deceased handbook online: *The Law and the Dead* Heather Conway, 2016-04-14 The fate of the dead is a compelling and emotive subject, which also raises increasingly complex legal questions. This book focuses on the substantive laws around disposal of the recently deceased and associated issues around their post-mortem fate. It looks primarily at the laws in England and Wales but also offers a comparative approach, drawing heavily on material from other common law jurisdictions including Australia, New Zealand, Canada and the United States. The book provides an in-depth, contextual and comparative analysis of the substantive laws and policy issues around corpse disposal, exhumation and the posthumous treatment of the dead, including commemoration. Topics covered include: the legal frameworks around burial, cremation and other disposal methods; the hierarchy of persons who have a legal duty to dispose of the dead and who are entitled to possession of the deceased's remains; offences against the dead; family burial disputes, and the legal status of burial instructions; the posthumous use of donated bodily material; and the rules around disinterment, and creating an appropriate memorial. A key theme of the book will be to look at the manner in which conflicts involving the dead are becoming increasingly common in secular, multi-cultural societies where the traditional nuclear family model is no longer the norm, and how such legal contests are resolved by courts. As the first comprehensive survey of the laws in this area for decades, this book will be of use to academics, lawyers and judges adjudicating on issues around the fate of the dead, as well as the death industry and funeral service providers.

deceased handbook online: *Death in the Middle Ages and Early Modern Times* Albrecht Classen, 2016-04-11 Death is not only the final moment of life, it also casts a huge shadow on human

society at large. People throughout time have had to cope with death as an existential experience, and this also, of course, in the premodern world. The contributors to the present volume examine the material and spiritual conditions of the culture of death, studying specific buildings and spaces, literary works and art objects, theatrical performances, and medical tracts from the early Middle Ages to the late eighteenth century. Death has always evoked fear, terror, and awe, it has puzzled and troubled people, forcing theologians and philosophers to respond and provide answers for questions that seem to evade real explanations. The more we learn about the culture of death, the more we can comprehend the culture of life. As this volume demonstrates, the approaches to death varied widely, also in the Middle Ages and the early modern age. This volume hence adds a significant number of new facets to the critical examination of this ever-present phenomenon of death, exploring poetic responses to the Black Death, types of execution of a female murderer, death as the springboard for major political changes, and death reflected in morality plays and art.

deceased handbook online: *Communities of Print* Rosamund Oates, Jessica G. Purdy, 2021-09-27 This book provides a new perspective on book history by exploring communities created by the production and consumption of printed material. Essays by leading scholars explore the connections between writers, printers, booksellers and readers and examine changes and continuities across the period 1500 to 1800. As well as investigating the networks behind the production and dissemination of printed material, this collection examines the ways in which readers consumed, used and shared their printed texts. By focusing on the materiality of early modern texts, contributors to this volume offer new interpretations of the history of reading, the book trade, and the book as an object in early modern Europe.

deceased handbook online: *Death, Society, and Human Experience* Robert Kastenbaum, Christopher M. Moreman, 2018-03-29 Providing an overview of the myriad ways that we are touched by death and dying, both as an individual and as a member of society, this book will help readers understand our relationship with death. Kastenbaum and Moreman show how various ways that individual and societal attitudes influence both how and when we die and how we live and deal with the knowledge of death and loss. This landmark text draws on contributions from the social and behavioral sciences as well as the humanities, such as history, religion, philosophy, literature, and the arts, to provide thorough coverage of understanding death and the dying process. *Death, Society, and Human Experience* was originally written by Robert Kastenbaum, a renowned scholar who developed one of the world's first death education courses. Christopher Moreman, who has worked in the field of death studies for almost two decades specializing in afterlife beliefs and experiences, has updated this edition.

deceased handbook online: *Death and Religion in a Changing World* Kathleen Garces-Foley, 2014-12-18 This comprehensive study of the intersection of death and religion offers a unique look at how religious people approach death in the twenty-first century. Previous scholarship has largely focused on traditional beliefs and paid little attention to how religious traditions evolve in relation to their changing social context. Employing a sociological approach, *Death and Religion in a Changing World* describes how people from a wide variety of faiths draw on and adapt traditional beliefs and practices as they deal with death in modern societies. The book includes coverage of newly emerging social and religious phenomena that are only just beginning to be analyzed by religion scholars, such as public shrines, the role of the media, spiritual bereavement groups, and the use of the Internet in death practices.

deceased handbook online: Handbook for Asian Studies Specialists Noriko Asato, 2013-10-08 An indispensable tool for librarians who do reference or collection management, this work is a pioneering offering of expertly selected print and electronic reference tools for East Asian Studies (Chinese, Japanese, and Korean). Handbook for Asian Studies Specialists: A Guide to Research Materials and Collection Building Tools is the first work to cover reference works for the main Asian area languages of China, Japan, and Korea. Several leading Asian Studies librarians have contributed their many decades of experience to create a resource that gathers major reference titles—both print and online—that would be useful to today's Asian Studies librarian. Organized by language group, it offers useful information on the many subscription-based and open-source electronic tools relevant to Asian Studies. This book will serve as an essential resource for reference collections at academic libraries. Previously published bibliographies on materials deal with China or Japan or Korea, but none have coalesced information on all three countries into one work, or are written in English. And unlike the other resources available, this work provides the insight needed for librarians to make informed collection management decisions and reference selections.

deceased handbook online: The De Gruyter Handbook of Automated Futures Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us, our environment, and our imaginations? What actions should we take in response to automation? Beyond grand narratives and technology-driven visions of the future, what more can automation offer? With these questions in mind, The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently. It consolidates automated futures as an inter- and transdisciplinary research field, embedding the imaginaries, interactions, and impacts of automation technology within their social, historical, societal, cultural, and political contexts. Promoting a critical yet constructive and engaging agenda, the handbook invites readers to collaborate with rather than resist automation agendas. It does so by pushing the agenda for social science, humanities and design beyond merely assessing and evaluating existing technologies. Instead, the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems. Methodologically, the handbook is underpinned

by a pedagogical approach to staging co-learning and co-creation of automated futures with, rather than simply for, people. In this way, the handbook encourages readers to explore new and alternative modes of research, fostering a deeper engagement with the evolving landscape of automation.
