download ha jin books: Transpacific Cartographies Melody Yunzi Li, 2023-12-15
Transpacific Cartographies examines how contemporary Chinese diasporic narratives address the existential loss of home for immigrant communities at a time of global precarity and amid rising Sino-US tensions. Focusing on cultural productions of the Chinese diaspora from the 1990s to the present -- including novels by the Sinophone writers Yan Geling (*The Criminal Lu Yanshi*), Shi Yu (*New York Lover*), Chen Qian (*Listen to the Caged Bird Sing*), and Rong Rong (*Notes of a Couple*), as well as by the Anglophone writer Ha Jin (*A Free Life*; *A Map of Betrayal*), selected TV shows (*Beijinger in New York*; *The Way We Were*), and online literature -- Melody Yunzi Li argues that the characters in these stories create multilayered maps that transcend the territorial boundaries that make finding a home in a foreign land a seemingly impossible task. In doing so, these "maps" outline a transpacific landscape that reflects the psycho-geography of homemaking for diasporic communities. Intersecting with and bridging Sinophone studies, Chinese American studies, and diaspora studies and drawing on theories of literary cartography, *Transpacific Cartographies* demonstrates how these "maps" offer their readers different paths for finding a sense of home no matter where they are.

IBM® supports the High Availability Linux (Linux-HA) project, which provides high availability functions to the open source community. One component of the Linux-HA project is the Heartbeat program, which runs on every known Linux platform. Heartbeat is part of the framework of the Linux-HA project. This IBM Redbooks® publication provides information to help you evaluate and implement Linux-HA release 2 by using Heartbeat 2.0 on the IBM System z platform with either SUSE® Linux Enterprise Server version 10 or Red Hat® Enterprise Linux® 5. To begin, we review the fundamentals of high availability concepts and terminology. Then we discuss the Heartbeat 2.0 architecture and its components. We examine some of the special considerations when using Heartbeat 2.0 on Linux on System z, particularly Linux on z/VM®, with logical partitions (LPARs), interguest communication by using HiperSockets™, and Shoot The Other Node In The Head (STONITH) by using VSMERVE for Simple Network IPL (snIPL). By reading this book, you can examine our environment as we outline our installation and setup processes and configuration. We demonstrate an active and passive single resource scenario and a quorum scenario by using a single resource with three guests in the cluster. Finally, we demonstrate and describe sample usage scenarios.

download ha jin books: South Asian Diaspora Narratives Amit Sarwal, 2017-05-03 This book analyses the metaphysical and poetical notions and the processes of 'rooting into a culture' and 'routing out of a culture' in the context of South Asian diaspora in Australia. These diasporic narratives are often characterised by bifurcated and dislocated identities that exist in a liminal space, in-between two identities, two cultures, and two histories. Yet, 'home' remains, through acts of imagination, remembering and re-creation, an important reference point. The author argues that a clearer notion of politics of location is required to distinguish between the different kinds of 'dislocation' the immigrants suffer, both psychologically and sociologically. The diaspora is Australia is an under-studied topic, and this book fills a lacuna in South Asian diaspora studies by analysing and calling upon a wide range of works in this field from historical, anthropological, sociological, cultural, and literary studies.

