining Japan in Postwar East Asia analyses the portrayal of Japan in the societies of East and Southeast Asia, and asks how and why this has changed in recent decades, and what these changing images of Japan reveal about the ways in which these societies construct their own identities. It examines the role played by an imagined 'Japan' in the construction of national selves across the East Asian region, as mediated through a broad range of media ranging from school curricula and textbooks to film, television, literature and comics. Commencing with an extensive thematic and comparative overview chapter, the volume also includes contributions focusing specifically on Chinese societies (the mainland PRC, Hong Kong and Taiwan), Korea, the Philippines, Malaysia and Singapore. These studies show how changes in the representation of Japan have been related to political, social and cultural shifts within the societies of East Asia - and in particular to the ways in which these societies have imagined or constructed their own identities. Bringing together contributors working in the fields of education, anthropology, history, sociology, political science and media studies, this interdisciplinary volume will be of interest to all students and scholars concerned with issues of identity, politics and culture

in the societies of East Asia, and to those seeking a deeper understanding of Japan's fraught relations with its regional neighbours.

east asia studies textbook: East Asian Transformation Jeffrey Henderson, 2011-02-25 From the re-emergence of Japan as an industrial power in the 1950s through to the contemporary rise of China as a potential economic and political behemoth, the story of East Asian development has been central to any serious analysis of the dynamics and trajectory of the global political economy. Integrated into a coherent, critical narrative, this book examines key political-economic and social dynamics that helped forge the 'miracle' economies of East Asia and continue to drive them forward in the volatile circumstances of our current epoch. It analyses the relation between the state and markets; the changing nature of economic governance and its relation to inequality; and the rise of China and its international consequences. Historically informed and comparative in nature, the book contributes to the analysis of the transformations of Japan, Hong Kong, South Korea, Taiwan, Singapore, Malaysia and China, and is the first to cover the ground in one volume. Written by a leading analyst of East Asian development, the book engages with the relevant issues and debates, in an open, non-technical language, making it useful as an advanced textbook not only for East Asian studies, but more generally in international political economy and development studies.

east asia studies textbook: Education in South-East Asia Colin Brock, Lorraine Pe Symaco, 2011-05-09 This book on education in South-East Asia is the very first of its kind to comprehensively cover and discuss the education systems and issues in all the countries in the region - the ten member nations of the Association of South-East Asian nations (ASEAN) plus Timor Leste. The eleven chapters on country case studies are written by education country experts and give the readers an overview of each country's education system, while also highlighting issues currently significant to each system. There are also thematic chapters on selected issues reckoned to be significant in the region such as: gender, education and development; higher education ; language policy; quality assurance; and sustainable development. This book is a significant contribution to academic literature in this field in that the South-East Asian region is, in general, one of the leading zones of the developing world, containing within it advancing economies, such as Brunei and Malaysia, and a key global hub, Singapore. Even the poorer countries are showing signs of significant advance. The region also contains the most populous Islamic country in the world, Indonesia, and examples of the educational legacies of a variety of forms of European and American colonialism. east asia studies textbook: History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C. Snider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

east asia studies textbook: Southeast Asia Chong-Yah Lim, 2004 Southeast Asia: The Long Road Ahead is a serious and concise study on various important economic aspects of Southeast Asia. Existing economic studies on the region are mainly topical in nature. Most of the publications only attempt to offer a partial treatment of the issues and fail to examine these issues in a holistic manner. The objective of this book is to provide a more complete cross-country discussion on the economic issues and problems facing Southeast Asia. Besides critically examining the multiple facets of changes and problems that have been and will be encountered by Southeast Asia, the book also presents a lucid exposition on the prospects of the region. However, it does not stop there. It moves on to provide pointers and suggestions on how Southeast Asian countries should proceed with their development options and processes. The book should be of interest to economists, graduate students on Southeast Asia and all those who want to have a better knowledge and understanding of the important Southeast Asian region.

east asia studies textbook: Southeast Asian Studies Cynthia Chou, 2003-08-01 What is the relevance of the area studies approach to Southeast Asia? The current state and future directions of area studies, of which Southeast Asian studies are a part, is a central question not only to scientists working in the field but also those engaged in university politics. This collection of nine articles is written by specialists from different disciplinary backgrounds and working in institutions of higher learning all around the world. It provides an up-to-date insight into the current state of the study field, its strengths and weaknesses and seeks ways to reconfigure Southeast Asian studies in order to meet the challenges of a region that is caught up in profound transformation as a consequence of both globalization and localization.

east asia studies textbook: Handbook for Asian Studies Specialists Noriko Asato, 2013-10-08 An indispensable tool for librarians who do reference or collection management, this work is a pioneering offering of expertly selected print and electronic reference tools for East Asian Studies (Chinese, Japanese, and Korean). Handbook for Asian Studies Specialists: A Guide to Research Materials and Collection Building Tools is the first work to cover reference works for the main Asian area languages of China, Japan, and Korea. Several leading Asian Studies librarians have contributed their many decades of experience to create a resource that gathers major reference titles—both print and online—that would be useful to today's Asian Studies librarian. Organized by language group, it offers useful information on the many subscription-based and open-source electronic tools relevant to Asian Studies. This book will serve as an essential resource for reference collections at academic libraries. Previously published bibliographies on materials deal with China or Japan or Korea, but none have coalesced information on all three countries into one work, or are written in English. And unlike the other resources available, this work provides the insight needed for librarians to make informed collection management decisions and reference selections.
