educational pdfs for history: *History Education and Historical Inquiry* Bob Bain, Arthur Chapman, Alison Kitson, Tamara Shreiner, 2024-04-01 Inquiry plays a vital role in history as a discipline which constructs knowledge about the past and it is a vital organizing principle in history education in many countries around the world. Inquiry is also much debated, however, and although it has prominent contemporary advocates around the world, it also has prominent critics in education studies. This volume in the International Review of History Education explores the role of historical inquiry in history curricula and in history classrooms and addresses a series of linked questions, including the following: • What does historical inquiry mean in history classrooms? • What forms does classroom based historical inquiry take, and to what extent is it understood in differing ways in different contexts? • What do we know about the affordances and constraints associated with inquiry-based learning in history –what is the evidence of the effectiveness or ineffectiveness of inquiry based historical learning? We address these questions in the volume by presenting seventeen papers from eight different international contexts exploring historical inquiry that will be of interest both to history teachers, curriculum designers and history education researchers - seven papers from England, three from the US, two from Sweden and one each from Argentina, Australia, Belgium, Canada, and Singapore. The volume adds to our knowledge about teachers' thinking about inquiry and teachers' inquiry practices. It adds to our knowledge about the impact and value of inquiry in developing children's' historical learning. It also explores the challenges that implementing inquiry can present for history teachers and provides support for implementation and examples of successful practice. ENDORSEMENT: A wonderful overview of the global story of historical inquiry. Canvassing everything from finding opportunities to teach history through all levels of education, through to the complexities of navigating different views on the past inside and outside of the classroom, *History Education and Historical Inquiry* provides a practical and empowering approach for educators around the world. Recommended reading for anyone who wants to feel the support of educators from around the world in strengthening the place of inquiry in complex times. — Marnie Hughes - Warrington, University of South Australia

educational pdfs for history: *Historical Thinking* Joanna Wojdon, 2019-11-20 Developing historical thinking is becoming an overarching goal of history education, at least on the declarative level. The concept is not new and has been developed for many years in various national and international contexts. However, its scope and contents, and especially the methods of transferring it onto everyday school practice still remain work in progress for they involve major re-structuring of traditional ways of teaching. In this case, modernizing history education is not about incorporating new technologies but rather about developing new approaches to any and all resources used in the classroom and issues discussed in the process of history education. Some of the papers in this issue of JHEC address the issues posed by the use of films, museums, writing, and the introduction of local and regional history in history education. Starting from this year, JHEC launches its new section devoted to book reviews. It discusses publications related to history didactics and all aspects of historical culture and history education in the past and present, published in the recent years in the English language.

At the heart of the book is a series of professional enquiries carried out by experienced history teachers, working in a range of contexts. Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection, data analysis and argument. These history teachers also show how they drew on diverse scholarship in history and history education, including many publications by other history teachers. In eight further chapters, other experts, ranging from practitioner-scholars to researchers in diverse fields (such as history, history education, teacher education, teacher research and curriculum theory) reflect on the distinctive insights that these teachers offer and explore connections with their own fields. The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between 'theory' and 'practice'. Social constructivist theories of learning applied to historical thinking underpin the book, with particular emphasis on links between personalised and collaborative learning and e-learning.