virtualization. The next wave of benefits will come when they reduce the time and effort required to run and manage VMware platforms. The VMware Infrastructure Software Development Kit (VI SDK) includes application programming interfaces (APIs) that allow developers and administrators to do just that. Until now, there has been little documentation for the APIs. In VMware VI and vSphere SDK, software architect Steve Jin demystifies the entire VMware VI and new vSphere SDK and offers detailed, task-based coverage of using the APIs to manage VMware more efficiently and cost-effectively. Jin walks you through using the VI SDK and cloud-computing vSphere SDK to manage ESX servers, ESX clusters, and VirtualCenter servers in any environment—no matter how complex. Drawing on his extensive expertise working with VMware strategic partners and enterprise customers, he places the VI SDK in practical context, presenting realistic samples and proven best practices for building robust, effective solutions. Jin demonstrates how to manage every facet of a VMware environment, including inventory, host systems, virtual machines (VMs), snapshots, VMotion, clusters, resource pools, networking, storage, data stores, events, alarms, users, security, licenses, and scheduled tasks. Coverage includes Understanding how the VI SDK fits into your VMware VI and Cloud Ready vSphere Environment Discovering the VI and vSphere SDK from the bottom up Using the author's new VI Java API to write shorter, faster, and more maintainable code Managing VI and vSphere inventory and configurations Moving running VMs and storages across different physical platforms without disruption Optimizing system resources, hardening system securities, backing up VMs and other resources Leveraging events, alarms, and scheduled tasks to automate the system management Developing powerful applications that integrate multiple API features and run on top of or alongside VMware platforms Using the VI SDK to monitor performance Scripting with the VI SDK: building solutions with VI Perl, PowerShell, and Jython Avoiding the pitfalls that trip up VMware VI developers Integrating with and extending VMware platforms using VI SDK This book is an indispensable resource for all VMware developers and administrators who want to get more done in less time; for hardware vendors who want to integrate their products with VMware; for ISV developers building new VMware applications; and for every professional and student seeking a deeper mastery of virtualization.

download ha jin books: *Asia and the Historical Imagination* Jane Yeang Chui Wong, 2018-03-21 This collection explores the interpretation of historical fiction through fictional representations of the past in an Asian context. Emphasising the significance of region and locality, it explores local networks of political and cultural exchanges at the heart of an Asian polity. The book considers how imagined pasts converge and diverge in developed and developing nations, and examines the limitations of representation at a time when theories of world literature are shaping the way we interpret global histories and cultures. The collection calls attention to the importance of acknowledging local tensions—both within the historical and cultural make-up of a country, and within the Asian continent—in the interpretation of historical fiction. It emphasizes a broad-spectrum view that privileges the shared historical experiences of a group of countries in close proximity, and it also responds to the paradigm shift in Asian Studies. Discussing how local conditions shape and create expectations of how we read historical fiction and working with the theme of fictionality and locality, the volume provides an alternative framework for the study of world literature.

download ha jin books: *Nanocosmetics* Arun Nanda, Sanju Nanda, Susai Rajendran, Yassine Slimani, Tuan Anh Nguyen, 2020-05-05 Nanotechnology is key to the design and manufacture of the new generation of cosmetics. Nanotechnology can enhance the performance and properties of cosmetics, including colour, transparency, solubility, texture, and durability. Sunscreen products, such as UV nano-filters, nano-TiO₂ and nano-ZnO particles, can offer an advantage over their traditional counterparts due to their broad UV-protection and non-cutaneous side effects. For perfumes, nano-droplets can be found in cosmetic products including Eau de Toilette and Eau de Parfum. Nanomaterials can also be used in cosmetics as transdermal drug delivery systems. By using smart nanocontainers, active compounds such as vitamins, antioxidants, nutrients, and anti-inflammatory, anti-infective agents, can be delivered effectively. These smart nanocontainers are typically related with the smart releasing property for their embedded active substances. These smart releases could be obtained by using the smart coatings as their outer nano-shells. These nano-shells could prevent the direct contact between these active agents and the adjacent local environments. *Nanocosmetics: Fundamentals, Applications and Toxicity* explores the formulation design concepts and emerging applications of nanocosmetics. The book also focuses on the mitigation or prevention of their potential nanotoxicity, potential global regulatory challenges, and the technical challenges of mass implementation. It is an important reference source for materials scientists and pharmaceutical scientists looking to further their understanding of how nanotechnology is being used for the new generation of cosmetics.

This book traces the history of AR from its early development, discussing the fundamentals of AR and its associated science. The handbook begins by presenting the development of AR over the last few years, mentioning the key pioneers and important milestones. It then moves to the fundamentals and principles of AR, such as photogrammetry, optics, motion and objects tracking, and marker-based and marker-less registration. The book discusses both software toolkits and techniques and hardware related to AR, before presenting the applications of AR. This includes both end-user applications like education and cultural heritage, and professional applications within engineering fields, medicine and architecture, amongst others. The book concludes with the convergence of AR with other emerging technologies, such as Industrial Internet of Things and Digital Twins. The handbook presents a comprehensive reference on AR technology from an academic, industrial and commercial perspective, making it an invaluable resource for audiences from a variety of backgrounds.
