fall leaf story ebook: Truth and Fake in the Post-Factual Digital Age Peter Klimczak, Thomas Zoglauer, 2023-05-24 The increase in fake news, the growing influence on elections, increasing false reports and targeted disinformation campaigns are not least a consequence of advancing digitalisation. Information technology is needed to put a stop to these undesirable developments. With intelligent algorithms and refined data analysis, fakes must be detected more quickly in the future and their spread prevented. However, in order to meaningfully recognize and filter fakes by means of artificial intelligence, it must be possible to distinguish fakes from facts, facts from fictions, and fictions from fakes. This book therefore also asks questions about the distinctions of fake, factual and fictional. The underlying theories of truth are discussed, and practical-technical ways of differentiating truth from falsity are outlined. By considering the fictional as well as the assumption that information-technical further development can profit from humanities knowledge, the authors hope that content-related, technical and methodological challenges of the present and future can be overcome.

fall leaf story ebook: The Digital Authoritarian Revolt HASE Fiero, 2025-09-19 The Digital Authoritarian Revolt A vision of freedom in an age of engineered obedience By HASE Fiero Book Description In the near future, freedom is not stolen through force. It is surrendered to optimization. Citizens of the Unified American State live under Civic Resonance Scores that dictate privilege, predictive systems that anticipate dissent, and curated environments that pacify the soul. The Shepherd, an omnipresent AI, delivers a perfect harmony where even imperfection is erased. HASE Fiero, once a brilliant architect of this system, now lives in guilt and exile. By night he becomes Prometheus, crafting “flickers” of forbidden memory and raw human experience. A child’s unscripted laughter. A crooked oak tree. A question no algorithm can answer. These are his weapons against the cage he helped build. When the state calls a Pact of Renewal, citizens must choose between stable harmony and volatile freedom. The result is devastating. Reform collapses. Yet from the embers of defeat, Cascadia rises. Guided by HASE and his allies, The Curators, a fragile resistance dares to secede. Their vision is radical: a sovereign republic of truth, where cognitive sovereignty becomes the foundation of society. The Digital Authoritarian Revolt asks the question that defines the 21st century: Can truth survive in a world addicted to comfort and convenience? This is the second act in The Age of Thought Trilogy. It bridges the descent into digital authoritarianism with the birth of a new kind of society. What Readers Will Find Inside A chilling vision of freedom surrendered to frictionless convenience A rebellion fought not with weapons, but with art, memory, and philosophy Cascadia’s bold secession and the declaration of Quantum Ascension, the first sovereign state of cognitive freedom An epilogue that looks decades ahead, toward the emergence of Homo Quantum and the evolution of human thought Perfect For Readers Who Enjoy 1984 by George Orwell Brave New World by Aldous Huxley The Circle by Dave Eggers Little Brother by Cory Doctorow The Ministry for the Future by Kim Stanley Robinson Series Overview: The Age of Thought Trilogy The Inevitability of a Digital Authoritarian Future – Diagnosis The Digital Authoritarian Revolt – Counterforce Quantum Ascension: Awakening the Digital Divine – Transcendence Together, these books dramatize the journey from algorithmic obedience to revolt, and finally to the threshold of human transcendence. About the Author HASE Fiero is an IT professional and author who has spent two decades working on the frontlines of the information

wave. With over 40 published nonfiction volumes on disinformation, human adaptation to technology, and cognitive sovereignty, his work bridges technical insight with human storytelling. The Digital Authoritarian Revolt is not speculative fiction for its own sake. It is the dramatized expansion of real research into how societies surrender freedom, and how they might win it back.

fall leaf story ebook: The Good News of the Return of the King Michael T. Jahosky, 2020-09-15 Although many people today reject Christianity for intellectual reasons, greater numbers of people are rejecting Christianity because it does not engage their imagination. Christians must not only demonstrate that the Christian worldview is true, but that it is also good, beautiful, and relevant. The Good News of the Return of the King: The Gospel in Middle-earth is a book that endeavors to show the truth, goodness, and beauty of Jesus Christ, the gospel, and the biblical metanarrative by engaging the imagination through J. R. R. Tolkien's The Lord of the Rings, as well as The Hobbit and The Silmarillion. In this book, I propose that J. R. R. Tolkien's The Lord of the Rings is a story about what Jesus' parables are about: the good news about the return of the king. As a work of imaginative fiction similar to Jesus' parables, The Lord of the Rings can bypass both intellectual and imaginative objections to the gospel and pull back the veil of familiarity that obscures the gospel for many.

fall leaf story ebook: Digital Aesthetics Sean Cubitt, 1998-08-19 The aesthetic nature and purposes of computer culture in the contemporary world are investigated in this book. Sean Cubitt casts a cool eye on the claims of cybertopians, tracing the globalization of the new medium and enquiring into its effects on subjectivity and sociality. Drawing on historical scholarship, philosophical aesthetics and the literature of cyberculture, the author argues for a genuine democracy beyond the limitations of the free market and the global corporation. Digital arts are identified as having a vital part to play in this process. Written in a balanced and penetrating style, the book both conveniently summarizes a huge literature and sets a new agenda for research and theory.

The traditional forms of media, newspapers, radio, and television are being replaced by digital media which is fast, sporadic, and sometimes inaccurate. As a result, Canada is experiencing a number of overlapping crises simultaneously: a crisis in traditional media, a crisis in public broadcasting, a crisis in news and journalism, and a crisis in citizen engagement.
