falling down book online: Web of Lies Aoife Gallagher, 2022-10-06 There are many ways to fall down the rabbit-hole - and it may be far easier than you realise. Web of Lies is a fascinating deep dive into the rising threat of conspiratorial thought in Ireland and internationally, and explores how the internet is being used to spread disinformation - polarising society and radicalising people into extremism in the process. falling down book online: Online Gambling and Crime James Banks, 2016-05-13 Offering the first empirically driven assessment of the development, marketisation, regulation and use of online gambling organisations and their products, this book explores the relationship between online

gambling and crime. It draws upon quantitative and qualitative data, including textual and visual analyses of e-gambling advertising and the records of player-protection and standards organisations, together with a virtual ethnography of online gambling subcultures, to examine the ways in which gambling and crime have been approached in practice by gamers, regulatory agencies and online gambling organisations. Building upon contemporary criminological theory, it develops an understanding of online gambling as an arena in which risks and rewards are carefully constructed and through which players navigate, employing their own agency to engage with the very real possibility of victimisation. With attention to the manner in which online gambling can be a source of criminal activity, not only on the part of players, but also criminal entrepreneurs and legitimate gambling businesses, *Online Gambling and Crime* discusses developments in criminal law and regulatory frameworks, evaluating past and present policy on online gambling. A rich examination of the prevalence, incidence and experience of a range of criminal activities linked to gambling on the Internet, this book will appeal to scholars and policy makers in the fields of sociology and criminology, law, the study of culture and subculture, risk, health studies and social policy.

falling down book online: *Expressive Networks* Matthew Kilbane, 2025-06-10 *Expressive Networks* convenes an urgent conversation on digital media and the social life of contemporary poetry. Tracing how poems circulate through online spaces and how capitalized platforms have come to pattern the reading and writing of poetry, contributors emphasize both the expressivist cast of digital literary culture and the deep-running ambivalence that characterizes aesthetic and critical responses to platformed cultural production. The volume features chapters on Pan- African spoken word programs, Singaporean Facebook groups, decolonial hemispheric networks, and Japanese media-critical poetries as well as platforms such as Twitter/X, Instagram, and Amazon. Though contributors write from a variety of methodological positions and address themselves to a range of archives, they share the primary conviction that the impact of Web 2.0 on literary practice is far-reaching, far from self-evident, and far more variegated and unpredictable than easy summations of social media's influence suggest. *Expressive Networks* asks after poetry's present and future by examining what poems themselves express about the social make-up of networked platforms. Edited by Matthew Kilbane with contributions from Cameron Awkward-Rich, Micah Bateman, Andrew

Campana, Sumita Chakraborty, Scott Challener, C.R. Grimmer, Tess McNulty, Michael Nardone, Seth Perlow, Anna Preus, Susanna Sacks, Carly Schnitzler, Melanie Walsh, and Samuel Caleb Wee.

falling down book online: A Course in Morphometrics for Biologists Fred L. Bookstein, 2018-10-04 This book builds a much-needed bridge between biostatistics and organismal biology by linking the arithmetic of statistical studies of organismal form to the biological inferences that may follow from it. It incorporates a cascade of new explanations of regression, correlation, covariance analysis, and principal components analysis, before applying these techniques to an increasingly common data resource: the description of organismal forms by sets of landmark point configurations. For each data set, multiple analyses are interpreted and compared for insight into the relation between the arithmetic of the measurements and the rhetoric of the subsequent biological explanations. The text includes examples that range broadly over growth, evolution, and disease. For graduate students and researchers alike, this book offers a unique consideration of the scientific context surrounding the analysis of form in today's biosciences.

falling down book online: , 2018-11-30 The Apocalypse of Enoch and Bhuśunda The Apocalypse of Enoch and Bhuśunda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology. In this second volume of A Chronology of the Primeval Gods and the Western Sunrise, ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past 120,000 years - as documented in ice core data. The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods - hyper-nova at the Galactic Center associated with Sgr A*(The Dragon), Sgr West (The Beast) and Sgr East (Hiranyāksha and Hiranyakas'ipu), with secondary supernova seen as the birth of new, destructive gods. Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo-polar migrations, which has resulted in a shift of the earth's equator on at least one occasion. Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region. Multiple versions of the myths of Orion are analyzed, showing clear linkages between the Vedic myth of Trisanku, the Book of Genesis, Senmut's Tomb, and the myths of Prajāpati Daksa representing the oldest version of the Orion myth - older than Trishanku and Genesis by 20,000 years! The stunning conclusion explains how the "Watchers" of Enoch were the Vedic descendants of Ila and Ikshvaku. These descendants of the seventh Manu had been observing and recording the stars as a source of cataclysm for at least 15,000 years prior to Enoch, thus allowing Enoch to prophesize a 'new heaven.' That prophecy became the foundation for St John's Book of Revelations, which is shown to be a description of a series of cataclysms attributed to Sgr West. The book offers a new theory for explaining geo-polar migration. That theory suggests small shifts in the location of the earth's center of gravity underlie each migration, but that there are multiple causes for the shifts.
