david newman sociology textbook: *Sociology* David M. Newman, 2022-08-11 In the Fourteenth Edition of *Sociology: Exploring the Architecture of Everyday Life*, David Newman shows students how to see the unfamiliar in the familiar—to step back and see organization and predictability in their take-for-granted personal experiences. With his approachable writing style and lively anecdotes, the author’s goal from the first edition has been the same: to write a textbook that reads like a real book. Many adopters of this book are fans of Peter Berger’s classic works, which helped introduce the idea of social constructionism to sociology. Newman uses the metaphors of architecture and construction to help students understand that society is not something that exists out there, independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, current examples, and fresh data, this text presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage (14 chapters) focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures. This title is accompanied by a complete teaching and learning package in SAGE Vantage, an intuitive learning platform that integrates quality SAGE textbook content with assignable multimedia activities and auto-graded assessments to drive student engagement and ensure accountability. Unparalleled in its ease of use and built for dynamic teaching and learning, Vantage offers customizable LMS integration and best-in-class support.

david newman sociology textbook: Weaponizing Anthropology David H. Price, 2011-08-16 The ongoing battle for hearts and minds in Iraq and Afghanistan is a military strategy inspired originally by efforts at domestic social control and counterinsurgency in the United States. *Weaponizing Anthropology* documents how anthropological knowledge and ethnographic methods are harnessed by military and intelligence agencies in post-9/11 America to placate hostile foreign populations. David H. Price outlines the ethical implications of appropriating this traditional academic discourse for use by embedded, militarized research teams. Price's inquiry into past relationships between anthropologists and the CIA, FBI, and Pentagon provides the historical base for this expose of the current abuses of anthropology by military and intelligence agencies. *Weaponizing Anthropology* explores the ways that recent shifts in funding sources for university students threaten academic freedom, as new secretive CIA-linked fellowship programs rapidly infiltrate American university campuses. Price examines the specific uses of anthropological knowledge in military doctrine that have appeared in a new generation of counterinsurgency manuals and paramilitary social science units like the Human Terrain Teams. David H. Price is the author of *Threatening Anthropology: McCarthyism and the FBI's Surveillance of Activist Anthropologists* and *Anthropological Intelligence: The Deployment and Neglect of American Anthropology in the Second World War*. He is a member of the Network of Concerned Anthropologists and teaches at St. Martin's College in Lacey, Washington.
