downloadable hibiscus novel: *These Memories Do Not Belong to Us* Yiming Ma, 2025-08-12 For fans of American War and Cloud Atlas, a hauntingly beautiful and prescient debut novel set in a future where a renamed China is the sole global superpower and citizens can record and transfer memories between minds. When I was a boy, my mother used to tell me stories of a world before memories could be shared between strangers . . . In a far-off future ruled by the Qin Empire, every citizen is fitted with a Mindbank, an intracranial device capable of recording and transmitting memories between minds. This technology gives birth to Memory Capitalism, where anyone with means can relive the life experiences of others. It also unleashes opportunities for manipulation: memories can be edited, marketed, and even corrupted for personal gain. After the sudden passing of his mother, an unnamed narrator inherits a collection of banned memories from her Mindbank so dangerous that even possessing them places his freedom in jeopardy. Traversing genres, empires, and millennia, these memories once belonged to sumo wrestlers and social activists, armless swimmers and watchmakers, all struggling to survive amid the backdrop of Qin's ascent toward global dominance. Determined to release his mother's memories to the world before they are destroyed forever, the narrator will risk everything—even if the cost is his own life. Powerful and provocative, *These Memories Do Not Belong to Us* masterfully explores how governments and media manipulate history to control the collective imagination. It inspires us to see beyond the sheen of convenient truths, revealing stories of sacrifice and love that refuse to be eradicated.

downloadable hibiscus novel: *Our Evenings* Alan Hollinghurst, 2025-08-19 Named a Best Book of the Year by The New Yorker • The Winnipeg Free Press • The Guardian • TIME • The Irish Times • Kirkus Reviews • Publishers Weekly • Slate • A New York Times Notable Book of 2024 • From the internationally acclaimed winner of the Booker Prize, a piercing novel that envisions modern England through the lens of one man's acutely observed and often unnerving experience, as he struggles with class and race, art and sexuality, love and violence. The finest novel yet from one of the great writers of our time. —The Guardian Did I have a grievance? Most of us, without looking far, could find something that had harmed us, and oppressed us, and unfairly held us back. I tried not to dwell on it, thought it healthier not to, though I'd lived my short life so far in a chaos of privilege and prejudice. Dave Win, the son of a British dressmaker and a Burmese man he's never met, is thirteen years old when he gets a scholarship to a top boarding school. With the doors of elite English society cracked open for him, heady new possibilities lie before Dave, even as he is exposed to the envy and viciousness of his wealthy classmates, above all that of Giles Hadlow, whose worldly parents sponsored the scholarship and who find in Dave someone they can more easily nurture than their brutish son. *Our Evenings* follows Dave from the 1960s on—through the possibilities that remained open for him, and others that proved to be illusory: as a working-class brown child in a decidedly white institution; a young man discovering queer culture and experiencing his first, formative love affairs; a talented but often overlooked actor, on the road with an experimental theater company; and an older Londoner whose late-in-life marriage fills his days with an unexpected sense of happiness and security. Moving in and out of Dave's orbit are the Hadlows. Estranged from his parents, who remain close to Dave, Giles directs his privilege into a career as a

powerful right-wing politician, whose reactionary vision for England pokes perilous holes in Dave's stability. And as the novel accelerates towards the present day, the two men's lives and values will finally collide in a cruel shock of violence. This is "one of our most gifted writers" (The Boston Globe) sweeping readers from our past to our present through the beauty, pain, and joy of one deeply observed life.

downloadable hibiscus novel: A Detective's Complaint Shimon Adaf, 2022-08-02 In Shimon Adaf's Lost Detective Trilogy, what begins as conventional mystery becomes by degrees a brilliant deconstruction not just of genre but of our own search for meaning. Both profound and compulsively readable, these books demand to be devoured. —Lavie Tidhar, author of *By Force Alone* In *A Detective's Complaint*, the sequel to *One Mile and Two Days Before Sunset*, Elish Ben Zaken has traded working as a private investigator for writing detective novels based on unsolved cases from the past. He appears to live an ordinary writer's life: meeting with his agent, attending literary conferences. But all is not quite right with Elish, who cannot escape his past so easily, especially when his sister's daughter, Tahel, a teenager and an aspiring sleuth herself, calls on him for help. Tahel has uncovered a mystery: a young woman boarded a bus in Beersheva on a Thursday evening and stepped off in Sderot, close to the Gaza border, on Sunday evening. A bus ride that should have lasted an hour instead took three days, and the young woman remembers none of it. To assist Tahel—and, he tells himself, to conduct research for his next novel—Elish moves back to Sderot, where he grew up. His sister, Yaffa, has moved her family from Tel Aviv to a new lakeside development there; the property came cheap, despite the attractive setting, and there are murmurs that the developer fled the country before it was completed. Some of the houses still stand empty, and Tahel keeps waking up at night to find her mother staring out at the lake, convinced she is being watched. Now, in the summer of 2014, Sderot lies near the center of the Gaza-Israel conflict, and sirens and missile strikes are part of the town's daily reality—as are violent clashes between anti-war protestors and those who oppose them. In this pressurized environment, Elish must grapple with the deep wounds of history, both personal and political, and the human need for answers in a world that offers few.

downloadable hibiscus novel: *Degradation, Ecological Restoration and Adaptive Management of Estuarine Wetlands under Intensifying Global Changes, volume II* Tian Xie, Milko Alberto Jorquera, Laibin Huang, Junhong Bai, 2024-07-03 Estuarine wetlands play important roles in providing various ecosystem services, such as providing habitat for living organisms, preventing seawater intrusion, conserving biodiversity, regulating microclimate, and promoting nutrient cycling and carbon sequestration. Estuaries are home to many mega-cities, such as New York, San Francisco, Shanghai, and Tokyo, accompanied by frequent human activities. These human-induced disturbances have rapidly altered the structure and function of estuarine ecosystems through land reclamation, pollution, overfishing, and altered flows. Moreover, estuarine wetlands have been greatly threatened by intensifying global climate changes, particularly more frequent tsunamis, sea-level rise, and large-scale biological invasions, which will not only affect primary and secondary productivity, community composition and distribution, and biodiversity, but also natural ecohydrological and biogeochemical processes, and will ultimately disrupt ecosystem services. To mitigate such negative impacts, a growing number of estuarine wetland restoration projects have been undertaken in recent years. These projects aim to re-establish a variety of ecological attributes, including community structure (species diversity and habitat) and ecological processes (energy flow and nutrient cycling), which implies increased resilience and resistance of estuarine ecosystems to abiotic and biotic stressors. However, ecological restoration practices are not always satisfactory in the face of uncertainties from intensifying global changes and socioeconomic variation. Ecologists, biologists, environmentalists have been working on finding more effective solutions to restore degraded estuarine wetland ecosystems on a global scale. The concepts of "nature-based solutions", "adaptive management" or "ecological networks" seem to offer better prospects and are now being used to reframe estuarine restoration on critical uncertainties reduction, climate change adaptation, and mitigation strategies. As the world enters the United Nations Decade of Ecosystem Restoration

(2021-2030), countries and organizations around the world will pay greater attention to the innovation of ecological restoration underpinnings to ensure that estuarine restoration achieves its full potential in delivering social and ecological coordination and, ultimately, sustainable development. Therefore, it is important to discuss how anthropogenic disturbances and climate change affect estuarine wetlands and how the latest restoration framework can guide future practices towards conserving and restoring the biodiversity of estuarine wetlands.
